

Introducing the new *Poseidon*

The *Poseidon* Ozone Generator system uses the most reliable and proven ozone technology to create our most cost efficient, energy efficient and space efficient ozone generator yet.

The *Poseidon* technology produces 220 MG/Hr. of ozone using only 1.75 Watts of power. The power supply will convert 110-240/50-60Hz to 12 VDC to operate this with safe low voltage operation. This ozone generator is designed for aquariums, water treatment and food safety applications.

US PATENT PENDING

Poseidon* Part # 30281

ELECTRICAL

Primary Voltage 110-240 VAC,
Hz.50-60, Watts 1.75,
Operating Voltage 12-15 VDC

OZONE OUTPUT

0-220 MG/Hr. Variable with
ambient air feed gas input.
0-1000 MG/Hr. Variable with
Oxygen feed gas input.

DIMENSIONS

7" x 4.5" x 1.5" (WxHxD)
1 Lb. Shipping Weight

Power Supply
approved and certified
