Overview

With more than 96 percent of the world’s population and 75 percent of its purchasing power outside the United States, economic recovery, jobs, and future growth for Pennsylvania and America will depend on trade and investment. That includes reaching those customers with American goods and services through exports and expanding buying power and options for American companies and families with imports.

New Business Roundtable research, U.S. government data, and other data sources demonstrate the benefits of international trade and investment to jobs and the economy in Pennsylvania. As the United States and the world continue efforts to defeat the COVID-19 pandemic and create jobs and economic opportunity – restoring trade and supporting trade-dependent jobs can help Pennsylvania recover as well.

Trade Creates & Supports Jobs in Pennsylvania

- **International trade, including exports and imports, supported 1,596,200 Pennsylvania jobs – one in five in 2019.** These trade-related jobs grew six times faster than total employment from 1992 to 2019 and are at large and small companies, on farms, in factories, and at the headquarters of Pennsylvania's globally engaged firms. A rebound in trade will help restore trade-related jobs lost during the pandemic in Pennsylvania. *(See Pennsylvania Jobs Depend On Two-Way Trade)*

- **Pennsylvania exported $42.5 billion in goods and $23.1 billion in services in 2019,** including pharmaceuticals and medicines, coal and petroleum gases, basic chemicals and financial management and advisory services. Of Pennsylvania's 15,515 exporters, 88 percent are small- and medium-sized companies with less than 500 workers. *(See Pennsylvania Businesses Grow With Exports)*

- **Customers in 217 countries and territories buy Pennsylvania-made goods and services,** including billions of dollars in annual exports to top markets like Canada, Mexico and China. Pennsylvania’s exports have grown 0.8 percent per year since 2010. Policies that help Pennsylvania businesses, workers, and farmers once again reach the growing number of customers around the world can help lead an economic and jobs recovery. *(See Pennsylvania Companies Export Throughout The World)*

- **Imports lower prices and increase choices for Pennsylvania companies and families.** Lower raw material and input costs help Pennsylvania companies stay competitive in global markets, while families can stretch paychecks further as trade agreements reduce the cost of products by eliminating costly barriers to trade. *(See Pennsylvania Companies and Families Benefit from Imports)*

- **Free trade agreements (FTAs) have helped fuel rapid export growth from Pennsylvania to partner countries.** In 2019, $19 billion of Pennsylvania’s goods exports, or 45 percent, went to FTA partners. This represents an increase of 23 percent since 2010. *(See Pennsylvania Needs Trade Agreements To Grow)*

- **Foreign-owned companies invest and build facilities and employ 329,500 workers in Pennsylvania.** *(See Foreign Investment In Pennsylvania Creates Jobs)*
Overview

Creating and preserving quality U.S. jobs is a goal shared by all Americans. With more than 96 percent of the world’s population and 75 percent of the world’s purchasing power outside of the United States, future American economic growth and job creation depend on open markets abroad. At the beginning of 2020, the COVID-19 global pandemic dramatically decreased trade, disrupted communities and economies, and ended millions of jobs across America, including in Pennsylvania. As the U.S. economy recovers and more Americans seek opportunities to work, policies that expand trade can create new jobs in Pennsylvania and help it recover faster.

Trade Creates & Supports Jobs in PA

- Export growth increases jobs by generating new business for Pennsylvania’s manufacturers, services providers and farmers. Imports support jobs and keep costs low, helping Pennsylvania businesses compete and saving Pennsylvania families real dollars at the cash register.
- One in five Pennsylvania jobs depends upon international trade.
- Pennsylvania’s trade-related employment grew six times faster than total employment from 1992 to 2019.
- Jobs in export-dependent industries pay about 16 percent more than jobs in less export-intensive industries.
- U.S. exporting plants increase employment 2 to 4 percent faster annually than plants that do not export. Exporting plants also are less likely to go out of business.
- Trade supports more than 28 million U.S. jobs that provide middle class incomes.

About Trade & Jobs

Trade-supported jobs are not just at companies that export and import. Trade supports higher wages for workers and lower costs for companies and consumers, providing them with more money to spend on other things. This spending supports additional jobs throughout the U.S. economy in sectors like entertainment, education and construction not typically associated with “exports and imports.”

Overview

Pennsylvania exported an estimated $42.5 billion in goods and $23.1 billion in services in 2019. Between 2010 and 2019, Pennsylvania goods exports have increased by 23 percent and services exports by 34 percent. Large companies now account for 68 percent of the value of Pennsylvania’s goods exports, with the rest provided by small- and medium-sized enterprises (SMEs).

Small & Large Employers Partner to Export

In addition to exporting directly themselves, thousands of American SMEs export indirectly when they sell goods and services to large U.S. exporters. Based on their direct and indirect export activity combined, SMEs represent more than 40 percent of the value of U.S. exports.

Top Pennsylvania Exports

- Pennsylvania ranks among the top 5 state exporters in 19 industries, including first in coal and petroleum gases ($2.6 billion), miscellaneous transportation equipment ($888 million), sugar and confectionery products ($632 million), and sawmill and wood products ($320 million).

- Pennsylvania is America’s 31st largest exporter of agricultural products. It is the sixth largest exporter of greenhouse and nursery products, the seventh largest exporter of miscellaneous animal products, the seventh largest exporter of cattle, and the 10th largest exporter of fruits and tree nuts.

- One of Pennsylvania’s fastest growing export categories is oil and gas, which increased by over 10,000 percent since 2010. In 2019, exports of these products reached $1.7 billion.

In 2019, Pennsylvania companies sold their products in 217 countries and territories.

Top export markets include:

- **Canada**: Goods Exports: $11.1 billion, Services Exports: $1.6 billion
- **United Kingdom**: Goods Exports: $2.4 billion, Services Exports: $2.0 billion
- **China**: Goods Exports: $2.6 billion, Services Exports: $1.6 billion
- **Mexico**: Goods Exports: $4.2 billion, Services Exports: $736 million
- **Germany**: Goods Exports: $1.5 billion, Services Exports: $862 million
- **Japan**: Goods Exports: $2.3 billion, Services Exports: $1.3 billion

**Fast Facts: How Exports Help the Pennsylvania Economy Grow**

- Goods and services exports accounted for 8.1 percent of Pennsylvania's state GDP in 2019.
- Pennsylvania's annual exports grew 0.8 percent per year since 2010.
- Pennsylvania's top export markets for goods are Canada, Mexico, and China. Its top market for services is the United Kingdom.
- Pennsylvania's goods exports to India have grown by 17 percent per year since 2010, while Pennsylvania's services exports to India have grown by 8 percent per year.
- Restoring trade can help lead a jobs recovery when supported by policies that help Pennsylvania businesses, workers, and farmers reach the growing number of customers around the world.

Overview
Imports provide a variety of benefit for Pennsylvania companies and families. Imported consumer goods help keep prices down for Pennsylvania families while increasing choices for foods and other products that are not available locally. Imported inputs help Pennsylvania manufacturers compete in both the United States and international markets, while exported goods (e.g., components) and services (e.g., design) often return to the United States as imports. To best meet the COVID-19 challenges, trade policies should ensure that American families and businesses retain access to both domestic and international inputs, supplies and services they need at prices they can afford.

Pennsylvania Families Benefit from Imports

- In 2019, 47 percent of Pennsylvania’s imports were consumer goods. Prices for imported consumer goods tend to drop year after year, leaving Pennsylvania families more money to spend on locally provided goods and services, such as housing, education, and health care.
- Trade and investment liberalization policies save the average Pennsylvania family of four more than $10,000 per year through lower prices and increased specialization.

2010-2019 Price Decrease

-85% for Televisions
-52% for Computers
-51% for Toys

Most Importers are Small Businesses

- In 2019, 11,965 Pennsylvania companies imported goods from 199 countries around the world.
- Nationally, 77 percent of importers were very small businesses with less than 20 employees, while less than 3 percent had over 500 employees.

Pennsylvania Exports and Imports are Linked Through Global Value Chains

- In 2019, 53 percent of Pennsylvania goods imports were raw materials, components and parts that are used by U.S. manufacturers to stay competitive.
- Many of Pennsylvania’s top imports are critical components for Pennsylvania exports. Conversely, Pennsylvania exports of raw materials and parts may return to the United States in imported finished goods.

Imports: Motorcycle parts ($56M in 2019)
Exports: Motorcycles ($701M in 2019)
Overview
Trade with our free trade agreement (FTA) partner countries supports millions of American jobs. Trade agreements level the playing field by lowering other nations’ trade barriers, opening up foreign markets to U.S. exports and setting strong, enforceable rules for trade between the United States and those other countries. Pennsylvania businesses, workers and farmers benefit from market-opening agreements, and would be harmed from new barriers to trade that limit exports, competitiveness, and jobs in Pennsylvania and United States.

- In 2019, $19 billion of Pennsylvania's goods exports, or 45 percent, went to FTA partners.
- Since 2010, Pennsylvania's goods exports to countries with FTAs in effect with the United States in 2019 have increased by 23 percent.
- Pennsylvania's exports to Canada and Mexico have increased by $11 billion (263 percent) since NAFTA went into effect in 1994.
- Pennsylvania's exports to Morocco have increased by nearly 3,300 percent – from $3.4 million to $115 million – since the FTA with Morocco went into effect in 2006.
- Pennsylvania's exports to Korea of basic chemicals have increased from $67 million to $141 million since the FTA with Korea went into effect in 2012.
- In 2019, $5.0 billion of Pennsylvania's services exports, or 22 percent, went to FTA partners.
- Pennsylvania's exports to Australia of computer software services have increased from $5.4 million to $32 million, or by nearly 500 percent, since 2006 (earliest year available).

FOREIGN INVESTMENT IN PENNSYLVANIA CREATES JOBS

Overview

Foreign-owned companies help grow the U.S. economy and jobs. In 2019, foreign-owned companies added over $1 trillion to U.S. GDP, including goods exports of $380 billion and R&D spending of over $60 billion. They employed 7.4 million workers in the United States, including 2 million workers – or 1 out of every 6 – in the manufacturing sector.

Pennsylvania is no exception. Foreign-owned companies make significant investments in Pennsylvania to open or expand facilities every year and are important customers for local goods and services providers. Subsidiaries of foreign-owned companies alone employed hundreds of thousands of workers in Pennsylvania in 2019, including:

- 60,800 workers employed by companies based in the United Kingdom;
- 44,300 workers employed by companies based in the Netherlands;
- 38,900 workers employed by companies based in Germany;
- 30,500 workers employed by companies based in Canada;
- 28,300 workers employed by companies based in France.
