

Professional Grade
AIRBORNE
Odor Counteractant

FORMULA

#29

Contains Airicide®

AIRx[®]

SMOKE AND FOUL ODOR ELIMINATOR

Dry Spray Will Not Wet or Stain Drapes,
Upholstery or Carpets

RX29 is a super strength foul odor counteractant made especially for hotels, nursing homes and other facilities subject to intense, lingering odor problems. It is packaged in convenient aerosol cans. But unlike ordinary aerosols, it produces a dry spray pattern that will not wet or stain surfaces on which it is used. RX29's ultra dry formulation produces an extremely small particle

size that allows the Airicide® to remain airborne and not "fall out" like other aerosols. RX29 may be atomized directly on drapes, upholstery, bedding, carpeting and clothing. It is much more than a space spray. By penetrating fabrics without staining them, it eliminates malodors at their source and also provides residual effectiveness. RX29 contains no CFCs.

Description

RX29 Smoke and Foul Odor Eliminator is an ultra dry mixture of Airicide® Odor Counteractant and other components formulated to atomize completely into the air. While airborne, the extremely small particle size of the Airicide® is able to link with the foul odor molecules, changing the nose's perception of the original odor.

Uses

Simply and effectively erases foul odors from the air. It is effective against tobacco smoke, garbage, animal smells, gasoline, kitchen smells, urine and other odors that are difficult to remove.

SMOKE AND FOUL ODOR ELIMINATOR

Dry Spray Will Not Wet or Stain Drapes,
Upholstery or Carpets

Benefits

FOR SMOKE & OTHER PERSISTENT ODORS - Not just a household product. Erases intense lingering odors.
IMMEDIATE ACTION - Starts to erase foul odors the moment it is sprayed.
SUPER STRENGTH - You use much less. One short spray does more than most ordinary deodorizers.
CONTAINS AIRICIDE® - Proven effective in removing really foul odors from smoke and other sources.
PENETRATES - Reaches and erases the source of foul odors; not just a mask for odors in the air.
ENVIRONMENTALLY FRIENDLY - Contains no fluorocarbons.
RESIDUAL - For long lasting control of smoke and other foul odors.
NO SPECIAL EQUIPMENT NEEDED - Special fogging equipment is not required. Unique ultra fine spray head dispenses product.
PRODUCES A DRY SPRAY - Will not stain or wet fabric.
ULTRA FINE SPRAY - RX29 will remain airborne because of its small particle size, allowing it to travel with and eliminate the foul odor and not "fall out".

Directions

Shake container before using and occasionally during use. Hold can upright when spraying. May be used as a space deodorizer in the air or directly on surfaces that have absorbed odors.
AS A SPACE DEODORIZER - Press button and spray upward toward center of the room.
AS A RESIDUAL ON ABSORBENT SURFACES - RX29 contains nothing expected to have a deleterious effect on surfaces. Before using on fabric, test in an out-of-way spot for color fastness.

Specifications

ODOR COUNTERACTANT	Airicide®
pH	10.5 ± 0.5
COLOR.....	N/A
VAPOR DENSITY	(AIR=1):>1
BIODEGRADABILITY	complete
FLASH POINT (OF CONCENTRATE ONLY).....	68°F
BOILING POINT (OF CONCENTRATE ONLY).....	125°F
SPECIFIC GRAVITY	(water)0.932 ± 0.005 gm/ml
VAPOR DENSITY	Vapor as water/ethanol
SHELF LIFE	(closed) min 2 yrs. at room temp
TOTAL VOC.....	30%
CFC CONTENT	NONE
