

ACTIV VIII

Patented Non-Butyl Cleaner/Degreaser

DESCRIPTION

The original, patented cleaner/degreaser that contains no butyl or any other solvent, yet cleans better than products that do. It's safer and more environmentally preferred.

BENEFITS

ENVIRONMENTALLY PREFERRED: Patented formulation that removes greasy, oily soil but contains no petroleum distillates.

NO BUTYL: Replaces more personally hazardous cleaner/degreasers containing glycol ethers.

NO VOC'S: With no solvents, Activ VIII will not release volatile organic compounds into the air.

VERSATILE: Just vary the dilution and it can be used for multiple jobs, from light duty cleaning of files and lockers to heavy duty cleaning of machinery.

NO RINSING: Loosened soil remains suspended in the cleaning solution – and will not re-deposit. Only food contact surfaces need rinsing.

DEODORIZES: Contains a blend of ingredients noted for their ability to deodorize as well as clean.

HOW TO USE

Suggested Dilutions (Ounces per gal. of water)

LIGHT SOIL & DAMP MOPPING - 2 oz.; GREASY, HEAVY SOIL - 12 oz.; AIR CONDITIONER COILS - 10 oz.; AIR FILTERS - 8 oz.; EXHAUST FANS - 12 oz.; FOOD PROCESS EQUIPMENT - 8 oz.; LIGHT FIXTURES - 6 oz.; MACHINE TOOLS - 8 oz.; OVENS - Full Strength; PAINTED WALLS & TRIM - 4 oz.; PLASTICS - 4 oz.; SOAP SCUM - 8 oz.; STEEL FILES, LOCKERS - 2 oz.; WASH ROOM FIXTURES - 4 oz.

1. Use suggested dilutions as a starting point. Adjust downward or upward for your particular cleaning/degreasing job.
2. Apply liberally with sprayer, automatic scrubber, mop, cloth or sponge. Allow to stand a few minutes.
3. Pick up with a wet vac or wrung out cloth or sponge.
4. Surfaces that food may contact should be rinsed with potable water, otherwise rinsing is not usually required.

SPECIFICATIONS

APPEARANCE.....Pink liquid
ODOR.....Practically odorless
SPECIFIC GRAVITY.....1.060 ± 0.005
DENSITY.....8.85 ± 0.05 lb/gal
pH.....12.5 ± 0.5
FLASH POINT.....None to boiling
USDA RATING.....A1

PRODUCT CODE.....AC8
