

News and Views from the WBF MISSION OFFICE

Serving local churches and their missionaries

January 25, 2022

Dear Co-laborers,

As we enter the last few weeks of winter and look forward to the spring, many churches are having missions emphasis month and missions conferences. It is a blessing to have the opportunity to be in many of these churches and present the ministry of the mission office. Please join us in prayer for these special meetings where God may call someone to be a missionary!

We recently closed the books for 2022, and we rejoice at God's gracious provision for another year! Despite the challenges of moving locations and not having an annual WBF Fall meeting, we saw God provide financially beyond what we could have imagined. We mentioned that we need an increase of \$5,000/month in General Fund support by this summer, and thus far, we have seen an increase of \$3,130. Praise the Lord! Please pray with us that God would provide the additional amount needed for our monthly General Fund support.

As you will read in our newsletter, longtime missionary John Malanowski recently went home to be with the Lord. He and his wife Marjorie were making a final trip to Bali, Indonesia, and had travelled to another island to see the works that had been established. Bro. John passed away in his sleep in the land that he loved, ministering to the people he loved. Please pray for Marjorie as she has now retired. Life will certainly be different for her in the days ahead. Also, please pray for more laborers to be sent. One of Bro. John's burdens was to see more missionaries sent to Indonesia to preach the gospel. If God is calling you, we would love to assist you and your sending church. Please give us a call!

Thank you for your sacrificial giving throughout the year. If you are ever in the DFW area, please stop by so we can say "thank you" in person. We appreciate your faithful prayers and financial support, and we anticipate great things God has in store this year!

Thanks for all you do!

Joey Bacon
Mission Director
