Environmental Handling Fees (EHFs) Product Clarification Guide: What you need to know

What is the product clarification guide? Why do I need it?

This guide is intended to assist members in identifying program products and the associated EHFs for the Call2Recycle Canada battery stewardship programs for British Columbia (BC), Manitoba (MB), Quebec (QC), and Prince Edward Island (PEI).

When were EHFs rolled out?

Environmental Handling Fees (EHFs) were introduced in the following manner:

- **August 2015:** EHFs applied in QC for stand-alone primary and rechargeable batteries and construction/renovation/garden tools sold with batteries.
- **February 1, 2017:** EHFs applied on primary batteries in BC & MB; fee schedule updated in QC.
- **January 1, 2018:** EHFs applied to batteries sold with or in E-TOYS, portable flashlights and spotlights, and smoke and carbon monoxide detectors in QC and MB.
- **January 1, 2019:** EHFs applied to rechargeable batteries in BC and MB, as well as to batteries sold in or with construction, renovation, and garden tools in Manitoba. EHF rates for select categories were also adjusted.
- **April 1, 2019:** EHFs applied to primary and rechargeable batteries, batteries sold in or with E-TOYS, portable flashlights and spotlights, smoke and carbon monoxide detectors, construction, renovation, and garden tools in PEI.

What's different between the versions?

- The **November 2016 (version 1)** product clarification guide was the original version released. The guide provided guidance around the fee assessment for primary batteries in BC and MB and provided an updated fee schedule for QC.
- The **September 2017 (version 2)** product clarification guide was the second version to reflect the inclusion of EHFs on batteries sold with or in E-Toys, portable flashlights and spotlights, and smoke and carbon monoxide detectors in Quebec and Manitoba.
- The **August 2018 (version 3)** product guide contained an updated fee schedule, effective January 1, 2019, that reflected a fee adjustment on primary batteries in BC, MB, and QC; a fee adjustment on rechargeable batteries and batteries sold in or with garden, construction and renovation tools in QC; the introduction of fees on rechargeable batteries in BC and MB..
- The **December 2018 (version 4)** product guide included the new fee schedule for PEI which was effective April 1, 2019.
The **October 2019 (version 5)** product guide includes the new fee schedule for Quebec and updated clarification and guidance, which is effective January 1, 2020. Also, effective January 1, 2020, measuring tools have been removed from the construction and renovation tools category.

Who do I contact with questions?

For questions, help navigating the product clarification guide, or fee assessments regarding individual product SKUs, please email productguidecanada@call2recycle.ca

PRODUCT CLARIFICATION GUIDE NOTES

1. Members must assess products against the definitions of each obligated product or sub-category of products to determine the applicability and appropriate EHF and may consult program staff for assistance in clarification where required.
 2. The list of Product Definitions and Clarifications may be revised periodically by the Program.
 3. Product must be sold with batteries and/or contain, by design, replaceable batteries.
 4. A battery that is professionally installed or cannot be safely removed or de-installed by the consumer, using common household tools such as a screwdriver, is exempt from an EHF. This includes batteries embedded into devices with warnings not to remove the battery or battery compartments requiring specialized tools for battery removal.
 5. In applicable provinces, the applicable EHF on *Batteries Sold With or In Products* (see EHF Schedule for more details) is per product, independent of chemistry (primary or rechargeable) and independent of the numbers of batteries included. Up to a maximum of 2 EHF's for Garden/Construction/Renovation Tools sold as multi-tool or combination kit.
 - Example 1: one (1) SKU containing a pack of 2 flashlights and 6 AA batteries warrants an EHF of \$0.20 (2 X \$0.10)
 - Example 2: one (1) SKU containing 3 Smoke Alarms, 4 AA and 1.9V warrants an EHF of \$0.30 (3 X \$0.10)
 - Example 3: one (1) SKU containing 3 construction tools with batteries and 2 flashlights warrants an EHF of \$4.20 (2 x \$2.00*) plus (2 x \$0.10)
 - Example 4: one (1) SKU containing 2 or more construction tools sold as a multi-tool or combination kit would carry an EHF of \$4.00 (2 x \$2.00*)
- *Fees may vary by province, please refer to the EHF schedule.*
6. In BC, if an applicable product (garden tools, construction/renovation tools, smoke and CO alarms, portable flashlights and spotlights, and e-toys) are sold with one or more bonus or extra stand-alone batteries, and EHF must be applied to the bonus or extra battery(ies) up to a maximum of two (2) EHF's.
 7. Small sealed lead acid batteries are subject to the EHF under the large rechargeable battery category in BC, MB and PEI but not in QC.
 8. Stand-alone rechargeable batteries that are sold with a charger are subject to EHF.

PRIMARY (SINGLE-USE) BATTERIES
Sold as Stand-Alone or Replacement Batteries

Type	Description	As of January 1, 2020			
		EHF by Province			
		BC	MB	QC	PEI
AA 	A standard sized cylindrical dry battery, measuring approximately 50 mm in length and 14mm in diameter.	\$0.05	\$0.04	\$0.04	\$0.04
AAA 	A standard sized cylindrical dry battery, measuring approximately 45 mm in length and 11 mm in diameter.	\$0.04	\$0.03	\$0.03	\$0.03
C 	A standard sized cylindrical dry battery, measuring approximately 50 mm in length and 26.2 mm in diameter.	\$0.08	\$0.08	\$0.07	\$0.08
D 	A standard sized cylindrical dry battery, measuring approximately 62 mm in length and 33 mm in diameter.	\$0.10	\$0.10	\$0.09	\$0.10
9V 	A standard sized rectangular prism dry battery, measuring approximately 49 mm high, 27 mm wide, 18 mm deep.	\$0.07	\$0.06	\$0.05	\$0.06
BUTTON 	Button and coin batteries come in various diameters and thicknesses, but generally a button or coin cell battery has a diameter greater than the height of the cell and is round.	\$0.02	\$0.02	\$0.01	\$0.02

PRIMARY (SINGLE-USE) BATTERIES

Sold as Stand-Alone or Replacement Batteries

The small, medium and large battery categories capture the format of all other stand-alone and replacement batteries, aside from the standard sizes of button, AA, AAA, C, D, 9V.
