Bradford White is ISO registered to the 9001-1994 standard.

- **1" Non-CFC foam insulation**—surrounds the tank surface, saving energy by retarding loss of heat. (except M-I-75 1¼" and M-I-100T 2¼")

- **Flue baffle**—designed to maximize the amount of heat absorbed in the lower portion of tank. Minimizes air movement in the heater during standby periods to retard heat loss up the flue.

- **Fully automatic controls**—automatic temperature selection at your fingertips. Built-in energy cut-off switch prevents abnormally high water temperature for extra safety. Built-in gas pressure regulation.

- **Vitraglas® lining**—Bradford White water heater tanks are protected from the corrosive effects of hot water by an exclusive ceramic porcelain-like coating. The Bradford White high silica Vitraglas® lining provides a tough interior surface for hot water tanks.

- **Protective magnesium rod**—provides added protection against corrosion for long trouble-free service.

- **Factory installed Hydrojet® Total Performance System**—cold inlet sediment reducing device. Helps prevent sediment build up in tank. Increases first hour delivery of hot water while minimizing temperature build up at top of tank. (100 gallon models come equipped with the Hydrojet Sediment Reduction System.)

- **Factory installed dielectric waterway fittings**—all heaters equipped with special water heater nipples for longer heater life.

- **Brass drain valve.**

- **“Snap-Lock” draft diverter.**

- **T&P relief valve included.**

- **Exclusive “Slider” combustion chamber door** [except 75 and 100 gallon (284 and 379 liter) models].
