INSTALLING ROLL CALL

Install for use on a Single Computer
If you will be accessing Roll Call from only ONE computer, you will want to download and install the Standalone version of the software from http://www.bythebook.com/support/downloads/

Windows
To install Roll Call on a Windows computer, you must first download the Windows installer file.
1. To download the Windows installer, click on the Standalone link.

   - Click on Standalone link under Windows.

2. Once the file (ROLLCALL13en.msi) is downloaded, double click on the file and choose the run or open option.
3. The installation wizard will be presented. Click NEXT through all the steps.
4. Once the installation is complete, there will be a Roll Call icon on your desktop. Double click on the icon to start the program.

Click NEXT through the installer set up wizard.
To install Roll Call on a Mac, you must first download the Mac installer file.

1. To download the Mac installer, click on the Standalone link under the Mac section.

2. Once the file (ROLLCALL13en.dmg) is downloaded, double click on it in your downloads list to mount the dmg.

3. Double click on the RollCall Installer icon from the window that comes up and choose OPEN.

4. Click Continue, then INSTALL to complete the installer process.

5. To start the program go to the Applications:Roll Call folder and double click on the Roll Call application. You may also wish to drag the application to your dock.
Install for use on a Local Area Network

If you wish to have multiple computers in your office access Roll Call, you will want to install the network version of the software. There are two components to the network version. First is the Roll Call Server software. This can be run from a Windows or Mac machine. It does not need to have a “Server OS”. The second component is the Roll Call Client software. The Client software must be installed on each computer that needs to access Roll Call.

Roll Call Server Software

Install Roll Call Server software on the machine that will house the database. This machine should be:

1. A robust computer with at least 2Gb of memory
2. Left on at all times with Roll Call Server running
3. Set to NOT go to sleep

To install Roll Call Server on a Windows machine:

2. Run the file ROLLCALL_Server13en.msi by double clicking on the file in your downloads list and choose the RUN or OPEN option.

3. The installer wizard will be presented. Click NEXT through each section.
4. When the installation is finished, there will be a black Roll Call icon on your desktop.
5. Double click on the icon to start Roll Call Server

To install Roll Call Server on a Mac machine:
   1. To download the Mac installer, click on the Server link under the Mac section.

   2. Once the file (ROLLCALL_Server13en.dmg) is downloaded, double click on it in your downloads list to mount the dmg.
   3. Double click on the Roll Call Installer icon from the window that comes up.
4. Click CONTINUE then INSTALL to complete the installation.
5. To start the program go to the Applications: Roll Call Server folder and double click on the Roll Call Server application. You may also wish to drag the application to your doc.

6. Make sure to turn off App Nap if you are using Mac OSX 10.9 (Mavericks). See https://bythebook.freshdesk.com/support/solutions/articles/1000017537-roll-call-is-running-slow-on-osx

Roll Call Client Software
Each machine on your network that requires access to Roll Call will need to have Roll Call Client software installed on their computer.

To install Roll Call Client on a Windows machine:
1. Download the software from http://www.bythebook.com/support/downloads/ by clicking on the Client link under the Windows section.
2. Run the file ROLLCALL_Client13en.msi by double clicking on the file in your downloads list.
3. The installer wizard will be presented. Click NEXT through each section.
4. When the installation is finished, there will be a blue Roll Call icon on your desktop.
5. Double click on the icon to start Roll Call Client.
To install Roll Call Client on a Mac machine:

1. To download the Mac installer, click on the Client link under the Mac section.
2. Once the file (ROLLCALL_Client13en.dmg) is downloaded, double click on it in your downloads list to mount the dmg.
3. Double click on the Roll Call Installer icon from the window that comes up.
4. Click CONTINUE then INSTALL to complete the installer process.
5. To start the program go to the Applications: Roll Call Client folder and double click on the Roll Call Client application. You may also wish to drag the application to your doc.

6. Make sure to turn off App Nap if you are using Mac OS X 10.9 (Mavericks). See https://bythebook.freshdesk.com/support/solutions/articles/1000017537-roll-call-is-running-slow-on-osx

**Install for use at Other Locations**

If your church does not have a central church office or has staff that work from home, you will want to check out these different ways that Roll Call can be configured.

**Remote Desktop Software**

Remote desktop software allows you to take over control of a remote machine as if you were sitting in front of it. Since you are controlling the machine remotely it is important to remember that only one person can use the machine at a time and anything on that machine can be accessed. Examples of remote desktop software would be logmein.com or GoToMyPC.com.

You can use remote desktop software with a standalone or network installation of Roll Call. Install the remote desktop software on a machine that has Roll Call or Roll Call Client installed.
**Internet Port Forwarding**

Internet port forwarding allows you to access Roll Call via Roll Call Client from any machine over the internet. To implement this option you will need to install Roll Call Server software on a machine that is accessible from the internet, and that has fixed or dynamic IP address. For more information on setting up this option see [http://www.bythebook.com/PortForwarding.pdf](http://www.bythebook.com/PortForwarding.pdf)

**VPN**

VPN or Virtual Private Networks create a network connection between your church LAN (local area network) and a remote computer using the internet. This can be accomplished with software or hardware. A popular option is Logmein’s Hamachi. For more information see [http://www.bythebook.com/VPN.pdf](http://www.bythebook.com/VPN.pdf)

**Cloud Hosting**

Another option is to have By the Book host your Roll Call Server software. We install Roll Call Server on our servers in the cloud. Then you install Roll Call Client on your computers that need access. For more information on this option see [http://www.bythebook.com/church-software/roll-call-on-the-cloud/](http://www.bythebook.com/church-software/roll-call-on-the-cloud/)
GETTING STARTED

Enter License

When you purchase Roll Call you will receive a license number. This license number must be entered into the system. To do this:
1. Go to the File menu on the top menu.
2. Select Enter License.
3. Enter the number you received.

[Image of the Enter License window]

Enter your license number, then press the tab key. It will fill out the allowed users and records.

You will not need to enter a license number if you are using a trial.

Enter Organization Information

You will want to enter basic information about your organization. This information is used as a return address on contribution statements.

To enter this information, click on Organization from the left side menu. Enter the following information:
1. Organization – The name of your church or ministry.
2. Address – Your organization’s mailing address.
3. More Address – The second line of your organization’s mailing address.
4. City/State/Postal Code – The city, state and zip code portion of your mailing address.
5. Country – If you organization is not based in the US, enter the country here. If you enter Canada, the contribution receipts will default to the Canadian format.
6. Phone 1 – Enter the phone number of your organization.
7. Phone 2 – Enter a secondary phone number for your organization.
8. Tax Number – This information is required if your organization is in Canada. This number will be printed on the Canadian contribution receipts.
10. Weekly Budget – This weekly budget amount will be used in budget vs actual reports.
11. Fiscal Year – Enter the month that your fiscal year begins.
12. Church Email – Enter an email address for your organization.
13. Church Website – Enter the URL for your organization’s website.
14. Click SAVE to save this information.
Click Organization, then enter basic contact information. Click SAVE.

Set up Trial for Mobile or Connect

Mobile CheckIn is an add-on product to Roll Call. It allows you to perform church check in via a browser on your mobile device such as an iPad, Galaxy tablet or Smart phone. Roll Call Connect is a membership portal into Roll Call. Using Roll Call Connect your staff can access some Roll Call information through their smart phone, tablet or computer at home through a browser. Your congregation can log in and update their profile information, give online and view their contributions.

If you would like to trial either of these products, you’ll need to activate the trial. To do that:
1. Select File>Enter License from the top menu.
2. Click on the Mobile tab.
3. Click TRY IT.
4. Click on the Connect tab.
5. Click TRY IT.
For more detailed information on the set up of Mobile CheckIn and Roll Call Connect, check out our Child Check In user manual or Roll Call Connect user manual. Video instructions are available as well at http://www.bythebook.com/church-software/tutorials/

Getting Around Roll Call

To navigate Roll Call, there are really three main things to understand. The menus allow you to get to certain areas of the program. For example, people, contributions or groups. The icons allow you to perform certain functions against the data. For example, send emails, search the database or save a set. The plus and minuses at the bottom of windows allow you to add or delete from the list.

Menus

There are 2 main menus in Roll Call. The left sidebar contains the navigator menu. This allows you to access different areas of the program. To expand or open up a menu on the left, click the plus sign (on Windows) or the arrow (on Mac). The menu items will be displayed below. Click on the function you would like to perform.

The top menu in Roll Call allows you to perform more administrative type functions. For example, you can change your password, run utilities or set preferences from these menus. To open up or expand top menu items, click on the menu name, and select the item you would like to perform.

Icons

The following are the icons that will be on the top on most search screens in Roll Call. Click on the icon to perform that action. The action will be performed against all records in the list. If you only want to perform the action for certain records, highlight those records in the list then click on the icon.

PRINT – Prints the list that is displayed on your search screen.
EMAIL – Sends an email to everyone in the list or everyone highlighted in the list.
TEXT – Sends a text to everyone in the list.
LETTERS – Creates a mail merge letter to the people in the list.
LABELS – Creates mailing labels for the people in the list.
SPREADSHEET – Displays the search list in a spreadsheet format.
ALL – Displays all records in the database.
SORT – Allows you to sort the records in a different order.
SEARCH – Allows the user to query the database and look for common characteristics.
SPECIAL – Will perform some common queries.
SETS – Will allow you to perform union and intersect comparisons of two different sets.
SAVE SET – Will allow you save a listing of records.
GET SET – Will allows you to retrieve a saved set or records.
SUBSET – Allows you to reduce a list to only the highlighted records.
PREFS – Allows you to change which fields are displayed on the search screen.

Plus and Minus Signs
You will notice a plus and minus sign below most “list” areas in the program. When you click the plus sign, it allows you to add a record. When you click the minus sign, you will be deleting a record. For example, let’s say you were in the Groups Search screen. When you click the plus sign, it brings up the window to add a group. If you hit the minus will delete the group or groups that are highlighted.

Set Color Schemes
You can customize the appearance of the Roll Call screens. To modify the appearance, go to the Edit menu at the top and select Preferences. There are five different areas on the window that can be customized.

Icon Bar Color - The icon bar is that top bar that contains the different icons or actions that can be performed. Click on the … button to get a color palette to choose your color.
**Menu Icon Color** – This is the actual color of the icon pictures. You may choose Black or White.

**Menu Icon Text Color** – This is the text beneath the icon picture. Click the … button to choose your color from the color palette.

**Background Color** – This is the background color of the various screens. Click the … button to choose your color. Click on the reverse arrow to return to the default.

**Hierarchical List Color** – This is the color of the left sidebar menu. Click the … button to choose your color. Click on the reverse arrow to return to the default.

---

**Activate User Security**

If you would like to turn on the security system in Roll Call so that all users will need to log in, you will need to give Administrator and Director a password. To do this:

1. Expand the Admin menu on the left sidebar menu.
2. Click on User Security.
3. Highlight Director.
4. Click the CHANGE PASSWORD button. Assign a password.
5. Click on Administrator.
6. Click the CHANGE PASSWORD button and assign a password.
To add additional usernames, click on the plus sign in the lower left of the window. A window will pop up to enter the username and default password. To create a regular user, mark the option for Standard. To create a user that will man a check in station, choose the option for Check In (Client). Click OK to save this user. Next mark all the areas that they will be allowed to access.

Email
To send emails from Roll Call, each user will need to set up their outgoing email host information. Roll Call works with most email providers. However, there are some providers that require a double handshake and those providers do not work with Roll Call. Yahoo and Hotmail are two examples of outgoing email providers that do not work with Roll Call. Gmail works great but depending on the type of account, you may be limited as to the number of emails you can send in one day.

To configure the email settings, do the following:
1. Expand the Home menu on the left sidebar.
2. Select My Email Settings.
3. Choose your preference for Plain Text or HTML emails.
4. Enter the Return Address. This is the “from” email address. If a recipient replies to the email, this is the email address it will go to.
5. Enter the Mail Host Name. This is the Outgoing SMTP mail address required by your email provider.
6. Enter the Username and Password for this email account if your provider requires authentication.
7. Mark the box for the SSL if your provider requires SSL encryption.
8. Enter the Port Number, if your provider requires a specific port number.
9. Enter the No Emails/Minute. Your provider may throttle the number of emails that you can send per minute. If so, enter that number here.
10. Click SAVE to save these settings.

Enter your outgoing email host information. Click SAVE.
ADDING FAMILIES IN ROLL CALL

Import contact information

You can import contact information into Roll Call from a tab delimited text file. If you are converting to Roll Call from a different program you will need to export the data into a format that can be opened in a spreadsheet, like Excel. Open the spreadsheet, and save it in the file format “tab delimited text” file (*.txt).

There are four different formats accepted for import. Each are described in more detail below.

One Row Per Person Custom

The one row per person means that there will be one row in the spreadsheet for each person in the family. If you have a family of four, there would be one row with the dad’s information including address. The second row would be the mom’s information including the address. The third row would be child1’s information. And the fourth row would be child2’s information. We pull the family together based on a match of the address information.

The custom format means that you can have the columns in any order you wish. The import wizard will allow you to map the columns in your file to the fields in Roll Call. This format also allows you to pull in custom fields.

To import this type of file, do the following:

1. Expand the People menu on the left sidebar
2. Click on Import
3. Choose the One Row Per Person Custom Format
4. Click NEXT
5. Choose a Default Association. This is used if the record doesn’t have an association value. Association is the membership category (how are they involved in your church)
6. Choose a Default Family Position. This is used if the record doesn’t have this value. We allow Husband, Wife, Adult, Youth, Child and Other.
7. Enter the line number where the data begins in your file. For example, if you had headers in your file, the data probably starts on line 2. If you don’t have any headers, the data probably starts on line 1.
8. Click LOAD FILE and navigate to the file you want to import. Highlight it, then click OPEN.
9. In the lower section you will need to map the columns from your file to the fields in Roll Call. Click on the header [Skip] and choose from the list of available fields.
10. Once you’ve mapped all the fields, click FINISH in the lower right to process the import.

Enter the values that will be used for these fields if a value isn't present in the file.

Click LOAD FILE to bring in the data from your spreadsheet.
One Row Per Family Custom

In this file format, there will only be one row in the spreadsheet for each family unit. There will be a column for family name, husband’s name, wife’s name, child1 name, child2 name, etc.

The custom format means that you can have the columns in any order you wish. The import wizard will allow you to map the columns in your file to the fields in Roll Call. This format also allows you to pull in custom fields.

To import this type of file, do the following:
1. Expand the People menu on the left sidebar
2. Click on Import
3. Choose the One Row Per Person Custom Format
4. Click NEXT
5. Choose a Default Association. This is used if the record doesn’t have an association value. Association is the membership category (how are they involved in your church)
6. Choose a Default Family Position. This is used if the record doesn’t have this value. We allow Husband, Wife, Adult, Youth, Child and Other.
7. Enter the line number where the data begins in your file. For example, if you had headers in your file, the data probably starts on line 2. If you don’t have any headers, the data probably starts on line 1.
8. Click LOAD FILE and navigate to the file you want to import. Highlight it, then click OPEN.
9. In the lower section you will need to map the columns from your file to the fields in Roll Call. Click on the header [Skip] and choose from the list of available fields.
10. Once you’ve mapped all the fields, click FINISH in the lower right to process the import.
Use Add a Family (Basic)

The Add a Family screen is a great way to get the basic information about a family entered into Roll Call quickly. To use this screen:

1. Expand the People menu.
2. Click on Add a Family

Enter Family Information

The top section of this screen is where you enter the common family information. Enter the following pieces of information:

1. **Type** - Choose either Family or Organization.
2. **Last Name** – Enter the last name for the family, or organization name if you are entering a business.
3. **Primary Phone** – Enter the home phone number for the family.
4. **Unlisted** – Mark this checkbox if the family wants the home phones unlisted.
5. **Alt Phone** – Enter a second home phone number if applicable for the family.
6. **Street** – Enter address line 1 of the family’s address.
7. **More Address** – Enter address line 2 if applicable. Typically an apartment or suite number.
8. **City** – Enter the city portion of the family’s address.
9. **State** – Enter the state portion of the family’s address.
10. **Postal Code** – The zip code or postal code portion of the family’s address.
11. **Do Not Send Mail** – Mark this box if the family does not want to receive mail from your organization.
12. **Unlisted Address** – Mark this box if the family wants their address unlisted.
13. **Family Email** – Enter the email address that should be used when sending “family” emails.
14. **Shepherd Area** – Indicate the person, deacon, or zone that is responsible for this family.
Enter Family Members Information

Use the lower section to enter the information for each family member. Use the plus sign in the lower left corner to open up a row to add another family member.

1. **Family Position** - Choose Husband, Wife, Adult, Youth or Child to indicate their family position.
2. **First Name** – Enter the first name of the family member.
3. **Last Name** – If the family member has a different last name, enter it here.
4. **Date of Birth** – Enter the family member’s birthday. Make sure to enter a 4 digit year.
5. **Gender** – Select the appropriate gender for the family member.
6. **Association** – Select the appropriate association or membership status for this family member.
7. **Cell Phone** – Enter the cell phone number for this family member if they have one. Enter the last name for the family, or organization name if you are entering a business.
8. **Marital Status** – Indicate the marital status for this family member.
9. **Grade** – If the family member is in elementary, middle or high school, enter their grade. Values accepted are K – 12.

Once you’ve completed entering the information for a family, click:

1. **SAVE & CLOSE** to save the information and close the window.
2. **SAVE & VIEW** to save the information and go to the Family Details screen.
3. **SAVE & NEW** to save the information and clear the window.
4. **CANCEL** to close the window without saving the information.
LOOKING UP PEOPLE INFORMATION

Search Profiles
Finding people in your database can be accomplished in a variety of ways.
1. Use the Find By area to search by common fields.
2. Use the Search box to find folks by Last Name or Keyword.
3. Use the Query Editor to find folks by other fields

Find By
The most common characteristics that people would want to search on can be found in the Find By drop down box. These fields are Last Name, First Name, Association, Family Position, Email, Street, City, Postal Code, Family Number, Badge No, Envelope Number and Keyword. To find a person or listing of people using this method, do the following:
1. Expand the People menu.
2. Click on Search Profiles.
3. Select field you’ll be using as the find by criteria.
4. Enter the Value in the field to the right of the drop down box.
5. As you enter the field, the results will be displayed below in the people list.

Let’s take a look at an example where you are looking for a specific individual. You would probably find them by their last name. From the Search Profiles window:
1. Leave Last Name selected in the Find by drop down.
2. Enter the last name to the right in the blank field.
3. The results show everyone with that last name.
4. Double click on the specific individual you are looking for.

In our next example, let’s say you are looking for a list of all your members. From the Search Profiles window:
1. Change the Find By drop down to Association.
2. Select Member from the field to the right.
3. The results will show a list of all your members.
To find all your members, choose Association, then select Member.

Search Field
The Search Field in the upper right corner can be used to find people based on their last name or keywords. To find people using this method, do the following:

1. Expand the People menu.
2. Click on Search Profiles.
3. Enter the Name or Keyword in the search box.
4. Press the ENTER key on your keyboard to get your results.

Let's look at an example where we'd like to get a list of all the people in our database that have the keyword “Mechanic”. To accomplish this:

1. Expand the People menu.
2. Click on Search Profiles.
3. Enter Mechanic in Search Box.
4. Press ENTER key on keyboard.
Customize Profile Window

Each Roll Call user can customize which fields are displayed in the Search Profiles window. To select or de-select fields for display, do the following:

1. Expand the People menu on the left sidebar.
2. Click on Search Profiles.
3. Click on the PREFS icon on the top.
4. Double click on any of the fields on the left to move them to the selected column.
5. To remove a field from the window, double click on it from the selected column to remove it.
6. Click SAVE & CLOSE button to save your preferences.
ENTERING CONTRIBUTIONS

Giving Funds

Before you can begin entering contributions in Roll Call, the giving funds must be defined. The giving funds are the designations that people can contribute to. A new Roll Call database will contain one giving fund, “General”. To add giving funds, do the following:

1. Expand the Contributions menu on the left side bar.
2. Click on Giving Funds
3. Click on the plus sign in the lower left of the Giving Fund summary window.
4. Enter the Fund name. This is the name that will be in the drop down box to select designations from the Enter Contributions screen.
5. Enter the associated Account Number. This number is not mandatory.
6. If this giving fund is no longer valid or used, check the “Inactive” box.
7. If this fund is not tax deductible, mark the box for “Not on Receipt”. If this box is checked any monies given to this fund will not be printed on the year-end tax statement.
8. Mark the Connect box, if you will be allowing online giving through Roll Call Connect and would like this fund to be included in the list of available funds.
9. Mark Include in Budget, if you’d like any monies given to this fund to be reported as “budgeted” giving in Roll Call Connect reports.
10. Select the Fund Color. This color will represent the fund in pie charts showing total giving. Click on the “…” and click on color you’d like to use.
11. The GL Fund is used to map the giving funds to your accounting system. For example if you have a giving fund of “Tithes & Offerings” and you want that to map to the General Income Fund in your accounting system, you would enter General Income as the GL Fund. If you are importing into Quickbooks and your fund is a sub-account, enter the Account, then a colon then the sub account name, for example, Operating Income:General.
12. The GL Account Number is the account number to map to MYOB accounting.
13. GL Key is the number to map to Roll Call’s accounting system.
At a minimum you must enter the fund name.

Envelope Numbers
If your ministry uses envelope numbers to identify donors, you’ll want to assign those numbers before you begin entering contributions.

To manually enter envelope numbers, do the following:
1. Expand the People menu on the left side bar.
2. Expand the Bulk changes menu.
3. Click on Envelopes.
4. Place your cursor in the Current Env No. column to the right of the person you wish to assign a number. Enter the appropriate number.
5. Use the ENTER key on your keyboard to move down the list.
If you would like the system to automatically assign envelope numbers, do the following:
1. Expand the People menu on the left side bar.
2. Expand the Bulk changes menu.
3. Click on Envelopes.
4. Use the SEARCH icon to retrieve the list of people that should be assigned envelope numbers. For example, if you’d like to give all your members and regular attenders envelope numbers, click on the Associations tab, and click on Member and Regular attender to move them to the selected column. Click QUERY in the lower right to return a list of those folks.
5. Click on the ASSIGN button in the lower right.
6. Mark the option to Auto Assign Envelope Numbers. Enter the starting number.
7. Click the SAVE & CLOSE button to assign those numbers and close the window.

If you would re-assign envelope numbers each year, you can begin entering next years envelope number now. At the beginning of the new year, you can make the switch. Here’s how:
1. Expand the People menu on the left side bar.
2. Expand the Bulk changes menu.
3. Click on Envelopes.
4. Place your cursor in the Next Env No. column to the right of the person you wish to assign a number. Enter the appropriate number.
5. Use the ENTER key on your keyboard to move down the list.
6. When you are ready to switch and use the “next” numbers, click on the ASSIGN button in the lower right.
7. Mark the option for New Year.
8. Click SAVE & CLOSE to make the envelope number changes and close the current window.

In the assign window, mark the option for “New Year”, click SAVE & CLOSE.

**Batches**

All contributions are entered in Roll Call through a batch. A batch is nothing more than a grouping of contributions. Typically, users will enter all the giving for a deposit in a batch.

Because of the integration with Accounting, batches must be either Cash or Non-Cash. Cash contributions include all cash, checks, credit cards and ACH type transactions. Non-Cash batches contain property gifts, things that cannot be deposited into the bank.

To create a batch, do the following:
1. Expand the Contributions menu on the left side bar.
2. Click on Add Batch.

Enter the following information:
1. *Batch Date* – This date will become the default for all contributions entered in this batch.
2. *Description* – Enter a qualifying description of this batch. Especially if you will have multiple batches for the same day. Maybe this group of contributions is for the 9 a.m. service. You could enter “9 a.m. service” as the description.
3. *Anonymous Cash* – Enter the amount of loose cash that was in the offering. This is cash that cannot be associated with any specific donor.
4. *Cash Fund* – Enter the fund that the anonymous cash should be designated to.
5. *Default Fund* – Enter the fund that you’d like all contributions in this batch to default to. This doesn’t mean that you can’t have other funds included in this batch. This is only used as a default. If the majority of the giving is for Tithes & Offerings… make “Tithes & Offerings” the default fund.
6. *Batch Type* – Select Cash for batches that will contain cash, checks, credit card, online, ACH type contributions. Select Non-Cash for property or in-kind gifts.
7. *Asset Fund* – This is the fund to map non-cash gifts to the appropriate asset fund in your accounting system.
8. *Batch Control Count* – This field can be used as a control count for the number of entries expected in this batch. This field is not required, but by using it you may be able to catch
Enter batch date, description anonymous cash and default fund.

Click plus sign to begin entering individual contributions.

any data entry errors. If the Batch Count and Batch Control Count do not match, they will be displayed in red.

9. Batch Control Total – This field can be used as a control total for the amount expected in this batch. This field is not required, but by using it you may be able to catch any data entry errors. If the Batch Total and Batch Control Total do not match, they will be displayed in red.

10. To begin entering individual contributions, click on the plus sign in the lower left corner.

Enter Contributions from Batch Window

To begin entering cash or cash equivalent contributions, you will need to create a batch. To create a new batch, do the following:

1. Expand the Contributions menu.
2. Click on Add Batch
3. Enter the batch header information as described in the previous section.
4. Click on the plus sign in lower left to begin entering contributions.

To enter new contributions to an existing batch, find that batch by:

1. Expand the Contributions menu.
2. Click on Search by Batch.
3. Change the Find By Criteria to “Date”.
4. Select the date of the batch you are adding to.
5. Double click on the appropriate record
6. Click on the plus sign in the lower left to begin entering new contributions.

Basic

To record a donation, enter the following information:

1. Donor Name or Envelope Number. When recording contributions, the first thing you need to do is identify the donor. If you use envelope numbers, enter the number and press tab. The donor information will be displayed on the right side. If you use name to identify the donor, enter the last name then press tab. You will be taken to the Select a Person window. You can further reduce the names in the list by typing the first few characters of the first name. You can double click on the name to select it, or if it is already highlighted, press Enter on your keyboard.
2. Date – the donation date will default to the same as the batch date. If you’d like to change
this date you can enter it here.
3. **Total Amount** – Enter the amount of the contribution.
4. **Check Number** - If the contribution was a check, you may enter the check number in this field.
5. **Donation Type** – If you entered a check number, this will automatically change to check. Or you can select cash, check, credit card etc. from the drop down list of values.
6. **Designation** – Use the drop down list of values to select the fund that these monies were given to.

Click **SAVE & NEW** to enter a new contribution in this batch. Click **SAVE & CLOSE** to save the current contribution and return to Batch window.

**Split**

A split donation is a single contribution that needs to be designated to 2 or more funds. To record a split donation, enter the following information:
1. **Donor Name or Envelope Number.** When recording contributions, the first thing you need to do is identify the donor. If you use envelope numbers, enter the number and press tab. The donor information will be displayed on the right side. If you use name to identify the donor, enter the last name then press tab. You will be taken to the Select a Person window. You can further reduce the names in the list by typing the first few characters of the first name. You can double click on the name to select it, or if it is already highlighted, press Enter on your keyboard.
2. **Date** – the donation date will default to the same as the batch date. If you’d like to change this date you can enter it here.
3. **Total Amount** – Enter the amount of the contribution.
4. **Check Number** - If the contribution was a check, you may enter the check number in this field.
5. **Donation Type** – If you entered a check number, this will automatically change to check. Or you can select cash, check, credit card etc. from the drop down list of values.
6. **Amount** – Notice the amount and designation fields underneath the contribution header information. Place your cursor in the lower amount field, and reduce the amount so that is matches the amount to be designated to the first fund. Press TAB. Note a 2nd line is created with the remainder, so you can designated that amount.
7. **Designation** – Use the drop down list of values to select the fund that these monies were given to.
Highlight amount in the middle section.

Reduce the amount and press the TAB key. A new line with remainder will open up.

Click SAVE & NEW to enter a new contribution in this batch. Click SAVE & CLOSE to save the current contribution and return to the Batch window.

**Connect to Pledge**

When you are entering a contribution for an individual that has made a pledge, the pledge will be listed near the bottom of the screen on the pledges tab.

If you enter a contribution and designate it to the fund that the donor pledged to, the contribution and pledge should be automatically connected. Notice the Pledge ID to the right of the designation and description fields. If the pledge ID is listed here, you know the contribution is connected. If you need to change which pledge is connected to this contribution, use the Pledge ID drop down to change the connection.
Quid Pro Quo

Quid Pro Quo contributions are contributions where something of value was given. An example of quid pro quo would be your youth group is selling CD’s as a fundraiser. The CD’s are worth $15. If someone gives the youth group $50 for the CD, you’d want to enter that as a Quid Pro Quo contribution.

To enter this transaction, go to the Donation Entry window and enter the following information:

1. **Donor Name or Envelope Number**. When recording contributions, the first thing you need to do is identify the donor. If you use envelope numbers, enter the number and press tab. The donor information will be displayed on the right side. If you use name to identify the donor, enter the last name then press tab. You will be taken to the Select a Person window. You can further reduce the names in the list by typing the first few characters of the first name. You can double click on the name to select it, or if it is already highlighted, press Enter on your keyboard.

2. **Date** – the donation date will default to the same as the batch date. If you’d like to change this date you can enter it here.

3. **Total Amount** – Enter the amount of contribution. In the above example this would be the $50.00.

4. **Check Number** - If the contribution was a check, you may enter the check number in this field.

5. **Donation Type** – If you entered a check number, this will automatically change to check. Or you can select cash, check, credit card etc. from the drop down list of values.

6. **Designation** – Use the drop down list of values to select the fund that these monies were given to.

7. Click on the Quid Pro Quo tab. Select the item that was given. Enter the value of the item given. In this example the item was the CD. The value was $15.

Click SAVE & NEW to enter a new contribution in this batch. Click SAVE & CLOSE to save the current contribution and return to the Batch window.
Enter Contributions using Quick Add

The Quick Add screen is a simplified data entry screen for contributions. It also allows multiple users to enter contributions into a single batch. All Quick Add contributions must be entered for an existing batch. To use the Quick Add, do the following:

1. Expand the Contributions menu.
2. Click on Quick Add.
3. Use the drop down box to select the batch.
4. If the batch does not exist, click the plus sign to the right to create the batch. Enter the following information.
   a. **Batch Date** – This date will become the default for all contributions entered in this batch.
   b. **Description** – Enter a qualifying description of this batch. Especially if you will have multiple batches for the same day. Maybe this group of contributions is for the 9 a.m. service. You could enter “9 a.m. service” as the description.
c. **Anonymous Cash** – Enter the amount of loose cash that was in the offering. This is cash that cannot be associated with any specific donor.

d. **Cash Fund** – Enter the fund that the anonymous cash should be designated to.

e. **Default Fund** – Enter the fund that you’d like all contributions in this batch to default to. This doesn’t mean that you can’t have other funds included in this batch. This is only used as a default. If the majority of the giving is for Tithes & Offerings… make “Tithes & Offerings” the default fund.

f. **Batch Type** – Select Cash for batches that will contain cash, checks, credit card, online, ACH type contributions. Select Non-Cash for property or in-kind gifts.

g. **Asset Fund** – This is the fund to map non-cash gifts to the appropriate asset fund in your accounting system.

![Batch Details](image1.png)

If the batch does not exist, click plus sign, then enter batch details here.

**Line at a Time**

1. Once you select a batch, your cursor will be placed in the **Donor** field. Identify the donor by entering a last name, envelope number or scanning the check.

2. Press TAB on your keyboard. If you’ve entered a last name to identify the donor, a Select Person window will be returned. Select the appropriate donor.

![Select Person](image2.png)

Enter the last name of the donor, then press TAB. Pick from the list.

3. Enter the **Amount** of the contribution. Press TAB

4. If the contribution was a check, you may enter the **Check** number in this field. Press TAB.

5. If you entered a check number, the **Donation Type** will automatically change to check. Or you can select cash, check, credit card etc. from the drop down list of values. Press TAB.

6. Use the drop down list of values to select the **Fund** that these monies were given to.

![Donation Details](image3.png)

Enter the last name of the donor, then press TAB. Pick from the list.
7. If the contribution needs to be split between multiple funds, select Split from the drop down list.
   a. A new window will be displayed to allow you to split across multiple funds.
   b. Reduce the highlighted amount to the amount for the first fund.
   c. Press TAB.
   d. A new line will be opened up.
   e. Choose the fund for the second line.
   f. Click SAVE & CLOSE when you have completed entering the split information.

8. The Account number will be populated based on the fund you selected in the previous step. Press TAB.
9. Enter any Comments.
10. Press TAB to enter another

Click SAVE & CLOSE when you are done entering contributions for this batch. Click SAVE & NEW to save these contributions in this batch and begin entering into a new batch. Click CANCEL to discard any changes.
To pre-populate the list with all adults, mark this box.

Simply enter amount to the right of the donor's name. Change designation if necessary.

With Names Pre-Populated
1. Once you select a batch, click on the List Adults checkbox. This will populate the screen with the names of all the adults in your database.
2. Place your cursor in the Amount field to the right of the appropriate donor. Enter the amount.
3. Press TAB on your keyboard.
4. Enter the Check Number if the gift was a check.
5. Press TAB to move into the next field.
6. If you entered a check number, the Donation Type will automatically change to check. Or you can select cash, check, credit card etc. from the drop down list of values.
7. Use the drop down list of values to select the Fund that these monies were given to. Press TAB.
8. The Account number will be populated based on the fund you selected in the previous step. Press TAB.
9. Enter any Comments.
10. Press TAB to enter another.

Click SAVE & CLOSE when you are done entering contributions for this batch. Click SAVE & NEW to save these contributions in this batch and begin entering into a new batch. Click CANCEL to discard any changes.
MANAGING GROUPS

Group Hierarchy
Groups are defined by the following classifications:
1. Campus. If your church has multiple campuses or locations with different groups and classes at each site, you may want to define your groups at the campus level. The campus indicates which site or location the group stems from.
2. Group Type. The next level in the hierarchy is group type. This tells us the general classification of the group. Is the group a committee, a small group, a Sunday school class or a youth group? Your church defines these group types or classifications. Roll Call’s default group types are Group and Class.
3. Department. The next level in the hierarchy is the department. The department is the ministry area within your church that is responsible for overseeing the group. Children’s Ministry, Congregational Care, Youth and Music are some common departments.
4. Status. The status indicates whether the group is active or inactive.

Every group that is defined in Roll Call must be assigned a Group Type, Department, Name and Status. Status always defaults to active.

Group Custom Fields

Group custom fields
You may want to define custom fields for groups. These fields allow you to customize the information you capture for your groups. You can set up default custom field titles per group type. For example, let’s say we have a “small group”, group type. For each small group we need to know an emergency contact, what they are studying, where they meet, and if they are accepting new members.

To create these group custom field titles:
1. Select RollCall>Preferences from the top menu if you are on a Mac OR select Edit>Preferences if you are on a Windows machine.
2. Click on the Group Custom on the left sidebar.
3. Select the Group Type, “small group” in the upper left drop down box.

Select Group Custom, then choose type. Enter field names.
4. Enter “Emergency Contact as Cstm 1.
5. Enter “Studying” as Cstm 2.
6. Enter “Meeting Location” as Cstm 3.
7. Enter “Accepting New Members” as Chk1.

Now each time you create a small group, there will be fields available to enter Emergency Contact, Studying, Meeting Location, and Accepting New Members. You can customize each group further by modifying the custom field titles for a specific group.

**Group membership custom fields**

Like group custom fields, you may want to define custom fields to track specific information for each member in a group.

You can set up default custom field titles per group type. For this example, let’s say we need to know certain information about the worship team members. We’d create a group type of “worship team”. For each of our worship team members we need to know what instrument they play, can they read music, what is their voice type and how many times per month are they available.

To create these group member custom field titles:
1. On a Mac Select RollCall>Preferences from the top menu. On a Windows machine, select Edit>Preferences from the top menu.
2. Click on the Member Custom on the left sidebar.
3. Select the Group Type, “worship team” in the upper left drop down box.
4. Enter “Instrument” as Cstm 1.
5. Enter “Voice Type” as Cstm 2.
7. Enter “Read Music” as Chk1.

Now each time you create a worship team group, there will be membership fields available to enter Instrument, Voice Type, Days Available, and Read Music. You can further customize each group by modifying the custom field titles for group members.
Add a Group

Enter general information
There are several options for getting to the Add a Group window:
1. Expand the Groups menu and click Add a Group OR
2. Expand the Groups menu and click Search. Click on the plus sign in the lower left to add a new group.

Once you are in the screen to add the group:
1. Enter the values for Campus (if applicable), Group Type, Department and Status.
2. Enter the Group Name.

3. If the group has a leader, enter the last name in the Leader field. Press tab to view a list of the folks with that last name. Select from the list.
4. If the group has a co-leader, enter the last name in the Co-Leader field. Press tab to view a list of the folks with that last name. Select from the list.

5. Select the Frequency to indicate if the group meets weekly or randomly.
6. The field “When does this meet?” is the information that is displayed in Roll Call Connect for when the group meets. PLEASE NOTE: This information is not used by the check in system. You need to enter sessions for child check in to work properly.
Enter general information about class.

7. Enter the Location of the group if applicable.
8. Enter the Address that will be displayed in Roll Call Connect for the meeting location.
9. The Start Date will default to today’s date. You may change it if you’d like.
10. Enter the End Date if you know the last day this group will meet. Keep in mind that on this date the system will change that group to inactive.

Click SAVE & CLOSE to save the information and return to the Search screen. Click SAVE & NEW to save the information and enter a new group.

**Add Members**

To enroll people into the group, press the Members tab. From within the members tab:

1. Click the plus sign in the lower left of the window. A new window will be displayed for you to enter the Last Name and First Name (or portion of the last name) of the person you want to enroll.
2. Select the appropriate person to enroll in the group.
3. Tab across to enter any of the custom field data for this person. If you need to define the membership custom field names, click CHANGE TITLES and enter the name of the data you’d like to capture.
Create sessions

Next, you’ll want to indicate which days and at what times the group meets. The meeting days and times are called sessions in Roll Call. A group that meets weekly can have an unlimited number of sessions. A group that meets randomly does not have any sessions defined.

To create a session:
1. Click on the session tab, if sessions are not currently displayed.
2. Click on the plus sign in the lower left. A row will be displayed, with a default of Sunday and time of 12 a.m.
3. Use the Day of Week drop down box to select the appropriate day.
4. Enter the Start Time.
5. Enter the End Time.
6. Place your cursor under Room and double click to enter the room number of this group meeting.

Enter values for group custom information

If you set up custom fields (under Preferences) for this group type, you can enter the data in the Custom (1) and Custom (2) tab. Let’s look at our previous example of a small group. We had set up custom fields to record emergency contact, studying, meeting location and accepting new members.

To enter the custom data for this group:
1. Press the Custom(1) tab. The fields on this tab are the text fields.
2. Enter values for each of the custom fields Emergency Contact, Studying and Meeting Location.
3. Press the Custom (2) tab. The fields on this tab are the check boxes and dates.
4. Check the box for Accepting New Members, if the answer is Yes.

If no custom fields are defined for this group type, you can define them for this specific group if you’d like. Click on the CHANGE TITLES button to enter the name of the data you’d like to capture. When you are done entering the titles, click CHANGE DATA to enter the actual data for that field.
Enter any custom information on this tab.

Preferences

Use the preferences tab in the group screen to set your attendance roster preferences, check in label preferences and grade/age range preferences.

Mark the following options for your Attendance Roster:

1. **Birth Date or Special Needs** - Choose which field you’d like displayed on the roster. You may only choose one.
2. **Show Year of Birth** – Mark this box if you choose to include birthday and you want to display the full birthdate.
3. **Show Age** – Mark this box if you’d like to display the child’s age.
4. **Show Family No.** – Mark this box if you’d like to show the group member’s family number.
5. **List Parents** – If you would like to display the parent’s names for the group member.

Make your selections for the attendance roster.
Enter the grade range or age range that is applicable for this group. This information will be used to recommend classes in the child check in system. It will also be used in the Graduation utility.

1. *From Age (Years & Months)* - Enter the beginning age that a child is allowed in this class/group.
2. *To Age (Years & Months)* – Enter the oldest age that a child is allowed in this class/group.
3. *From Grade* – Enter the beginning grade that a child is allowed in this class/group.
4. *To Grade* – Enter the last grade that a child is allowed in this class/group.

Enter the following check in system preferences for this specific class or group. *From Age (Years & Months)* - Enter the beginning age that a child is allowed in this class/group.

1. *Number of Labels* – Enter the number of nametags you’d like to print when a person checks into this group.
2. *Print Tag on Check Out* – Mark this box if you’d like to print a name tag when the child checks out of this class.
RUNNING REPORTS

There are quite a few standard reports that can be run to outline people type information. To run a report that has to do with contact information, envelope numbers, birthdays, visitations or background checks, do the following:

1. Expand the People Menu.
2. Click on Reports.
3. Highlight the report you’d like to run.

Directions for each specific report are outlined below.

**My Reports**

My reports is a great way to build custom reports. You select who you’d like included in the report and what information should be listed in the report. These reports can be saved. To create one, do the following:

1. From the Reports window, select My Reports.
2. On the Criteria tab, select who to include on the report. The Run For drop down allows you to select Everyone, Associations, Groups, Keywords etc.
3. Once you’ve chosen your Run For category, choose the specific values. For example, if you want a list of all your Members and Regular Attenders, you would choose to Run For Associations. Then you would click over Members and Regular Attenders to the Selected column.

4. From the Columns tab, select the information or data you’d like included on the report. Double click on a field name to move it to the Selected column.
5. To sort on a certain value, double click on the field from the Selected column to move it to the Sort column.
6. In the lower right section, choose to list individuals or families. If you choose families only one line per family will be listed.
7. Choose your output format. Do you want to create a csv or text file or would you like to view the report to print it.
8. Click GENERATE to run the report.
From the columns tab, select the fields you’d like displayed in the report.

Report results. Notice the buttons on the right.

If you chose to print/spreadsheet the report, the results are displayed in the main section of the Report Output Window. Use the scroll bars on the bottom and to the right of the report to scroll up and down; left and right.

On the right side of the Report Output Window are actions that can be performed for the report.

1. Click on PAGE SETUP to set your printer and paper size and orientation.
2. Click on PREVIEW to preview the output. Do not send the report to the printer from this preview window, it will only send the first page to the printer.
3. To change fonts, column sizes etc., click CUSTOMIZE. The report will be displayed in 4D View, Roll Call’s spreadsheet program. Make your modifications here.
4. Click on PRINT to send the report to the printer.
5. Click ZOOM IN to make the font in the report larger on your screen.
6. Click ZOOM OUT to make the report font smaller on your screen.
7. To save the report as a tab delimited file or html document, click SAVE. Enter the location and name of the file to be saved.
8. Click SAVE SET to save the list of people for use later within Roll Call.
9. Click CREATE LABELS to create address labels (3 across 10 down size) for this list of people.
10. Click WRITE LETTER, to compose a mail merge letter to this list of people.
11. Click EMAIL to send an email to this list people or to email the report to another individual. If you choose Email people, it will send the email to everyone listed in the report.
