We live in a world of extraordinary natural beauty. We call it reality (and it is external reality), but just behind the patterns and structures of the physical world, hidden and unseen, is another even more beautiful metaphysical reality that determines what we see externally. Many mystics and sages have stepped through the curtain of the external world into this

greater metaphysical world and have returned to describe it. We will explore their descriptions and the mystical consciousness that is the doorway to that world. Traditional metaphysics is a shared experience across the world and in every age including our own. We too are destined to become mystics and astronauts of spirit, adventurers into metaphysical reality.

Although this may be your first introduction to Metaphysics and Mystical Consciousness, we will journey together step by step deep into this wondrous and ancient territory

We ask you in advance of this weekend, if possible, to read the first few chapters of *Alan Watts, Supreme Identity* and *Philip Sherrard, The Eclipse of Man and Nature*. However, all are welcome to join us in this exploration.
