

Deoxidizes & Restores Air Conditioner Coils

DESCRIPTION

Electric company studies show conservation of electricity and savings in cost of operating air conditioners of 28%-30% by just cleaning and deoxidizing the condenser coil - and that can be quick and easy with MIRACOIL because the condenser coil is on the outside of the unit and MIRACOIL is formulated especially for this purpose.

BENEFITS

EASY TO USE - Just spray on. Allow a few minutes to penetrate. No rubbing or scrubbing. Rinse with clear water.

CONSERVES ELECTRICITY - That's good environmentally and saves money.

LENGTHENS LIFE OF THE A/C - The less it is called on to cool, the less wear and tear on the operating parts.

NON-ACID - The only other products we know of for this purpose contain hydrofluoric acid that is extremely hazardous to use.

HOW TO USE

There's nothing to adjust or even touch inside the unit. Just spray on MIRACOIL and watch. The formula reacts with any build-up of corrosion to create a foam that penetrates the fins of the coil and literally floats soil to the surface. Then, rinse with plain water and return the unit to service.

SPECIFICATIONS

OI LOII IOATIONO	
APPEARANCE	Clear Blue Liquid
ODOR	Citrus
SPECIFIC GRAVITY	1.100
DENSITY	9.17 lbs/gal
BOILING POINT	Near 212F ⁰
pH	>14
FLASH POINT	None to boiling
STABILITY	One year minimum
PRODUCT CODE	MR2
