Navigating complex disease genetics: using the Knowledge Portal Network to move from SNPs to functional insights

12:30 - 1:45 PM, October 19, 2018
Room 28C, Upper Level, San Diego Convention Center

The Knowledge Portal Network is a software platform for aggregation, analysis, and representation of human genetics data for complex diseases.

Program

- Motivation and background
  - Noël Burtt

- Interactive demonstration of the T2D Knowledge Portal (type2diabetesgenetics.org)
  - Maria Costanzo
  - Ben Alexander

- Interactive demonstration of the Diabetes Epigenome Atlas (t2depigenome.org)
  - Kyle Gaulton

- Q & A
  - with the team
