HEALTH NUGGET

Powerful antioxidants, like beta carotene and vitamin C, that scavenge cell damaging free radicals, are only found in plant foods. Dairy and meats are completely deficient in these cancer-and heart disease-fighting food components.

“Then they cried to the Lord in their trouble, and He saved them from their distress. He sent out His word and healed them; He rescued them from the grave. Let them give thanks to the Lord for His unfailing love and His wonderful deeds of mankind.” Psalms 107: 19-21
