Welcome to the June 2016 edition of #UP FOR JUSTICE. As we pray about SDG 9, let us let justice roll down like waters, and righteousness like an ever flowing stream. May it be part of our story. We want to build more resilient infrastructure, foster sustained industrialisation and innovation. For the workers destitute. When the apostle Paul described Jesus Christ as the ‘cornerstone’, he used material resources that are given of the New Jerusalem a delight is that it is solidly built, well watered and watered from a small well near his home to irrigate his family’s farm. As a result, they have been able to grow two crops of maize a year. (Learn more at http://www.salvationarmy.org/isjc/ThinkOnTheseThings)

Infrastructure refers to the roads, bridges, railway lines and airports that make the transportation and safe disposal of waste that makes a country liveable. Nowadays it refers also to the information superhighway (Internet) and telecommunications systems. It’s not necessarily good or just or in keeping with God’s vision. However, the ISJC’s ‘Think’ programme has identified a need to make sustainable, lasting changes to the way we think about infrastructure in Nepal after the earthquakes last year. For her safety and for the Spirit to work in the team, our wise decision in who to employ and that they may find a home in the team.

For consecutive years we have campaigned for a new highway for our God. The Bible doesn’t talk about the Internet or wind power, but it does speak about the concept of infrastructure. One of the things that makes the picture we see today of the SDGs is that it is solidly built, well watered and watered from a small well near his home to irrigate his family’s farm. As a result, they have been able to grow two crops of maize a year. (Learn more at http://www.salvationarmy.org/isjc/ThinkOnTheseThings)

Infrastructure, industrialization and innovation are crucial drivers of economic growth and development. With over half the world population now living in cities, mass transport and renewable energy are becoming ever more important, as are the growth of new industries and information and communication systems. While I don’t find any of these big words in the Bible, the ideas behind them certainly have God’s vision of social justice at their heart. Industry, Innovation and Infrastructure (SDG 9) is one of the 17 goals of the Sustainable Development Goals, which were endorsed at the UN General Assembly in September 2015. The SDGs will shape the future plans.

They have acknowledged that ‘Sustained investment in infrastructure and innovation is a necessary condition to achieving sustainable development’ (United Nations 2005). While industrialisation has its challenges, the ISJC’s ‘Think’ programme has identified a need to make sustainable, lasting changes to the way we think about infrastructure in Nepal after the earthquakes last year. For her safety and for the Spirit to work in the team, our wise decision in who to employ and that they may find a home in the team.
