Light Duty Commercial Ultra Low NOx
High Input Gas Water Heater

The Ultra Low NOx High Input Models Feature:

- **Bradford White ICON System**—Intelligent gas control with proven millivolt powered technology and built-in piezo igniter. A standard, off the shelf thermopile converts heat energy from the pilot flame into electrical energy to operate the gas valve and microprocessor. No need for external electricity.

- **Enhanced Performance**—Proprietary algorithms provide enhanced First Hour Rating and tighter temperature differential.

- **Advanced Temperature Control System**—Microprocessor constantly monitors and controls burner operation to maintain consistent and accurate water temperature levels.

- **Intelligent Diagnostics**—Exclusive multicolor LED light indicates operation status/service required.

- **Ultra Low NOx Burner with Primary and Secondary Air Distribution Devices**—Ensures proper air to gas ratio for reduction of NOx generated by the combustion process.

- **Maintenance-Free**—No regular cleaning of air inlet openings or flame arrestor is required under normal conditions (ULG250H553N only).

- **Sight Window**—Offers a view into the combustion chamber to observe the operation of the pilot and burner.

- **Factory-Installed Hydrojet® Total Performance System**—Sediment reducing device that also increases first hour rating of hot water while minimizing temperature build-up in tank.

- **Vitraglas® Lining**—An exclusively engineered enamel formula that provides superior tank protection from the highly corrosive effects of hot water. This formula (Vitraglas®) is fused to the steel surface by firing at a temperature of over 1600°F (871°C).

- **More Precise Temperature Control**—With an adjustable temperature up to 180°F (82°C).

- **Side Connections**—3/4” (19mm) NPT tappings allow an easy connection for space heating applications (potable water only).

- **Insulation System**—Non-CFC foam covers the sides and top of the tank, reducing heat loss. This results in less energy consumption, improved efficiencies, and jacket rigidity.

- **Pedestal Base**—Rugged and durable base allows easy transport and positioning, while providing corrosion-resistant contact with floor.

- **Water Connections**—3/4” (19mm) NPT factory-installed true dielectric fittings extend water heater life and simplify water line connections.

- **Protective Magnesium Anode Rod**—Provides added protection against corrosion for long-term, trouble-free service.

- **Hand Hole Cleanout**—Allows inspection of tank interior and facilitates the removal of sediment deposits (ULG2100H803N models only).

- **4” (107 mm) "Snap Lock" Draft Diverter**

- **T&P Relief Valve**—Installed.

- **Low Restrictive Brass Drain Valve**—Durable tamper proof design.

- **Design Certified by CSA International (formerly AGA/CGA).**

- **ULG250H553N Complies with the latest Ultra Low NOx requirement (10 ng/J NOx limit), ULG275H763N / ULG2100H803N (14 ng/J NOx limit).**

Available in Natural Gas only.

For 5 year models, change suffix from "3" to "5".

* Based on manufacturer’s rated thermal efficiency.

Uniform Energy Factor and First Hour Rating is based on the latest AHRI directory listings.

General:

Meet or exceed ASHRAE 90.1b (current standard) C.E.C. Listed Recovery efficiency ranging up to 79%.

**Ultra Low NOx Models**

Meet or exceed ASHRAE 90.1b (current standard) C.E.C. Listed Recovery efficiency ranging up to 79%.

**Ratings**

- **NAECA or EPACT Requirements**, as applicable.
- All gas water heaters are certified at 300 PSI test pressure (2068 kPa) and 150 PSI working pressure (1034 kPa). All gas connections are 1/2" (13mm).
- All gas water heaters are designed and certified by CSA International (formerly AGA/CGA), ANSI standard Z21.10.3 (Z21.10.1 for 48 gallon) and peak performance rated.
- Meets NAECA or EPACT Requirements, as applicable.

**Dimensions and Specifications**

- **Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement.**
- **Suitable for Water (Potable) Heating and Space Heating.**
- **Toxic chemicals, such as those used for boiler treatment, shall NEVER be introduced into this system. This unit may NEVER be connected to any existing heating system or component(s) previously used with a non-potable water heating appliance.**
