The Infiniti® K Series Tankless Condensing Water Heater Models feature:

- ENERGY STAR® Qualified – Meet or exceed requirements for ENERGY STAR® per the latest ENERGY STAR® criteria revision, as well as most utility rebate programs.
- SRT™ Scale Reduction Technology – Significantly reduces the incidence of scale build-up known to result in poor performance, additional maintenance, and pre-mature component or product failure.
- STEADISET™ Technology – Virtually eliminates cold water sandwich without the need for an internal buffer tank and recirculation pump.
- Self-Calibrating Fan and Gas Valve – Simple combustion management system uses self-calibrating sensors to automatically configure air fuel ratio for flue length, gas type, and altitude - without a combustion analyzer.
- Modulation – Segmented burner with 22:1 turn down ratio.
- Top Water Connections – Top water connections for easy retrofit.
- Built-In Digital Control – Temperature can be adjusted on the front control panel (100-140°F) (38°C-60°C).
- Active Bypass – Achieves superior temperature stability (±2°F) (±1°C).
- External Recirculation Pump Wiring – Installed. Built-in controls provide precise operation of external recirculation pump with, or with out, additional external temperature sensor (Recirculation pump sold separately).
- Venting Length Up To 280 ft. – Direct vent, power vent, and concentric venting terminations approved. PP, PVC, and CPVC approved venting material (refer to I&O manual for details). 2" (51mm) vent up to 60 ft. (18m) and 3" (76mm) vent up to 280 ft. (85m).
- Gas Connection Flexibility – 1/2" (13mm), 3/4" (19mm), or 1" (25mm) connections permitted (refer to I&O manual for details).
- Inlet Water Filter – External access for easy maintenance.
- Space Saving Installation – Compact size for tight installations.
- Built In Freeze Protection – Protects unit from freezing. Activates automatically when the water heater is plugged in.
- Easy LP Gas Field Convertibility – Purchase of additional kit NOT required to convert from NG to LP.
- Heat Exchanger – Primary Copper with Secondary Stainless Steel (316L) heat exchanger helps maximize life and minimize scale build-up.
- Pressure Relief Valve – Included (Integral port).
- Built In Flush Valves – For servicing/de-scaling.
- Flushing condensate trap.
- Intelligent Cascading Kit (Optional) – Up to 24 units can be connected together with ease.
- Complies with the latest Ultra-Low NOx requirement (14 ng/J NOx limit).

**Propane (LP) Models are not available for order from the factory. All Natural Gas products shipped can be converted to Propane (LP) without the purchase of an additional kit.**

**Requires an electrical power supply from a 120VAC 60Hz., properly rated receptacle and must be properly grounded. Power supply cord provided.**

**Intelligent Cascading Kit:** Any indoor Infiniti® K-Series tankless water heater purchased with the serial number “TEB0008188” and after, will have cascading technology available. Up to 24 units can be connected together with ease. Part No. 7736502750 (One for each additional water heater).

---

**General**

All potable water connections are 3/4" (19mm) NPT. Gas connections are 3/4" (19mm). Bradford White recommends consulting the Installation and Operations Manual (IOM) for proper gas line sizing based upon the installation specifics.

**Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement.**

Toxic chemicals, such as those used for boiler treatment, shall NEVER be introduced into the potable side of this system. The potable side may NEVER be connected to any existing heating system or component(s) previously used with a non-potable water heating appliance.
