Residential Direct Vent
Energy Saver Gas Water Heater

The Direct Vent FVIR Defender Safety System® Models Feature:

- **Closed Combustion**—All air for combustion is taken directly from the outside. The co-axial vent pipe (pipe inside a pipe) draws combustion air in through the outer pipe (5"), and exhausts the products of combustion through the inner pipe (3"). The vent pipe at the top of the unit can be rotated for venting flexibility.

- **Reinforced Seals**—Seals surround the closed combustion chamber and the FVIR inner door, preventing the ignition of flammable vapors outside of the water heater.

- **Piezo Igniter**—Easy and quick lighting of the pilot burner by push button.

- **Maintenance Free**—The vent piping and the closed combustion chamber with reinforced seals do not require regular cleaning under normal operating conditions.

- **Sight Window**—Offers a view into the combustion chamber to observe the operation of the pilot and burner.

- **No Electrical Power Necessary.**

- **Factory Installed Hydrojet® Total Performance System**—Cold water inlet sediment reducing device. Helps prevent sediment build up in tank. Increases first hour delivery of hot water while minimizing temperature build up in tank.

- **Vitraglas® Lining**—Bradford White tanks are lined with a exclusively engineered enamel formula that provides superior protection from the highly corrosive effects of hot water. This formula (Vitraglas®) is fused to the steel surface by firing at a temperature of over 1600ºF.

- **Fully Automatic Controls**—Built-in energy cut-off switch prevents abnormally high water temperature. Built-in gas pressure regulation.

- **Cast Aluminum Air Intake Boot**—A cast molded air intake boot provides exceptional installation durability.

- **Telescoping Solid Vent Kits**—Multiple kits (see reverse side) allow up to 8ft. vertical and 8ft. horizontal vent lengths (horizontal termination only).

- **Flexible Vent Kit**—The maximum vent length (horizontal and vertical) can be flexed to 100" (horizontal termination only).

- **1" Non-CFC Foam Insulation**—Surrounds the tank surface, saving energy by reducing the amount of heat loss.

- **Pedestal Base.**

- **Water Connections**—3/4" NPT factory installed true dielectric fittings.

- **Factory Installed Heat Traps.**

- **Protective Magnesium Anode Rod.**

- **T&P Relief Valve**—Included.

- **Brass Drain Valve**—Tamper proof design.

All Propane models feature a Titanium Stainless Steel propane burner. For Propane (LP) models change suffix “BN” to “SX”.

*Based on manufacturers rated recovery efficiency.

Telescoping Solid Vent Kit (239-47810-00) or Flexible Vent Kit (239-47812-00) can be ordered and shipped with water heater, or ordered and shipped separately.

For vent kit components and venting instructions, refer to Installation and Operating Manual.

### Optional Telescoping Solid Vent Kits:

- **Kit “A”** Telescopes from 4 3/4” to 5 1/2” Part No. 243-41260-00
- **Kit “B”** Telescopes from 6 3/4” to 9 1/2” Part No. 243-41331-00
- **Kit “C”** Telescopes from 13 3/4” to 23 3/4” Part No. 243-41029-00
- **Kit “D”** Telescopes from 49 13/16” to 95 13/16” Part No. 243-41424-00

---

**Meets NAECRA Requirements**

**General**

All gas water heaters are certified at 300 PSI test pressure (2068 kPa) and 150 PSI working pressure (1034 kPa). All potable water connections are 3/4” NPT (19mm) centers. All gas connections 1/2” (13mm) centers. All gas connections 1/2” (13mm). All models certified by CSA International (formerly AGA/CGA), ANSI Z-21.10.1 and peak performance rated.

Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement.

Suitable for Water (Potable) Heating and Space Heating.

Toxic chemicals, such as those used for boiler treatment, shall NEVER be introduced into this system. This unit may NEVER be connected to any existing heating system or component(s) previously used with a non-potable water heating appliance.
