

NO TIME

High Efficiency Floor Finish Stripper

DESCRIPTION

No Time represents the very latest technology in floor finish strippers with a superior product for fast and complete removal of old finishes without need of a floor machine. No Time does not just soften old finish, it penetrates and liquefies it to break the finishes bond with the floor allowing it to be washed off, not scrubbed off.

BENEFITS

REMOVES MULTIPLE COATS: No Time doesn't just soften the top coat or coats of built-up floor finish. It completely liquefies all coats so finish need only be rinsed away without scrubbing.

HOLDS ITS POWER: No Time still has effectiveness after stripping an area and may be squeezed to a new area before it's strength is exhausted.

BETTER FOR FLOORS: It's much better for the floor to use this most effective stripper and get the job done quickly than to use a less effective product and have to re-wet the floor over and over and risk the stripper getting under tiles.

HOW TO USE

LIGHT/MEDIUM STRIPPING: Mix 1 part to 16 parts warm or cold water. Apply solution with mop to floor liberally. Keep floor uniformly wet for 3 to 5 minutes. Some agitation may be required. Remove solution with a wet vac and rinse. Allow floor to completely air dry (about 30 min.). Recoat with floor finish.

HEAVY DUTY STRIPPING: For heavy build-up dilute 4:1, follow above directions.

MACHINE STRIPPING: Dilute 16 parts water to 1 part stripper, follow above directions.

NOTE: If floor is not thoroughly clean and dry, a rinse may be required. A spot test is recommended before general use.

SPECIFICATIONS

APPEARANCE.....	Clear liquid
ODOR.....	Butyl
SPECIFIC GRAVITY.....	0.970 ± 0.005
DENSITY.....	8.09 ± 0.05 lb/gal
BOILING POINT.....	Near 212°F
pH.....	12.0 ± 0.5
FLASH POINT.....	None to boiling
STABILITY.....	One year minimum

PRODUCT CODE.....NTS
