### SIGNIFICANCE

This property is significant under National Register criterion C, because it embodies the distinctive characteristics of architectural expressions and methods of construction that represent the period of community stabilization and economic slowdown (evidenced by simpler forms lacking ornamentation) and the theme of recreation and tourism (evidenced by structures built with natural materials set in scenic locations), from 1911 until 1945. It retains integrity of location, setting, materials, design, workmanship, feeling and association.
