SURVEYOR'S CERTIFICATE
I do hereby certify that the Urban survey shown hereon was performed under my direction using appropriate G.P.S. Methods for measuring recovered monuments and establishing survey control and/or by the method of random traverse. The entirety of the data collected for this survey was done so through GPS means when acceptable; and by conventional means, from GPS control points, when necessary. Survey was performed using GPS equipment CARLSON BRX7; GPS & GNSS RTK dual frequency with centimeter accuracy (HRMS OF 0.02' OR LESS) and Nikon Total Stations. The unadjusted mathematical error of closure of the traverse and the theoretical uncertainty of the corners established exceed the specified tolerances set forth by the Commonwealth of Kentucky, Standards of Practice For Professional Land Surveyors for a survey of this class in 201 KAR 18:150. The bearings and distances shown hereon have not been adjusted for closure.
