

ONE UP

CLEANS, POLISHES AND PROTECTS

STAINLESS STEEL
POLISH

One easy application cleans, polishes and protects stainless steel, chrome and other decorative metals. Removes stains, smears, spills, finger marks, smudges, etc. Dries to a non-oily, non smearing, long lasting protective film.

Directions:

Shake gently. With sprayer about ten inches from surface, spray a light mist over surface. Wipe immediately with a clean, soft cloth. Do not allow the spray to dry before wiping. If surface is extremely dirty, first consider spraying a cleaning application and re-apply and wipe. For hard to spray surfaces, spray polish on cloth and wipe as if dusting. This versatile product also works on other metals such as chrome and decorative metals.

Specifications:

Appearance.....Green Viscous Liquid
Odor.....Pleasant
Specific Gravity.....0.970 + 0.005
pH.....6.5±0.5
Flash Point.....None to boiling
Solubility.....Emusifiable
Product Code.....1SP

Benefits:
