RX REFRESH

AEROSOL REPLACEMENT SYSTEM

The RX Refresh[®] system is your alternative to expensive and wasteful aerosol cans. RX Refresh[®] is a concentrated space deodorizer that is designed to work with a new type of trigger sprayer and specially designed to produce a greater parts per million spray than conventional aerosol cans. Just one quart bottle of RX Refresh[®] can make over 32 refills for the RX Refresh[®] sprayer, a cost savings of over 600% compared to aerosols.

Our trigger sprayer also provides a controlled release of product per pump allowing further cost savings with the ability to measure application amounts. The RX Refresh[®] system comes in four fragrances, Blue Skies, Mountain Mist, Herbal Fusion and Aquatic Mist, making it an ideal space spray for hotel rooms, homes, kitchens, living rooms and other living spaces. All scents contain Airicide[®] Odor Counteractant.

Description

RX Refresh[®] will neutralize foul odors leaving the area smelling fresh and clean. With its state of the art sprayer, RX Refresh[®] is able to project a calculated amount of air freshener into a fine mist with every trigger pull. Available in Mountain Mist, Blue Sky, Herbal Fusion and Aquatic Mist scents.

Uses

Use as a space spray eliminate foul odors in your kitchen, living room, bedroom, hotel rooms, offices, hallways, or anywhere there is a foul odor present. Safe to use on draperies, clothing, linens, bed sheets and other fabrics.

RX REFRESH AEROSOL REPLACEMENT SYSTEM

Benefits

- Same, if not greater parts, per million than most aerosol cans.
- One bottle of RX Refresh® Concentrate fills 32 RX Refresh® Sprayers.
- A cost per oz of \$0.095, around half the cost of comparable aerosols and space deodorizers. (RX Refresh sprayer)
- Non-Aerosol means no propellants, making RX Refresh® safer for the environment.
- Safe to use on all fabrics.
- Concentrate bottles have a built in measuring device allowing for quick and easy dispensing into RX Refresh® Sprayers.
- Each pump of the RX Refresh® sprayer delivers a precise, measurable amount of product.
- Number of refills per 32 ounce container of RX Refresh® - 32
- Number of metered sprays per RX Refresh® Sprayer - 332
- Number of metered sprays per RX Refresh® Concentrate - 10,624
- RX Refresh RTU - number of sprays per quart - 900 - 1000

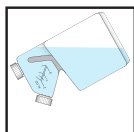

Directions

Safe on virtually all washable fabrics. Test on an out of sight spot to ensure color fastness.

1.) Measure correct amount of concentrate using the measuring device on the concentrate bottle.

Make sure measuring marks are facing you.

Tilt bottle to fill the top reservoir.

Tilt the bottle right side up.

Check to see if you are at your desired dilution. (1oz.)

Remove (left) cap and pour.

2.) Pour concentrate into the RX Refresh® Spray bottle and fill rest of the sprayer with water.

RX Refresh RTU - Adjust sprayer to mist or stream, spray desired amount in the air, on source of foul odors and soft surfaces not harmed by water.
