

Professional Grade
SURFACE
Odor Counteractant

FORMULA

#15

Contains Airicide®

DISINFECTANT CLEANER AND ODOR COUNTERACTANT

Cleaner - Deodorizer - Disinfectant

RX15 has always been germicidally effective against the Gram positive and Gram negative test organisms required to be killed for registration by the EPA as a disinfectant cleaner, but it has not been recommended for use in hospitals because it did not kill the hospital critical germ *Pseudomonas aeruginosa*. Without sacrificing excellent cleaning and deodorizing, the germicidal ability of RX15 has been greatly improved. It is

now proven to kill *Pseudomonas aeruginosa* and Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS).

In addition, RX15 is effective against MRSA and Influenza A viruses. Use RX15 in bathrooms, kitchens, offices, nursing homes, locker rooms, showers, doctors offices and schools.

Description

RX15 is a combination cleaner, disinfectant and odor counteractant that aids in preventing the spread of pathogenic and putrefactive bacteria, viruses and fungi on hard inanimate surfaces. It may be used on any surface not harmed by water alone. Contains 100% synthetic surfactants for superior wetting and soil suspension and is free rinsing in the hardest water. RX15 also contains AIRICIDE® for lasting odor control.

Uses

For routine and more difficult cleaning with odor control in hospitals, nursing homes, day care centers, schools, hotels, motels, prisons, kennels, office buildings, veterinary clinics, etc.

DISINFECTANT CLEANER AND ODOR COUNTERACTANT

Cleaner - Deodorizer - Disinfectant

Benefits

BETTER, MORE ECONOMICAL CLEANING: RX15 delivers a higher percentage of active cleaning ingredients and AIRICIDE® at its germicidal use-dilution. The EPA considers the effectiveness of a disinfectant cleaner on its ability to kill germs, not how well it cleans. With the most expensive ingredients being the germicides, it is very costly when a product doesn't clean well and one has to use more to clean than may be needed to disinfect.

TARGETED DISINFECTION: In addition to killing the key test organisms that the EPA considers important, RX15 kills Pseudomonas aeruginosa (for use in hospitals) and Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS).

DEODORIZES DIFFERENTLY: RX15 eliminates foul odors several ways. As with many disinfectants, its quaternary ammonium compounds kill bacteria that cause some foul odors, and RX15 also leaves a pleasant aroma, but its extra benefit is that it contains AIRICIDE® to merge with odorous molecules in the air to change their size and shape, so they are not perceived as the foul odors they would have been.

MORE ODOR COUNTERACTANTS: At its use-dilution for disinfecting, RX15 delivers a much greater amount of AIRICIDE® than in other Airx germicidal cleaners as shown by the graph below.

HARD WATER TOLERANCE: 100% non-ionic, sequestered base to prevent leaving a film and to remove film from previously used cleaners.

Directions

FOR CLEANING AND DEODORIZING: Use two to four ounces per gallon of water.

GENERAL CLEANING, DISINFECTING AND DEODORIZING: Use four ounces per gallon of water. Thoroughly wet all surfaces. Allow to stand for 10 minutes, then wipe dry or allow to air dry. Rinsing is not required except on food contact surfaces.

Specifications

ACTIVE INGREDIENTS:

n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18)
dimethyl benzyl ammonium chlorides0.781%
n-Alkyl (68% C12, 32% C14)
dimethyl ethylbenzyl ammonium chlorides0.781%

OTHER INGREDIENTS:.....98.438%
TOTAL.....100.000%

TYPE GERMICIDES.....dual quaternary blend

TYPE DETERGENTS.....non-ionic

ODOR COUNTERACTANT ..AIRICIDE® proprietary additive

COLORamber

pH-CONCENTRATE.....11 ± 0.5

VISCOSITYfree flowing liquid, 6 cps ± 3

FOAMING.....low, fast breaking

FILM RESIDUEfree rinsing

SOLUBILITY IN WATER.....mixes readily in hot or cold,
soft or hard water

FREEZE-THAW STABILITY.....no degradation

FLOOR CONDUCTIVITYstatic dissipative

SHELF LIFE.....2 years minimum

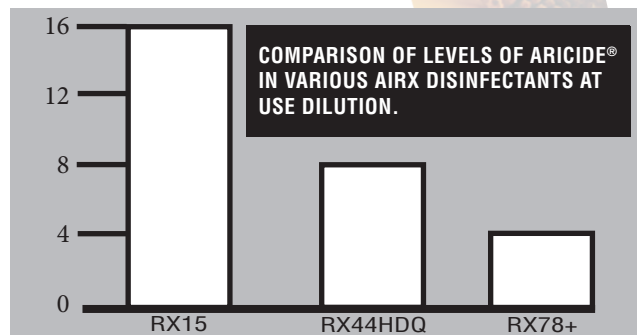

REFRACTIVE INDEX.....1.3465 ± 0.0015

SPECIFIC GRAVITY.....1.026 ± 0.010

FLASH POINTnone

DISCOLORATIONnon-staining

EPA REGISTRATION NO.....10324-167-44089
