

Company Growth

Our growth has come from the expansion to reach nationwide coverage with major and specialized retailers as well as adding top brands to our portfolio.

We are focused in the distribution of Natural, Ecologic and Organic brands, which mostly are new to the market.

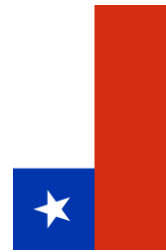

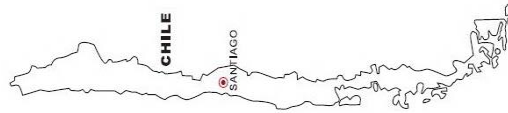

Consumers are realizing the need of a change in their habits, helping to reduce global pollution and support companies creating a green economy.

All this come by offering our final customers alternatives with good quality and certificated products.

Chilean Natural and Organic Products Wholesaler

Espacio B aims at wholesaling Organic and Natural Brands in Chile.

- The business was established in 2012 by Dominique Pagola, Chilean entrepreneur.
- After securing the first representation – Organyc – Dominique, based on her own experience, saw the opportunity of expanding the concept to a wider variety of natural brands that are in great need for everybody's life.
- After six years of dedication to that vision, Espacio B has added 6 brands contributing to a better lifestyle, health and care of the environment, having a nationwide coverage.

Our main focus is to provide a good service and offer best quality products.

- How do we do that? We have a committed team, we personally use the products, review the manufacturing processes, have a strong team of logistic operator, personalized after sales services and, well... **we care!**
