NP: Not Provided. N/A: Does Not Apply

Has the entry undergone resection of any abdominal organ at any time? **No**

Has the entry been lame for a period more than 2 weeks at any one time while in your possession?

No

Does this entry have other defects, abnormalities or blemishes? **Yes**

A nutrient toxicity/overload caused her to be born with flexural limb deformities and just an overall slow start. Legs were wrapped, she had monthly trims, hoof extensions were applied, and she was given Rejuvenaide to aid in the correction. She does have a very small umbilical hernia remaining that has closed up significantly on its own and is currently about the size of the tip of my index finger.
