Residential Atmospheric Vent
Energy Saver Gas Water Heater

The Atmospheric Vent FVIR Defender Safety System® Models Feature:

■ Advanced ScreenLok® Technology Flame Arrestor Design—Flame arrestor is designed to prevent ignition of flammable vapor outside of the water heater.

■ Resettable Thermal Switch—Proven and reliable bimetallic switch prevents burner and pilot operation in case of ongoing flammable vapor burn inside of the combustion chamber or restricted air flow.

■ Piezo Igniter—Easy and quick lighting of the pilot burner by push button.

■ Pedestal Base—Rugged and durable base allows easy transport and positioning, while providing corrosion resistant contact with floor.

■ Maintenance Free—No regular cleaning of air inlet openings or flame arrestor is required under normal conditions.

■ Sight Window—Offers a view into the combustion chamber to observe the operation of the pilot and burner.

■ Factory Installed Hydrojet® Total Performance System—Cold water inlet sediment reducing device helps prevent sediment build up in tank and increases first hour delivery of hot water.

■ Vitraglas® Lining—Bradford White water heater tanks are protected from the corrosive effects of hot water by an exclusive ceramic porcelain-like coating that provides a tough interior surface for our hot water tanks.

■ 1" Non-CFC Foam Insulation—Covers the sides and top of tank, reducing the amount of heat loss. This results in less energy consumption, improved operation efficiencies and jacket rigidity.

■ Water Connections—3/4" NPT factory installed true dielectric fittings extend water heater life and eases installation.

■ Factory Installed Heat Traps—Design incorporates a flexible disk that reduces heat loss in piping and eliminates the potential for noise generation.

■ Protective Magnesium Anode Rod—Provides added protection against corrosion for long trouble-free service.

■ 3x4 “Snap Lock” Draft Diverter—Allows either 3" or 4" vent connections with inputs of 40,000 BTU/Hr or less. Over 40,000 BTU/Hr. has the 4" “Snap Lock” Draft Diverter.

■ Flue Baffle—Maximizes the amount of heat absorbed by the tank and reduces heat loss during standby periods.

■ Steel Tank—Heavy gauge steel automatically formed, rolled and welded.

■ T&P Relief Valve—Included.

■ Brass Drain Valve.

■ Design Certified by CSA International (formerly AGA and CGA).

6 or 10-Year Limited Tank Warranties / 6-Year Limited Warranty on Component Parts.

For more information on warranty, please visit www.bradfordwhite.com
For products installed in USA, Canada and Puerto Rico. Some states do not allow limitations on warranties. See complete copy of the warranty included with the heater.

**Propane models feature a Titanium Stainless Steel propane burner.** For Propane (LP) models change suffix “BN” to “SX”.

- **For 10 year models**, change suffix from “6” to “10”.
- **Based on manufacturers rated recovery efficiency.**
- **Models feature optional top T&P location and must be specified when ordering.**

**Note:** M-I-30S, M-I-50L and M-I-60T do not have top T&P option.

---

### Meets NAECa Requirements

**General**

All gas water heaters are certified at 300 PSI test pressure (2068 kPa) and 150 PSI working pressure (1034 kPa). All water connections are ¾” NPT (19mm) on 3” (203mm) centers. All gas connections are ⅝” (13mm).

All models design certified by CSA International (formerly AGA/CGA), ANSI standard Z-21.10.1 and peak performance rated.

**Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement.**

**Suitable for Water (Potable) Heating and Space Heating.**

Toxic chemicals, such as those used for boiler treatment, shall NEVER be introduced into this system. This unit may NEVER be connected to any existing heating system or component(s) previously used with a non-potable water heating appliance.
