

Professional Grade
AIRBORNE
Odor Counteractant

FORMULA

#19^E

Contains Airicide®

AIR^x

MICROCELL

ODOR COUNTERACTANT

RX19E microcells are the nearest thing to a liquid in solid form. They hold practically 100% of their calculable volume of AIRICIDE® Odor Counteractant, yet they won't drip or spill like liquids. Nor will they skin over or crust as do gels. Odors float in the air in the form of molecules that when breathed in are identified by minute hair-like antennae.

RX19E space age microcells hold the AIRICIDE® until exposed to the air, then gradually but steadily,

release it by capillary action, to change the size and shape of the odorous molecule so it is recognized as something different and more pleasant than it would have been.

The microcell blocks are small and compact (2 1/2" x 4" x 1/2") to allow the use of multiple blocks in a single circulator or wall cabinet.

Airicide®

Not a mask, not a desensitizer, AIRICIDE® is formulated to eliminate foul odors by changing the geometrics of odorous molecules in the air, so when they reach cilia receptors in the nose they are not recognized as the foul odors they would have been.

Microcells

A space age, rigid polymer foam that holds nominally 100% of its dimensional (2 1/2"x4"x1/2") capacity, then gradually and constantly releases its vapors into the air to neutralize foul odors from cancer, chemotherapy and burns centers, human incontinence, animals, decay, bacterial growth, fire, smoke, liquor, beer, mildew, etc.

MICROCELL ODOR COUNTERACTANT CIRCULATION DEVICES

The Scentinel Desktop

The personal size Scentinel cabinet. Uses one RX17. Small and compact so it fits on your desk or an out of the way spot. Continuous odor control for 1 month. Packed 1 per box, takes one D size battery

The Scentinel Wall Cabinet

Cream colored cabinet with computerized mechanics operated by a single 'D' battery. Light on front signals low battery. Can be programmed to turn off when room is not occupied. Use with 1 or 2 microcells, depending on need. Packed 1 per box, takes one D size battery

The Scentinel Jr.

The simple solution to many odor problems. Holds a single RX19 microcell. No battery to replace or be stolen. No fan – fins on side of cabinet allow adjustment for individual needs. Holds a single RX19 Microcell. Packed 12 per box

Freshenaire

A portable case (13"x16"x4") with handle. Built-in extension cord and 110v electric fan to circulate AIRICIDE®, and cover to conserve microcells when not being used. Can hold up to 5 microcells. Designed to handle your toughest odor problems. Packed one per box, uses 110 volt wall power.

Specifications

TYPE.....compressed microcells
ODOR COUNTERACTANT.....pure AIRICIDE®
RELEASE OF COUNTERACTANT.....approx. 60-90 days
OLFACTORY DESENSITIZERSnone
PETROLEUM DISTILLATES.....none
TOXIC.....no
EFFECT ON METALSnon-corrosive
COLOR.....white, non-staining
FREEZE-THAW STABILITY.....no degradation
HEAT STABILITYno degradation
SHELF LIFEmin. 1 year, closed
DRYING CHARACTERISTICS.....no shrinking, no skinning
VERSATILITY.....neutralizes odors from bacterial growth,
oxidation reduction, chemicals, etc.
