Inform climate change strategies to every country. The United Nations
Governments to be responsible and make a stronger commitment for a cleaner
Those around the world who are suffering and facing hardship due to
Christians to understand that we are stewards of God's creation and the example
Aid countries that have a higher percentage of poverty. One of the main reasons
Anti
Lt. Colonel Dean and
A sense of responsibility in the hearts of people to care for this planet
All of these facts demonstrate that the earth we live in is in danger of falling apart.
We must help educate our world about climate change and its affects.

Our Duty
As Salvationists, we need to take this responsibility seriously. When we declare that we love God and others, we
watch over it, take care of it, and to love it as God does. As Salvationists, we need to
Genesis 1
people, He replenishes the mountains with water, and provides the land with
sustain it. We read in Psalm 104, the Scripture describes God's handiwork, His love
to watch over the land, sea and animals, to take care of His creation and to help
As Christians, it is our duty to take care of God's creation. He created the sea, the
land, the sky, and everything in it. As His children, it is our responsibility to watch over our world. Not only is the climate change
affected as things flow and water supply. It also affects us through the breath of life, and the rain that brings growth to the ground and helps
nutrients. God created all living creatures, and He created the Earth. According to
sustain it. We read in Psalm 104, the Scripture describes God's handiwork, His love
to watch over the land, sea and animals, to take care of His creation and to help
As His children, it is our responsibility to help stop climate change from overcoming us and destroying our

Prayer Topics
As we reflect on the challenge of SDG 13, let us pray for:

1. A sense of responsibility in the hearts of people to care for this planet

2. The necessity of the leaders of the world to take action on climate change

3. The need to educate the people about climate change

4. The need for all nations to work together to create a plan of action to combat climate change

5. The need for all nations to work together to create a plan of action to combat climate change

6. The need for all nations to work together to create a plan of action to combat climate change

7. The need for all nations to work together to create a plan of action to combat climate change

8. The need for all nations to work together to create a plan of action to combat climate change

9. The need for all nations to work together to create a plan of action to combat climate change

10. The need for all nations to work together to create a plan of action to combat climate change

Shaping the future
As the weather changes, we must help educate our world about climate change and its affects.

Propriety

1. We must always be prudent in our actions and decisions.

2. We must always be considerate in our words and deeds.

3. We must always be accountable for our actions and decisions.

4. We must always be responsible for our actions and decisions.

5. We must always be respectful in our words and deeds.

6. We must always be kind in our words and deeds.

7. We must always be patient in our words and deeds.

8. We must always be forgiving in our words and deeds.

9. We must always be understanding in our words and deeds.

10. We must always be caring in our words and deeds.

Tools

1. We must always be familiar with the tools at our disposal.

2. We must always be proficient in the tools at our disposal.

3. We must always be knowledgeable in the tools at our disposal.

4. We must always be efficient in the tools at our disposal.

5. We must always be effective in the tools at our disposal.

6. We must always be confident in the tools at our disposal.

7. We must always be skilled in the tools at our disposal.

8. We must always be experienced in the tools at our disposal.

9. We must always be versatile in the tools at our disposal.

10. We must always be creative in the tools at our disposal.

The Future
As the weather changes, we must help educate our world about climate change and its affects.
