JUMBLING TOWER
INSTRUCTIONS

CONTENTS: 48 Wood Pieces, 1 Instruction Sheet

OBJECT: Be the player to take their turn RIGHT BEFORE the player who makes the tower fall.

SETUP:
- Place 3 blocks with their long sides next to each other.
- Leave a small space between blocks.
- Lay 3 blocks on top of the first three blocks as shown.
- Continue making levels using 3 blocks on each until all the blocks are used (16 levels in all!).
- You may only use one hand when removing and placing blocks during the game.
- You may touch a block to see if it’s loose.
- If you move it while you’re checking if it’s loose and don’t use it, be sure to put the block back in its original position.

LET’S PLAY: Youngest player goes first. Play moves left.

- Each player takes a turn removing one block from the middle or bottom of the tower and placing it on the top level.
- Place the block on the top level in the same pattern used to build the tower.
  Keep taking turns until one player causes the tower to tumble.
- The person whose turn was right before the person who made the tower tumble wins the game!

TO WIN: Be the player to take their turn RIGHT BEFORE the player who makes the tower fall.
