

Dumpster Devil

Erases Foul Odors From Garbage, Trash, Medical Waste, Animal Bedding, Diaper Pails, Garbage Chutes, Etc.

DESCRIPTION

Sprinkle a small amount of Dumpster Devil in the bottom of refuse containers or at the top of chutes. Add occasionally as needed. A little goes a long way.

CAUTION: Do not use indoors unless area is well ventilated. Not for residential use.

BENEFITS

ENVIRONMENTALLY RESPONSIBLE -

Dumpster Devil is made from recycled paper pulp, is completely biodegradable and unlike clay products, it is incineratable.

ABSORBS LIQUIDS - Acts like millions of sponges to absorb some 300% of its own weight in liquids. That's three times the absorbency of typical clay products.

ADSORBS FOUL ODORS - Like charcoal in a gas mask. Dumpster Devil pellets have millions of minute internal caves and crevices in which odorous vapors penetrate, and are trapped and neutralized.

NEUTRALIZES FOUL ODORS - Dumpster Devil has a pleasant fragrance when dry. When the pellets become damp from contact with smelly liquids, they release a concentrated proven odor counteractant to eliminate any foul odors in the area.

LONG LASTING ACTIVITY - The proven odor counteractant is released slowly but constantly so that each scoopful is effective for days.

MULTI PURPOSE - Not only absorbs liquids and adsorbs foul odors but contains citronella which will help deter insects.
