

## The Home Depot 10MM Pound Milestone Spotlight

Tiffany Seto, Manager of Environmental Sustainability  
[The Home Depot](#)

### 1) Can you tell us how your partnership with Call2Recycle helps support The Home Depot's sustainability goals?

The Home Depot's core values are based on doing the right thing, and this commitment includes improving our stores, our communities and the environment. As the largest home improvement retailer in the United States, we are working to change the way customers think about environmental impact. Part of this is waste reduction, and this is where The Home Depot's partnership with Call2Recycle comes in. With in-store rechargeable battery collection in nearly 50 states, it's easy for customers to recycle batteries from cordless power tools, cell and cordless phones, laptops, digital cameras, two-way radios, camcorders, remote control toys and other portable electronics.

### 2) How does Call2Recycle bring value to your business and customers?

The many Call2Recycle drop-off locations right inside Home Depot stores make it easy and convenient for our customers to recycle and do the right thing. Through our partnership with Call2Recycle, we have helped recycle 10 million pounds of rechargeable batteries since the program inception, the first Call2Recycle retail participant in the United States to achieve this milestone!

### 3) What does this 10MM milestone mean to The Home Depot?

The Home Depot is very proud of this momentous achievement, and it's something our customers can be proud of as well. This milestone is hopefully one of many and will inspire our organization and our customers to continue striving and doing the right thing. This is part of the journey, and not the final destination, in our commitment to improve the lives of the people throughout our value chain.
