Leverage over fifteen years of requirement analysis, development, and enterprise architecture expertise to drive business development and customer-focused success.

Areas of expertise include:

- Software Project Management
- Requirements Analysis
- Rapid Prototyping
- Technical Architecture
- Cloud Computing
- Technical Sales
- Financial Forecasting
- Team Leadership
- Agile Methodologies

PROFESSIONAL EXPERIENCE

Director of Software Engineering

Inventive Group, Inc. – Austin, TX

01/2018 – 02/2019

- Lead all software development projects which netted over **\$2mm** in annual sales
- Drove technical, cloud-based, distributed system projects from pre-sales to implementation, **managing offshore** and in-house development teams consisting of over 20 engineers
- Provided **financial forecasting and weekly project status** reports to the executive team
- Drastically improved software development quality and efficiency by defining code standards, testing standards, and implementing the use of the Agile SCRUM framework
- Launched the engineering book club and tech talks for developers to learn and grow together
- Provided weekly 1:1 session, mentoring, and accelerated career achievements by setting attainable goals for team members
- Consistently developed **strong relationships with clients** throughout the project lifecycle to help foster new sales opportunities
- Formalized project templates to improve velocity of new project startup for cloud-based CI/CD pipelines (AWS/Azure) and development toolkits for React, Node, and .NET projects

Manager of Software Development BI & Analytics

TriNet Group, Inc. – Austin, TX

04/2017 – 12/2017

- Built, organized, and lead two development teams to build the next generation TriNet reporting solutions which support over 14,000 customers
- Defined the architecture, code standards, development toolkit, timelines, scope, and milestones needed to deliver the minimum viable product in **only 6 months**
- Communicated monthly project status to executive team and performed demonstrations of the applications
- Facilitated **smooth product launches** by collaborating with the product management, QA, security, support, and infrastructure teams on a weekly basis
- Drove internal supportability and **maintainability processes and initiatives** for the development team and provided hands-on technical contributions

Application Architect

General Motors – Austin, TX

04/2015 – 04/2017

- Coordinated and managed the Owner Center architectural design for the GM Info3 project which integrated the in-vehicle entertainment system with the Owner Center user portal which serves **over 1 million customers**
- Architected, developed, and trained UI developers on an AngularJS framework/templating system to support better modularity, localization, testability, and multi-tenancy
- Reduced time-to-market for a new global market **by over 3 months** by introducing the new AngularJS framework
- Lead the effort, research, and implementation for WCAG compliance in Canada

Lead Senior Software Engineer

Trade Technologies, Inc. – Austin, TX

03/2013 – 04/2015

- Overall development lead responsible for .NET code standards, testing patterns, and overall software architecture
- Introduced the KendoUI framework to the project for an improved user experience and accelerated development
- Lead a team to architect and develop a number of feature enhancements for the platform including a business gateway + workflow engine for trade-related documents, a custom reporting solution, and the overall UI/UX experience

Senior Software Dev Engineer

Dell, Inc. (6mo. contract to hire) – Austin, TX

03/2012 – 03/2013

- Developed a host of social commerce applications utilizing a number of technologies including .NET, Ruby, Java, Node, Backbone, Knockout, and many more
- Lead a "lean canvas" exercise, conducting over 30 interviews to determine the viability of a product

Senior Integration Engineer

Newgistics, Inc. – Austin, TX

04/2011 – 03/2012

- Lead integration efforts for top-tier brands including Walmart, Amazon, Lands End, Gap and many others utilizing BizTalk, custom C# assemblies, WCF web services and messaging technologies
- Assisted in technical sales, application development and account management activities

Senior IT Developer

Hewlett-Packard, Inc. – Austin, TX

01/2009 – 04/2011

- Technical team lead for the SharePoint applications hosted by the Enterprise Services division
- Technical team lead for the custom .NET master data solution in the Finance and Administration IT division

Developer & Partner

Salvagno Partners at UBS Wealth Management – Austin, TX & Chico, CA

12/1999 – 12/2008

- Co-authored the business plan, participated in technical sales, and lead a development team to bring a revolutionary private asset management product to market
- Achieved Series 7 & 66 securities licenses as well as life & health insurance certifications
