A Vital Part of Your Well-being
Welcome to the First Day of a Transformed Life

There are times when you alter your routine in a way that can transform your life. As you look to improve yourself and enhance your well-being, you search for ways to clear your mind, make your body healthier and more agile. You look for contentment both within yourself and your surroundings. It’s a search for experiences that allows you to say “Yes, that changed my life.”

At Caldera® Spas, we design and build hot tubs for just that sort of life-altering experience. To those who think of a hot tub merely as a luxury, that could come as a surprise. Yet our purpose is to improve your life, to help you feel better physically, mentally and even spiritually. A Caldera Spas hot tub is a personal wellness retreat that can help you feel more relaxed, flexible and focused. It can relieve the pressure on joints, reduce pain and help you unwind. It can also provide a customized massage to help muscles recover.

We invite you to include Caldera Spas in your journey and learn more about how warm water therapy and massage can truly change your life in just 20 minutes a day. It’s a small investment of time that can yield dramatic results in your personal wellness journey.
Caldera® Spas: An Essential Part of a Holistic Approach to Your Well-being

Wellness is not a final destination but a path to be wandered and enjoyed. No single component of the journey is a solution in and of itself. Instead, the path is winding and continuous with a variety of experiences that contribute to your overall health. We believe that using your hot tub regularly is a vital component in a holistic blend of life-shaping activities.

Immersion and Massage
About 20 minutes a day in your hot tub can relax muscles, relieve pressure on joints, and increase circulation. Warm water immersion also provides similar benefits to the nervous system as meditation. You emerge from a daily soak feeling fully relaxed, rejuvenated and transformed.

Movement
Fitness experts agree that regular exercise can help control weight, improve mood, and boost energy. As a general goal, they suggest you aim for at least 30 minutes of physical activity every day, even if that translates to just three 10-minute walks. Do your best to make it an enjoyable part of your daily routine.

Time to Relax and Recharge
Stress is a contributing factor in countless medical conditions. Taking the time to relax can reduce the effects of stress. Medical experts agree that it may even lead to benefits like lower blood pressure and reduces the likelihood of depression.

Nutrition
Good nutrition can reduce the risk of certain medical conditions, increase your energy, delay the effects of aging and strengthen your immune system. Invest time to learn what your body needs, and make healthy eating fun with great, delicious cooking. Resources abound!

Self-reflection, Mindfulness
Whatever form of self-reflection or mental relaxation you use to unwind is likely to help you reduce stress, improve cognitive functions and help you maintain a sense of control, balance, and renewal.

A Sense of Purpose
Having a sense of purpose helps you stay healthy, improves your relationships and helps you live longer. Having purpose lowers risk of mortality more than any other factors known to predict longevity.

Connections
Connections to family and friends are essential to long-term wellness and they influence health as much as diet and fitness. Studies show that people with satisfying social connections are happier, healthier and live longer.

Caldera® Spas: An Essential Part of a Holistic Approach to Your Well-being
Why 20 Minutes Matters to You

The transformative effects of warm water have been used for centuries. With our focus on enhancing the self-care benefits of a spa through careful design and engineering, a Caldera® Spas hot tub can accomplish more than ever before.

**Promotes muscle recovery and healing**
A spa’s warm water massage promotes healing by increasing circulation, carrying nutrients to help cells and tissue regenerate. According to the textbook *Comprehensive Aquatic Therapy* by industry experts Dr. Bruce Becker and Dr. Andrew Cole, immersion in warm water is a “unique healing environment” that can lead to temporary relief from muscle aches and pains.

**Decreases stress**
The negative effects of stress are well-documented. Time in a hot tub allows you to clear your mind, relax deeply and start each day with a fresh, positive outlook.

**Relieves joint pain**
Time in a hot tub creates a helpful environment for relieving joint pain and stiffness. While the water’s buoyancy reduces stress on joints and muscles, warm water massage increases circulation, relaxes muscles, ligaments and tendons, and stimulates the release of endorphins, the body’s natural pain reliever.

**Improves circulation**
In a spa, body temperature increases and blood vessels dilate, improving circulation to carry in nutrients and oxygen. Pores open and release moisture as a cell-cleansing mechanism.

**Builds relationships**
Time in a hot tub can foster heartfelt communication between you and friends or family members without distractions.

A quick 20-30 minute nap during the day can help improve learning, memory and creative thinking. Harvard researchers say that a nap can help make you a more effective problem solver and can help you separate important information from less relevant information. But more than 20-30 minutes can make you feel groggy. Don’t use napping as an alternative to less nighttime sleep. A good night’s sleep in conjunction with the occasional nap yields the best results.

---

Sleep Better

Lack of sleep can have a profound effect on your health, yet roughly 60 million Americans suffer sleep disorders during the year. A hot tub can help relax you and prepare your body for sleep. But that’s not all.

Sleep is normally preceded by a drop in body temperature. As you soak in your hot tub, your body temperature increases. After you leave the hot tub, the body temperature you gained begins to normalize and decrease. That more dramatic drop in core temperature signals to your brain that it’s time to sleep.

You can enhance that mechanism by keeping your bedroom cool. The National Sleep Foundation suggests keeping your room between 60 and 67 degrees F, while keeping your room free of noise and other distractions.
We Create Spas with a Focus on Comfort, Design and Performance

Our reliable, high-performance spas are designed for comfort, efficient energy use, and simple maintenance so you can focus on enjoying your hot tub often. Every feature—from the efficiency of a heater to the glow of an LED light to the versatile jet options—is crafted with that in mind.

The Caldera difference is in the details. We believe that once you’ve experienced the Pure Comfort®, design, and performance of your Caldera spa, you’ll want to make it part of your everyday well-being routine.

Comfort
Comfort is the essential element in our hot tubs. Deep, cradling seats and a textured Foot Ridge® help you stay relaxed and seated even when enjoying powerful jets. Perfectly positioned hydrotherapy massage melts your tension away. And a whisper-quiet sound dampening design enhances the comfort experience.

Design
We craft each hot tub detail to awaken the senses. From rich colors and contemporary cabinet styles to the organic contours of our sculpted seats, every element is intended to soothe and delight.

Performance
To get the most out of your spa, it needs to operate at a consistently high level. Each Caldera hot tub is engineered and built with the strictest attention to quality and efficiency. Our commitment is your assurance of reliable, energy-efficient performance for years of worry-free hot tubbing.

CalderaSpas.com
Designing a spa for Pure Comfort® is about more than just making you feel good. It’s about helping you relax completely, putting you in a place where you can leave stress behind and recharge. Stress can negatively affect your immune system, your social interactions and your health in general. The ability to fully let go, to completely power down, is so vitally important to your overall well-being. So, yes, we take comfort very seriously.

It’s in the seat
Our designers have created ergonomically sculpted seats that comfortably cradle you, decompress your spine and keep you aligned. Combined with the buoyancy of the water, the seat’s design releases pressure off parts of the body that are under stress all day.

Our seats are also designed in a way that helps keep the water’s buoyancy from floating you out of the seat. After all, it’s hard to relax when you’re fighting the water to stay in place. There’s also a Foot Ridge® unique to Caldera® spas that helps keep you stable in your seat even when the jets are at their strongest setting.

Personalize your massage
Easily direct or increase water flow to the seats you choose with the diverter valves located around the Utopia® and Paradise® Series spas. Adjust the strength and flow of many individual jets to your preference by simply turning the air valves or outer ring around individual jets.

The jets
Feeling is believing. When shopping for hot tubs, you can easily be tricked by a spa that’s filled with dozens of shiny chrome jets. But what’s the function of each? Is the water flow through each one based on its benefit to a specific area of your body? Are the pumps powerful enough to deliver a deep massage when needed and adjustable enough to deliver a gentle relaxing touch when that’s what you want?

A Caldera spa is carefully and purposely designed with a variety of jet types, strategically placed to deliver just the right type of massage right where it’s needed, whether it’s your aching lower back or the soles of your feet.
A Caldera spa is an investment in your wellness—it's a personal retreat where you can rejuvenate and revitalize your body and mind. Along with comfort enhancements, we focus on creating beautiful spas to complement your outdoor living space. With a range of color and cabinet choices, lighting features and entertainment options, it's easy to find the right hot tub that transforms your environment as it transforms your life.

**Exterior design**
To get the most wellness benefits from your hot tub, you'll want to use it often. It's important to choose a hot tub that fits your space and is built to endure the elements. From the contemporary sculpted design of the Utopia® Series’ Avante™ all-climate cabinetry to the simulated wood EcoTech® siding on Paradise® and Vacanza® Series spas, Caldera has a hot tub that's perfect for your home style.

**Interior details**
It's not just what you see on the outside that makes a Caldera spa beautiful. Our thoughtful design details go beyond the sweeping contours of the acrylic spa shell and ample interior. We give special attention to every component detail, from lights and speaker placement, to the design on jets, diverters, and pillows, down to the pattern in the footwell.

**Lighting enhancements**
Nothing sets a mood like the right lighting. Each of our three series of spas features its own lighting system, designed to complement the beauty and elegance of the spa.

**Soothing sounds**
Whether you're relaxing on your patio or rejuvenating in your spa, music is a must-have item. Optional music and entertainment systems let you enjoy music through the spa's waterproof speakers.

**Interior details**
It's not just what you see on the outside that makes a Caldera spa beautiful. Our thoughtful design details go beyond the sweeping contours of the acrylic spa shell and ample interior. We give special attention to every component detail, from lights and speaker placement, to the design on jets, diverters, and pillows, down to the pattern in the footwell.
THE CALDERA DIFFERENCE

We believe that performance-based design involves both the materials used to construct our spas and the efficiency, power and durability of the components that run them. We choose and design materials for our spas based on their ability to stand up to daily use. Whether it’s the reinforced acrylic interior surface, the cabinet options or insulation, starting with the best base materials ensures peak performance throughout the life of your spa.

Healthy, clean water made easy
All water care systems require some attention and involvement, but some are far easier than others. With Caldera®, you have access to clean, healthy water without handling chemicals, and you can enjoy sparkling water whenever you’re ready for a soak.

Energy efficiency
We’re committed to energy-efficient design as a way to save energy and save you money on operating costs. From our innovative FiberCor® cabinet insulation to our highly efficient EnergyPro® system to custom-fit covers, a Caldera spa meets the most stringent energy efficiency standards established for portable spas. And that saves you money.

Performance by Design

One-touch controls
The Advent® panel gives you intuitive control of spa functions right at your fingertips. An auxiliary control on Utopia Series spas lets you operate the spa from a second location from within the spa.

More power when it’s needed
Sometimes, you want to feel a gentle flow of water. But when you need a deep massage and the wellness benefits it offers, a Caldera Spas pump is designed to provide it. We make sure it’s easy for you to customize your massage so that it works specifically for you.

Innovative, high-quality components
Heaters, pumps and other components are designed so they’re more efficient, robust and longer-lasting.
When you workout in a gym with a personal trainer, he or she will create a plan that moves you from station to station with different exercises to give you a balanced, full-body workout that emphasizes all major muscle groups.

At Caldera® Spas, we’ve applied that same approach to massage. By configuring the jets in many Caldera models, we make sure you get the same holistic, whole-body treatment.

**Designed for Total Body Restoration**

Each seat or position in a Caldera spa provides a deep massage to a different muscle group. As you move from seat to seat, jets focus on those groups, one at a time, including your neck and shoulders, the large muscles of your back, lower back, hamstrings, calves and feet.

Rotate through the circuit for total-body restoration or just concentrate on the areas that need the most attention. A Caldera spa is yours to personalize as you see fit.
Discover Your Perfect Fit

Owning and maintaining a Caldera® spa is easy—and our expert Caldera retailers make buying and owning a hot tub even easier. Knowledgeable, caring and helpful, your local retailer will listen and answer every question. Schedule a free test soak and discover the fit that’s right for you.

Caldera quality
Each Caldera spa series offers models with a distinct level of value and features. And all Caldera spas are designed with our signature combination of Pure Comfort®, design, and performance to deliver optimal self-care and daily renewal.

Hallmark features:
• Beautiful interior acrylic shell, hand-crafted with our three-layer DuraBond system for strength
• Superior strength and design appeal of the Avante™ all-climate cabinetry on Utopia® Series models
• Durable, low-maintenance EcoTech® cabinets on Paradise® and Vacanza® Series spas with the aesthetic appeal of natural wood
• Quiet and energy-efficient EnergyPro® system to minimize operating costs
• Energy-efficient and environmentally responsible proprietary FiberCor® insulation
• Integrated, low-maintenance FROG® in-line water care system

Utopia® Series
For the most ideal personal care experience, Caldera presents the Utopia Series featuring an exclusive combination of high-performance details and transformational design. Utopia Series models offer the pinnacle of hot tub comfort, design, and performance. Ease of use, low operating costs, and an exceptional hot tub experience make Utopia Series the preferred choice of discerning spa owners.

Paradise® Series
The high-quality Paradise Series models offer a blend of mid-range premium options and functions for complete restorative relaxation.

Vacanza® Series
The Vacanza Series models combine many signature Caldera comfort and quality features, delivering daily renewal at a great value.

What’s the Best Way to Discover the Right Spa?

Everyone has their own vision of what owning a hot tub will be like. So we know your perfect Caldera® spa “fit” is as individual as you. Whatever your needs and preferences, let us help you discover the spa that will help create your perfect “Caldera moments”.

The transformational design of the Utopia® Series spas has unique sculptural detailing unlike anything on the market. Its Avante™ all-climate cabinetry is as durable as it is enduring in its beauty. It is designed to withstand harsh sun and snowy winter conditions and still look as good as new year-round.

**Comfort enhancements**

Comfort is essential to wellness. It’s what allows you to begin releasing tension and stress, both mentally and physically. Each of our six Utopia Series models have up to eight Hot Tub Circuit Therapy® stations so you can focus your massage experience on the areas that need attention.

You’ll sit comfortably in the deep seats and spacious interior to focus on enjoying the rejuvenating jet action on your back, hips, thighs, calves and feet. Specialized jets include the UltraMasseuse® system, OrbisSpa® rotating jets, hip jets, and the Atlas® Neck Massage system.

**Performance enhancements**

Utopia Series spas are remarkable for their power and efficiency. They’re also remarkably easy to care for and use. The Frog®@ease In-Line System with SmartChlor® Technology and Monarch® CD Ozone System are standard on Utopia models, delivering the most effective water care system. The 100-square-foot filter requires only infrequent cleaning or changing. A thermal isolated base pan protects your spa components and prevents your spa from losing energy through contact with the ground. Finally, the intuitive Advent® touchscreen LCD control panel lets you make precise adjustments to your water temperature, jets, and lighting with ease.

Utopia Series Spas: All You Need to Relax

- The Bar top has crisp lines with large flat surfaces and more room to set a drink.
- The filter grate design hides the compartment and reduces noise.
- A functional diagnostic logo light shows that the spa is working at the proper temperature and whether it needs servicing.
- Dimensional stainless steel trim and black spacer highlight the spa’s appeal.
- Durable and innovative, the Avante™ cabinet is a lightweight yet extremely durable “floating façade” available in three earth mineral hues.
- Integrated cabinet lighting brightens all four corners and the surrounding area. The lighting can be set to automatically come on at the same time every evening.
- The filter grate design hides the compartment and reduces noise.
- A functional diagnostic logo light shows that the spa is working at the proper temperature and whether it needs servicing.

THE PARADISE® SERIES

Versatile Spas Designed with Your Well-being in Mind

Our Paradise® Series is known for its versatility, premium range of options, and robust performance. In addition to its energy-efficient EnergyPro® system, its design enhancements include an intuitive control panel, contemporary jet face design, and beautiful interior and exterior color options. The series includes four models, sized for three to seven adults.

Performance features
Like all Caldera® spas, the Paradise models feature performance innovations such as our exclusive energy-efficient FiberCor® insulation and the integrated FROG® in-line water care system.

All Paradise Series spas feature a DuraBond reinforced shell and a durable, low-maintenance EcoTech® cabinet.

The LCD Control Panel is more intuitive to use than ever before, giving you simple control of jets, lighting, and the integrated wireless sound system (optional).

Comfort and design features
Each Paradise model includes massage jets specially configured for Hot Tub Circuit Therapy® to maximize relief of tired muscles. Favorites include the EcstaSeat®, a powerful Euphoria® jet, and the stimulating Sole Soothers® foot jets (varies by model). Conveniently placed diverters allow you to adjust and direct jet pressure to the seats of your choice.

Subtle style details throughout each Paradise model create a special ambiance, including the illuminated Acquarella® waterfall (featured in photo above), handrail, and flush-mount speakers on entertainment-ready spas.

> *Easy to maintain, easy to use. Fits perfectly on our deck. We love it!*

— Kauai Owner, MI
The Vacanza® Series gives you access to the wellness and renewal benefits of a hot tub at a great value. Like all our hot tubs, Vacanza models include hydrotherapy jets that target major muscle groups to work away stress so you emerge fully rejuvenated.

These streamlined spas are ergonomically designed to cradle your body and feature a uniquely textured Foot Ridge® that lets you stay securely in your seat, helping you relax, especially when enjoying powerful jets. The sight and sound of the Acquarella® waterfall delights the senses and offers a peaceful meditative background.

All Vacanza Series spas are crafted for durability so you can enjoy them every day. Its features include:
- Integrated FROG® in-line water care
- Energy-efficient FiberCor® insulation
- Durable, low-maintenance EcoTech® cabinet
- 115v/20 amp plug-in (Tarino™ and Aventine® models)

Burn more calories in the same amount of time! A 2006 study in the British Journal of Sports Medicine showed that walkers in their fifties burned 25% more calories when they increased their walking speed a mere half mile per hour from 3.6 mph to 4.1 mph. But the caloric burn gets greater as speed increases. Add another half mile per hour from 4.1 to 4.6 and the effect burns 32 percent more calories.

The Utopia® Series
As part of our Utopia Series design transformation, we’ve introduced our revolutionary Avante™ cabinet in three colors inspired by earth mineral hues. Shell colors vary by model.

Colors that Blend with Your Life & Your Surroundings
Choose the color of your new spa’s hand-crafted, three layered DuraBond shell, EcoTech™ or Avante™ cabinet, and cover to coordinate your spa with your house, patio, or whatever area you wish. We’ll build your spa to the combination you choose.

1. Choose your shell color
Paradise® and Vacanza® Series spas are available in up to five contemporary colors, featuring either a smooth or textured finish. Selection varies by model.

2. Choose your cabinet color
Paradise and Vacanza Series spas have a low-maintenance, durable EcoTech spa cabinet that combines the look of real wood with reinforced polymers. EcoTech is backed by up to a three-year warranty.

3. Choose your cover color
Caldera® spa covers, with their integrated cover lifter bar, deliver safety and energy efficiency. Color-coordinated with the spa cabinets, our covers feature dense foam insulation wrapped in durable marine-grade vinyl, and include ASTM-compliant child-safety locks.

* Pacific Rim and White Pearl are not available on the Cantabria®.

** Additional charges may apply to particular combinations. See dealer for details.
It’s Easy to Keep Spa Water Fresh and Healthy

Relax in your hot tub with water care systems that keep your spa sanitized, clear and ready to use any time. It’s easy with a Caldera® spa.

Our Easiest Water Care System

The FROG®@ease™ In-Line System with SmartChlor® Technology maintains crystal-clear water automatically. Pre-filled cartridges eliminate the guesswork and combine chlorine and minerals for carefree, self-regulating sanitization and balanced pH. Chemical odors are minimized because you’ll use up to 75% less chlorine. Minerals condition the water for a softer feel.

The @ease SmartChlor and Mineral Cartridges fit out of sight, in the spa’s filtration system, and chlorine is released slowly to maintain more consistent levels. Simply set the dial on the cartridges and insert them into the spa. Chlorine cartridges last up to four weeks; mineral cartridges last up to four months. Available in the U.S. only.

Also Available with Bromine

SPA FROG bromine and mineral cartridges are available to those who prefer an alternative to chlorine.

The Ultimate in Water Care

Our Monarch® CD Ozone System mixes concentrated ozone bubbles into the water to neutralize contaminants. When used in conjunction with the @ease SmartChlor Cartridge, you’ll get our most effective water care system. The CD Ozone System is standard on Utopia® models, and optional on Paradise® and Vacanza® models.

As an option for virtually chlorine-free water care, combine the CD Ozone System with Monarch Silver Cartridges and MPS non-chlorine oxidizers instead of the @ease cartridge.

Best Prep for Clean Water

Make the most of your water care system with these chemical-free accessories to ensure you start with fresh, clean water in your spa.

Clean Screen®

Attach this pre-filter to your garden hose to remove organic contaminants, tannins, copper, iron and other metals from the water as you fill your spa.

Vanishing Act®

This calcium remover reduces build-up for softer-feeling water that’s silkier on your skin. It helps protect your spa from the damaging effects of hard water.
Energy-efficient Caldera® Innovations

Save You Money Every Day

Better for the Environment

Why put so much effort and engineering into making a hot tub so highly energy-efficient? Because it’s the right thing to do. It’s better for the planet and it’s better for your budget.

When it comes to a hot tub, “energy efficiency” translates directly to lower operating costs. In fact, saving money on a model that’s not energy efficient could wind up costing you much more over the life of the spa.

That’s why we’ve committed our design and engineering resources to making Caldera Spas one of the most energy-efficient hot tubs available. Just like the wellness benefits you get from our hot tubs, the savings you get from choosing Caldera will add up every day.

EnergyPro® technology

The innovative EnergyPro system in our Utopia® and Paradise® Series models keeps water hot and always ready for use while meeting the most stringent energy standards established by the California Energy Commission for portable spas. The EnergyPro circulation pump operates continually at very low wattage to filter water. Heater use is reduced, because 80 percent of the energy used to operate the pump is transferred back to the water as heat.

Custom high-density covers

We custom-build our covers to the exact measurements of our spas to ensure a tight seal between the bar top and cover for optimum energy efficiency. The full-foam cover is wrapped in durable, marine-grade vinyl and includes child safety locks. All our covers are UL lists in compliance with ASTM standards.

FiberCor®

An innovation in hot tub energy efficiency

Caldera spas are insulated with proprietary FiberCor® insulation that has four times the density of the urethane foam used in most hot tubs. This industry breakthrough insulation is completely recyclable, 100% non-petroleum based and is free of harmful emissions. As a result, Fiber Cor provides superior insulation, improves hot tub performance, lowers energy costs, and is better for the environment.
A cover lifter is an essential spa accessory that protects your spa, the cover, and your investment. Designed to allow one person to effortlessly fold the cover back and out of the way, a lifter makes it easy for you to be in your spa in seconds, enjoying all the benefits of a daily 20-minute soak.

Without a lifter, your cover could be damaged as you take it on and off. That damage can affect the cover’s energy efficiency and wind up costing you money in energy bills. And anecdotal evidence suggests you’ll tend to use your hot tub much less if getting the cover off and on is difficult and time-consuming.

Designed to integrate seamlessly with Caldera® spas, we offer four ProLift® Cover Lifter options that protect your cover and are easy to use. Talk to your dealer to see which is right for your model of spa and your needs.

**ProLift**

The ProLift (not available on Utopia® Series spas) attaches to both cover and cabinet and has a built-in safety lock. Requires 14” minimum clearance.

**ProLift III**

Our best lifter, the ProLift III has two pneumatic gas shocks to provide smooth, quiet operation. Very little effort is required to remove or replace the cover, even on larger spa models, because the shocks do the heavy lifting. Requires 24” minimum clearance.

**ProLift II**

The ProLift II uses a single pneumatic gas shock for smooth operation. Requires 24” minimum clearance.

**ProLift IV**

For decks, gazebos, or other areas where clearance is limited, the ProLift IV enables you to position the cover vertically, just behind the spa. Requires 7” minimum clearance.

---

**The Essentials that Every Spa Needs**

**Avante™**

These two-tiered steps match the Avante all-climate cabinet on our Utopia® models. Available in Slate, Sand and Brownstone.

**EcoTech®**

Our durable EcoTech steps are made from the same weather-resistant material used to construct our exterior cabinets. Available in Coastal Gray, Espresso and Teak.

**Polymer**

This economical 32” step is durable, lightweight and made of recycled materials. Available in Coastal Gray, Espresso and Teak.

Looking for natural methods for reducing inflammation? Natural anti-inflammatories with impressive results include black cherry juice, turmeric, and even cinnamon. A simple online search provides details. As always, check with your doctor before adopting any supplemental health plan.

Enhance Your Sense of Calm and Well-being with

Just the Right Light

Part of the wellness equation involves creating the right frame of mind, whether you’re trying to achieve a state of deep relaxation or a lively setting. Color and lighting are great for creating the ideal environment, especially at night. Adjust the intensity and color rotation to create the ideal evening mood.

The SpaGlo system in our Utopia Series models includes six colors that accent individual zones throughout the spa, such as the bar top, footwell, waterfall, points of light and exterior corners. All the zone lighting is adjustable. We’ve enhanced the system with pin-point lighting that highlights selected areas of the spa, including the Euphoria® jets in the footwell of all models. In addition to their interior lighting, the Utopia Series models feature corner and perimeter lighting that intensifies the beauty of the area immediately surrounding your spa.

LED Points of Light System
Paradise® and Vacanza® Series
The Caldera Points of Light System casts a reflective glow throughout the footwell, interior and water edge of your spa. Set it to reveal the color of your choice or to reveal a slowly rotating display of all six colors.

SpaGlo® Multi-Zone LED Lighting with Pin-Point Lighting

Nothing Enhances Your Relaxation Like
High-quality Sound

Music has the ability to enhance or create nearly any mood. For the ideal setting in or around a hot tub, it’s important to have components designed to deliver high fidelity sound in a wet, outdoor environment. We offer a range of integrated music options so that you can find the entertainment system that works best for you.

If you love to relax to music, be sure to order your Caldera® Spas hot tub with integrated speakers that are factory-installed and thoughtfully placed within the spa shell for superior sound quality. Upgrade your system with an internally mounted subwoofer to enhance the low-range bass and volume. Every Caldera Spas Wireless Sound System lets you adjust volume, bass, treble and balance from controls on the spa.

Wireless sound system with Bluetooth®
Our Bluetooth music options heighten your spa enjoyment and help you unwind as you relax or enjoy a massage for your tired muscles. Stream music live or play from your own music library.

To relax, try the 4-7-8 Relaxing Breath Exercise. Press your tongue to the roof of your mouth with the tip of your tongue near the base of your front teeth. Breathe in through your nose slowly to a count of 4. Hold your breath for a count of 7. Exhale through your mouth for a slow count of 8. As you exhale with your tongue pressed against the roof of your mouth, make a soft “wooshing” sound. Keep the tip of your tongue in the same position throughout. Repeat the cycle four times. This twice-a-day exercise is a “natural tranquilizer” for the nervous system.

Source: Dr. Andrew Weil, M.D.

Add music to any Caldera spa

Utopia® Series
Music-ready Utopia models include low-profile integrated speakers that surround the contoured pillow headrests for high quality sound.

Paradise® Series
Music-ready Paradise models include sleek speakers thoughtfully placed on the spa shell.

Vacanza® Series
Most Vacanza models can be ordered music-ready to include integrated speakers.

Series Speakers

To relax, try the 4-7-8 Relaxing Breath Exercise. Press your tongue to the roof of your mouth with the tip of your tongue near the base of your front teeth. Breathe in through your nose slowly to a count of 4. Hold your breath for a count of 7. Exhale through your mouth for a slow count of 8. Monitor and Control Your Spa from Anywhere in the World

With the Connextion® Remote Spa Monitoring System, you and your local dealer can monitor the status of your hot tub from nearly anywhere in the world using a smartphone or tablet. The system provides real-time information and control of spa functions. With VirtualValet™ and a subscription service, your local dealer can receive alerts from the system and respond when issues arise. The Connextion subscription service makes it much easier to maintain your spa when you’re away. It’s especially helpful for a spa at a vacation home or cabin, or to help frequent travelers monitor a spa from anywhere.

Connextion offers more than just information and real-time alerts if there’s a problem. It also allows you to control select spa functions remotely.

Best of all, Connextion gives you the peace of mind that your spa is working properly and will be serviced when needed. The Connextion Remote Spa Monitoring System is available as a dealer-installed option on all Caldera® spa models.

Get More Use from Your Hot Tub During Hot Summer Months

While many hot tub users prefer to keep their spa water hot year-round, some people want to cool down in their spa during summer. Now Caldera® Spas offers a way to cool down and get more use from your hot tub during those months. With the CoolZone™ Hot Tub Cooling System, your Caldera Spas hot tub can both cool and warm spa water, something not possible with most hot tubs. It works much like an air conditioner, cooling spa water to as low as 60 degrees. When you’re ready to warm the water again, the system works in conjunction with your heater to efficiently raise water temperature in just a few hours.

Energy-efficient

The CoolZone system is highly efficient and can improve the energy use of your hot tub during normal operation because it can reduce the amount of time the heater needs to run. Over time, it can reduce your operating costs and save you money.

Therapeutic benefits

A cold soak can help muscle recovery by reducing swelling caused during a strenuous workout. When you leave the water, muscles warm up, bringing oxygenated blood back in to help muscles recover. Later, the CoolZone system can raise the spa water temperature to provide the benefits of warm water immersion, bringing more oxygenated blood to tissues, and increasing flexibility.

Family benefits

A hot tub can enhance communication within a family with more time together, free of distractions. By creating a cool getaway during a hot summer day, your Caldera spa can become a great place for a family to gather, cool off, and relax.
## UTOPIA SERIES

### CANTABRIA®

**Seal Capacity:** 8 adults  
**Dimensions (Subject to change):** 6.6’ x 12’ x 45”  
**Gallons:** 1,143 gallons / 4,310 liters  
**Dry Weight:** 1,310 lbs. / 595 kg

The Best, Most Comprehensive Warranties, Because Peace of Mind is an Important Part of the Wellness Equation

On the journey to a holistic state of well-being, it’s important to minimize stress and worry. Take control of what you can and let the rest go.

If you’re buying a hot tub to enhance your peace of mind and your overall wellness, you certainly don’t want to worry about whether that hot tub will work according to your expectations or what you’ll do if it doesn’t.

A Caldera® Spas hot tub delivers the peace of mind that only comes when you know that your investment is protected by the most complete warranty in the hot tub industry.

How do we do it? Simple. If you make the best hot tub with the most dependable, high-performance components, offering the best warranty is just the logical next step. From precision craftsmanship to rigorous quality control and testing, each Caldera spa is scrutinized for form, function, fit, and finish.

A legacy of trust
Caldera Spas was founded in 1976 and is one of the most heralded and trusted spa brands in the world. Caldera is manufactured by Watkins Wellness—the global industry leader having built more than one million hot tubs.

Quality assurance
From precision craftsmanship to rigorous quality control and testing, each Caldera spa is scrutinized for form, function, fit, and finish before it is ready for you. We are committed to the highest level of engineering and construction and back each spa with our exceptional ComfortGuard® limited warranty—one of the best in the industry.

Watkins Wellness™
Feel good. Live well.

Recognition
Caldera spas are recognized throughout the industry for performance, quality, and customer satisfaction. Recent awards and recognition include receiving eleven consecutive certifications for excellence in customer satisfaction from the consumer group SpaSearch.

At your service
Backed by the full expertise and resources of Caldera Spas, our professional retailers are committed to ensuring your long-term customer satisfaction. From purchase to installation to service and more, count on your professional retailer to make Caldera ownership easy and enjoyable.

A global leader
Watkins Wellness is owned by Masco Corporation. A Fortune 500 company, Masco is a global leader whose family of trusted home products includes:
