

CLING

Chemical Cleaner

DESCRIPTION

Thicker and milder than ordinary bowl cleaners. Because it clings to vertical surfaces for prolonged cleaning action, it cleans as thoroughly and is stronger than hazardous products. It's more economical because it doesn't run off surfaces and get wasted by running down the drain. Removes organic matter, scale, rust, soap film and is non-fuming. Packaged in safe, easy-to-handle plastic bottles. Also deodorizes as it cleans.

BENEFITS

SAFER: Strong enough to remove soap scum and mineral deposits, but will not fume.

CLINGS: Thixotropic chemistry allows it to stick to vertical surfaces so it can clean better.

HOW TO USE

Not recommended for use on marble, terrazzo, aluminum, enamelware, chrome fixtures or decorative metals. Spot test on unknown surfaces. Rinse empty containers with water before discarding.

CLEANING TOILET BOWLS & URINALS:

1. Flush fixture and force water out of the bowl by plunging the head of the bowl mop into the trap.
2. Pour one to two ounces of Cling over the mop and spread evenly over the surface to be cleaned. Also squirt cleaner under flush ring.
3. Allow to stand while cleaning rest of washroom.
4. Swab inside of fixture with bowl mop.
5. Flush or allow to stand for next user.

NOTE: This product is formulated not to mix with water until swished with bowl mop. It is thus apparent which fixtures have been cleaned and which have not.

FOR CLEANING OTHER SURFACES:

1. Mix with 2 to 4 parts water, depending on soil.
2. Apply with mop, brush or sprayer.
3. Agitate if needed.
4. Rinse thoroughly with clear water.
5. Wipe dry with a clean cloth.

SPECIFICATIONS

APPEARANCE.....	Slightly viscous blue green
ODOR.....	Sassafras
SPECIFIC GRAVITY.....	1.050 ± 0.005
DENSITY.....	8.76 ± 0.05 lb/gal
pH.....	1.0
STABILITY	One year minimum
SOLUBILITY	Complete
PERCENT OF ACID.....	< 10%
PRODUCT CODE.....	BPC
