Residential Manufactured Home Direct Vent Gas Water Heater

The Manufactured Home Models feature:

- **Housing and Urban Development**—This water heater is designed in accordance with H.U.D. and is certified for installation in a manufactured home (mobile home) only and must be installed in an enclosure that will completely separate the water heater combustion and venting system from the dwelling interior.

- **Sealed Combustion Roof Jack Kit**—Ordered separately and includes an adjustable air intake tube, roof jack and hardware. Must specify roof jack size when ordering. Available in 12" (305mm), 18"/32" (457/813mm), 32"/60" (813/1524mm), or 48"/95" (1219/2413mm) lengths.
  
  - Must order roof jack kit for new installations.

- **Flue Baffle**—Designed to maximize the amount of heat absorbed in the lower portion of tank. Minimizes air movement in the heater during standby periods to decrease heat loss up the flue.

- **Heat Traps**—Installed on hot water outlet to minimize heat loss through piping.

- **Vitraglas® Lining**—An exclusively engineered enamel formula that provides superior tank protection from the highly corrosive effects of hot water. This formula (Vitraglas®) is fused to the steel surface by firing at a temperature of over 1600°F (871°C).

- **Fully Automatic Controls**—Fast acting surface-mount thermostat with high limit energy cut-off (manual reset) for safety.

- **Insulation System**—2" (51mm) Non-CFC foam insulation covers the sides and top of the tank, reducing heat loss. This results in less energy consumption, improved efficiencies, and jacket rigidity.

- **Water Connections**—3⁄4" (19mm) NPT factory-installed true dielectric fittings extend water heater life and simplify water line connections.

- **Protective Magnesium Anode Rod**—Provides added protection against corrosion for long-term, trouble-free service.

- **T&P Relief Valve**—Installed.

- **Low Restrictive Brass Drain Valve**—Durable tamper proof design.

- **Convertible Gas Control**—Easily convertible control for use with either Propane or Natural Gas.

6 or 10-Year Limited Tank Warranties / 6 or 10-Year Limited Warranty on Component Parts.

For more information on warranty, please visit www.bradfordwhite.com

For products installed in USA, Canada, and Puerto Rico. Some states do not allow limitations on warranties. See complete copy of the warranty included with the heater.
Residential Manufactured Home Direct Vent Gas Water Heater

Manufactured Home Models

NATURAL GAS AND LIQUID PROPANE GAS

Meet or exceed ASHRAE 90.1b (current standard) C.C. Listed
76% Recovery Efficiency

To order Natural Gas heaters change “X” to “N”. For 10 year models, change suffix from “6” to “10”.
* Based on manufacturer’s rated recovery efficiency.
Uniform Energy Factor and First Hour Rating is based on the latest AHRI directory listings.

This water heater is of the closed combustion type (direct venting) for mobile home applications only where all combustion air is supplied from the outdoors through the air intake and all combusted gas products are vented directly to the outside by means of the roof jack.
No draft diverter (vent hood) is required for this water heater. The ETL listing of this water heater includes the field installation of the following components: roof jack, roof jack clamp, air intake, air intake seal, and heater tie down materials. These components for field installation are shipped with the heater in a separate box and must be installed according to instructions. No other components are approved for use with the water heater. The water heater must be installed in accordance with The Federal Mobile Home Construction and Safety Standard or in the absence of such standard, The Standard for Mobile Homes (ANSI/NFPA No. 601B-1977)

General:
Meets NAECA Requirements.
All gas water heaters are certified at 300 PSI (2068 kPa) test pressure and 150 PSI (1034 kPa) working pressure. All water connections are 3/4” NPT (19mm), all gas connections are 1/2” (13mm). All models design-certified by ETL to UL 307-B code and performance rated. Designed in accordance with the H.U.D. Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 3280.707 (d)(2) for energy efficiency.

Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement.
Suitable for Water (Potable) Heating and Space Heating. Toxic chemicals, such as those used for boiler treatment, shall NEVER be introduced into this system. This unit may NEVER be connected to any existing heating system or component(s) previously used with a non-potable water heating appliance.
