HEALTH NUGGET

Powerful antioxidants, like beta carotene and vitamin C, that scavenge cell damaging free radicals, are only found in plant foods. Dairy and meats are completely deficient in these cancer-and heart disease-fighting food components.

“Is anyone among you sick? Let them call the elders of the church to pray over them and anoint them with oil in the name of the Lord. And the prayer offered in faith will make the sick person well; the Lord will raise them up. If they have sinned, they will be forgiven.”
James 5: 14-15
