I. Introduction

Background

Parties are required, under [Article 26](#) of the Convention on Biological Diversity (CBD), to submit national reports to the Conference of the Parties (COP) on measures taken towards the implementation of the Convention and their effectiveness in meeting the objectives of the Convention. In [decision 15/6](#), the Conference of the Parties adopted the guidance and draft template for the seventh and eighth national report. In the same decision, it requested Parties to submit their seventh national report by **28 February 2026**. In [decision 16/32](#), the Conference of the Parties endorsed the revised template for the seventh and eighth national reports. The seventh national reports are identified as a primary source of information for the global review of the implementation of the Kunming-Montreal Global Biodiversity Framework (KMGBF) to be undertaken at the seventeenth meeting of the Conference of the Parties (see figure 1). The procedure for the global review is presented in [decision 16/32](#).

The present document provides information and resource materials for the preparation of the seventh national report. It complements the guidance and template for the seventh and eighth national report adopted in Annex II of decision [15/6](#) and Annex I of decision [16/32](#). Additional supporting materials related to the preparation of the seventh national report will be made available on the website of the Convention on Biological Diversity on the seventh national reports portal (<https://www.cbd.int/reports/NR7>).

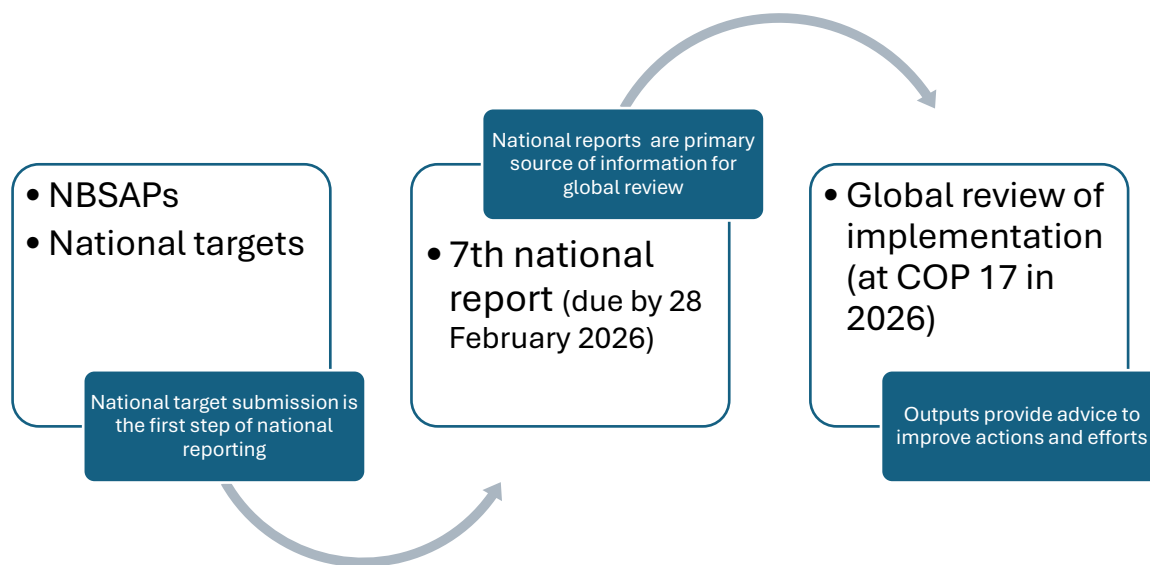

Figure 1. Links between the national targets, seventh national report and the global review

How the information from seventh national reports will be used

The seventh national report should provide an assessment of progress in the implementation of the Kunming-Montreal Global Biodiversity Framework, including progress towards national targets and national biodiversity strategies and action plans. Parties are requested to use indicators as set out

in in the monitoring framework (adopted in [decision 15/5](#), with technical updates agreed in [decision 16/31](#)). The assessment of progress will be based on the indicators. The submission of national targets is therefore required for the seventh national report. The section on the assessment of progress towards national targets in the seventh national report will automatically be pre-populated by the information entered in the national targets template of the online reporting tool (available at <https://ort.cbd.int/>).

While the completion of a national report is an obligation under the CBD, the preparation of the seventh national report should also be viewed as an opportunity to advance the implementation of the Convention and the KMGBF at the national level. The national reports represent a tool for reviewing progress in the implementation of the Convention and the KMGBF at the national level and, in particular, the implementation of national biodiversity strategies and action plans (NBSAPs) and national targets. The preparation of the national report also presents an opportunity to reflect on successes and/or obstacles and further actions needed. As such, the content of the national report should reflect national circumstances, challenges and priorities.

II. Process for the preparation and submission of the seventh national report

2.1. Before reporting

In [decision 15/6](#), the Conference of the Parties requested Parties to revise and update their NBSAPs by the sixteenth meeting of the Conference of the Parties. Parties not in a position to submit their revised and updated NBSAP were requested to submit their national targets by the sixteenth meeting of the Conference of the Parties, in accordance with the reporting template provided in annex I to that decision, as a standalone submission.

Parties may have different processes for setting national targets. National targets could be defined during the NBSAP revision or update process. Alternatively, the national targets could be identified prior to finishing the NBSAP. National targets could be actions that are already underway from an existing NBSAP. It should be noted that national targets must be entered separately in the online reporting tool in the [“National Targets” section](#) as a first step of the national reporting process, while NBSAPs should be uploaded in the [“NBSAPs” section](#) of the online reporting tool.

2.2 Initiating the reporting process

Parties are encouraged to initiate the process for preparing their seventh national report as early as possible to ensure its submission by **28 February 2026**. Timely submission of the seventh national report is particularly important considering the short time available for preparing the global review of progress in the implementation of the KMGBF, for consideration by the seventeenth meeting of the Conference of the Parties in October 2026.

Parties may wish to begin by planning the process they will follow for the preparation, review, approval and submission of the report, as well as identifying sources of information and data and making arrangements for reporting needs and functions. Furthermore, Parties may need to take into account the need for translation as the report should be submitted in one of the six official languages of the United Nations.

Generally, the preparation of the seventh national report will be overseen or led by the national focal point for the Convention on Biological Diversity. Countries may also wish to consider making use of existing coordinating or working bodies, or establishing new bodies to direct or otherwise support the preparation of the report. Parties could also use the bodies or mechanisms already established to coordinate the updating or revision of NBSAPs in alignment with the KMGBF.

National targets are the basis for national reporting (see figure 2). The national targets need to be submitted through the online reporting tool (which is based on the template agreed by the Conference of the Parties in [decision 15/6](#).)

The national targets template contains the following elements:

- National target name or title;
- Information on alignment to the corresponding goal or target of the KMGBF;
- Description of the national target, including information on how closely the national target aligns with the targets of the KMGBF,
- Identification of the main policy measures that will be put in place to reach the target;
- Associated commitments from actors other than national Governments;
- Means of and barriers to implementation.

On the basis of the mapping between the national target and relevant goals or targets of the KMGBF, the headline indicators associated with the national target are automatically generated. Parties can also include, on an optional basis, any component, complementary or national indicators they also intend to use to track progress towards their target.

As the national report format is based on the national targets a Party has set, Parties should review their national targets before starting to complete their national report. If any information in the submitted national targets is preliminary, or a draft, then Parties should update their targets as the first step of national reporting. Further, as the mapping of the national targets to the goals and targets of the KMGBF is used in the national report, Parties should make sure this mapping is accurate before starting the preparation of their national report. Similarly, Parties should ensure that the information on indicators that has been entered in the national targets' submission is accurate and up to date.

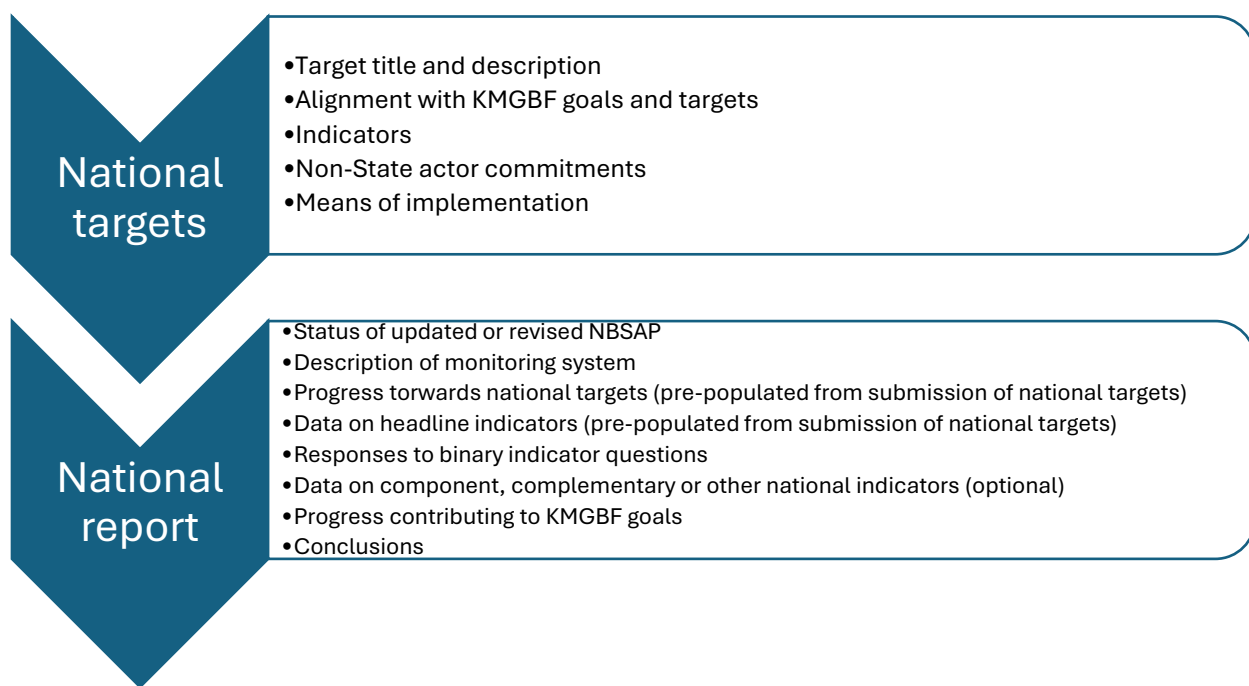

Figure 2. Links between information contained in the national targets and in the national report

What's new in the seventh national report?

- The submission of national targets in the online reporting tool as the first step of national reporting;
- Reporting progress towards national targets as opposed to global targets;
- Reporting the contribution that the implementation of targets is making towards global goals;
- The use of indicators as a part of the reporting template with required reporting on headline and binary indicators and optional reporting on component, complementary and national indicators;
- Specification of the role of non-state actors in contributing towards national targets (in the national target template);
- Structured information on the considerations included in Section C of the Framework (in the national target template);
- Financial reporting as part of the national reporting (not as a stand-alone report).

2.3. Use of the online reporting tool

The online reporting tool (ORT), available at: <https://ort.cbd.int>, is the official portal for the submission of the seventh national reports. The ORT pre-populates certain parts of the national report based on the submission of national targets. Once the national targets have been entered into the ORT, a report template specific to the country will be generated.

User roles

National Focal Point: National Focal Points to the CBD are automatically given the rights to publish information in the ORT. In addition, National Focal Points have the authority to nominate National Publishing Authorities and National Authorized users.

National Publishing Authority (“*CHM - Publishing Authority: National Report and Strategic Plan*”): This role gives the nominee the authority to: (a) submit to the ORT national information that will be automatically published online; and (b) validate and publish online (or edit it before publishing) national information submitted to the ORT by National Authorized Users (whose roles are specified below). The CBD National Focal Point can publish information in the ORT, and/or can nominate other users to act as National Publishing Authorities (see procedure below). The National Publishing Authority is authorized to nominate National Authorized Users.

National Authorized User (“*CHM – National Authorized User: National Report and Strategic Plan*”): This role could be assigned without limitation to national assistants, by the CBD National Focal Point, and/or the National Publishing Authority, and gives the nominee(s) the authority to submit to the ORT national information that will be accessible only to the National Publishing Authority pending validation from the National Publishing Authority.

Nominating National Authorized Users and National Publishing Authority

The CBD National Focal Points are authorized to nominate National Publishing Authorities and National Authorized Users online as follows:

- Sign in with your CBD account to: <https://chm.cbd.int/> (can also be accessed from the ORT by clicking “National users” at the top of the page)
- Click the **Submit** tab
- Click on the **User Management** tab.
- Search for existing users. If the person is already listed, you can add/modify their role and contact information.
- To add a new user: click on the **Add Authorized User** button and then follow the online instructions.
- Select the appropriate user role as described above.

Further guidance on the use of the online reporting tool is available in separate user guide at: <https://www.cbd.int/reports/nr7> as well as in the “Help” section of the ORT. The Secretariat is available to support Parties that have limited internet access or need support in entering the information in order to complete the report. Should Parties experience any difficulties in using the tool, they are invited to contact the Secretariat by e-mail to mea-cbd-monitoring-support@un.org.

III. General guidance

This section provides general guidance for the seventh national report as adopted by the Conference of the Parties [decision 15/6](#)¹. This general guidance is complemented by the more detailed information provided in this resource manual (present document).

Sources of information and data

The seventh national reports should use the most up-to-date data and information from appropriate sources, including headline indicators as well as component and complementary indicators, and other national indicators, where relevant. Other sources may include any recent reviews of national implementation or other national assessments, in particular any review of the implementation of NBSAPs, that provide a basis for developing national ambition or targets and/or revising or updating NBSAPs to implement the Framework. Parties could use information from earlier national reports as appropriate. National reports, reviews or communications submitted under relevant conventions and in connection with the Sustainable Development Goals could also be used as important information for assessing progress in the implementation of the Framework.

Stakeholder engagement and involvement

Further to decision 14/27, in which the Conference of the Parties decided that the submission of the next reports under the Convention and its Protocols would be synchronized, Parties should involve the respective national focal points for the Cartagena and Nagoya Protocols (if different from the primary national focal point for the Convention) in the preparation of the national report. National focal points of the biodiversity-related conventions and Rio conventions, as well as the national focal points for the Sustainable Development Goals and other relevant international and regional conventions should also be involved in the preparation of the national report.

Relevant stakeholders, including women, indigenous peoples and local communities, youth, civil society organizations, academia, the private sector, all levels of government and stakeholders from all other relevant sectors, should be involved in the preparation of the national report. Contributions from these stakeholders to the implementation of national targets, NBSAPs and the KMGBF, may be included in that national report.

Commitments by non-State actors should, where possible, be clearly identified in the submission of national targets in the ORT, and the national report should provide information on the implementation of those expected commitments.

In decision 15/6, actors other than national Governments were invited to develop and share, on a voluntary basis, commitments contributing to national biodiversity strategies and action plans and to the Kunming-Montreal Global Biodiversity Framework. The general principles and core reporting elements for commitments by actors other than national Governments were adopted in decision 16/32. The Secretariat is in the process of developing an online system for the submission of such commitments following the reporting elements agreed in that decision. Once operational, the

¹ For ease of reference, the Secretariat prepared a document containing the guidance (extracted from Annex II of decision 15/6, and the template (extracted from Annex I of decision 16/32), for the seventh national report. The document is available in all six United Nations languages at: <https://www.cbd.int/reports/NR7>

information submitted by actors other than national Governments will be made available online and Parties may wish to review this information when developing their national report.

Structure and format of the seventh and eighth national reports and use of the reports

To facilitate the preparation of the seventh national reports, each section of the report uses a standardized template that contains specific questions with a choice of possible answers or specific requests for substantive information. There is also space to provide narrative information to further substantiate the answers given in a focused and succinct manner. Links to relevant websites and publications where additional information may be found, including metadata for indicators, should be provided, reducing the need to include this information directly in the national report.

The seventh national report format contains five sections:

Section I Brief overview of the process of preparation of the report;

Section II Status of the revised or updated national biodiversity strategy and action plan in the light of the Kunming-Montreal Global Biodiversity Framework;

Section III Assessment of progress towards national targets;²

Section IV Assessment of progress related to the goals and targets of the Kunming-Montreal Global Biodiversity Framework;

Section V Conclusions on the implementation of the Convention and the Kunming-Montreal Global Biodiversity Framework;

Other information Information as requested in related decisions adopted by the Conference of the Parties at its fifteenth meeting

Use of indicators for monitoring and reporting

Parties are expected to report against each of the headline and binary indicators. The use of component, complementary national indicators is optional. What indicators are available for a Party to report against depends on how they have mapped their national targets to the targets of the KMGBF and which component, complementary and national indicators they have indicated they want to use to assess progress towards their national targets. To simplify the reporting process, the information for the indicators only needs to be entered once in the national report template. The values will automatically be populated throughout the national report where relevant. Further, where global data exists for the headline indicators, it will automatically be disaggregated and prepopulated for a country to use, if they so choose, in their national report. For each headline indicator, Parties will have the option to use their own national data, to use global data where available, to report that the indicator is not relevant and provide a description of why or to report that appropriate national or global data is not available and to describe the situation. The indicator information can be entered in the national report one indicator at a time, or it can be entered all at once. It can also be updated until the national report is officially submitted. The indicator information can be published separately from the complete national report.

² Note that reporting on the implementation of Goal D and Target 19 will include detailed assessments of support provided for the implementation of the Convention. However, information on gaps in implementation can also be included in the conclusions, in section V.

IV. Information on sections of the seventh national report

4.1 National targets and indicators

The reporting in the national report is on the basis of the national targets which have been submitted in the online reporting tool. Parties that have not submitted their national targets, or that have drafted but not submitted their national targets, are requested to finalize the national target submission in the online reporting tool as this is the first part of Section III of the seventh national report (as defined in the template for the seventh national report adopted in Annex I of decision 16/32).

Decision 16/32 requests all Parties to use headline indicators and to provide responses on binary yes/no questions, as set out in the monitoring framework of the KMGBF adopted in decision 15/5, in their national reports, and supplemented, as appropriate, by optional component and complementary indicators also included therein and other national indicators.

The template for national targets adopted in [decision 15/6](#) is reproduced below.

TEMPLATE FOR SUBMISSION OF NATIONAL TARGETS AS PART OF NATIONAL BIODIVERSITY STRATEGIES AND ACTION PLANS³ TOWARDS THE IMPLEMENTATION OF THE KUNMING-MONTREAL GLOBAL BIODIVERSITY FRAMEWORK

NATIONAL TARGETS			
National target 1 Full name/title of national target _____ _____ _____ _____	Alignment with global goals and targets <input type="checkbox"/> Goal A <input type="checkbox"/> Goal B <input type="checkbox"/> Goal C <input type="checkbox"/> Goal D <input type="checkbox"/> Global target 1 <input type="checkbox"/> Global target 2 ... <input type="checkbox"/> ... <input type="checkbox"/> Enabling conditions and/or other non-target elements of the Kunming-Montreal Global Biodiversity Framework (Please specify) _____ _____ _____	Degree of alignment <input type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low <input type="checkbox"/> High <input type="checkbox"/> Medium <input type="checkbox"/> Low <input type="checkbox"/> ... Explanation, including which aspects of the goal or target are covered (optional) _____ _____	Notes This table is to be repeated for each of the national targets. Please check all relevant national targets and indicate their degree of alignment with the global targets. High = covers all elements of the global target; Medium = covers most elements of the global target; Low = covers at least one element of the global target
	Please outline the main policy measures or actions that will be taken to achieve this national target. (optional) _____ _____		
	Indicators to be used to monitor this national target <u>Headline indicators</u> (drop-down menu of headline indicators for the global targets indicated above) <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <u>Component indicators</u>		

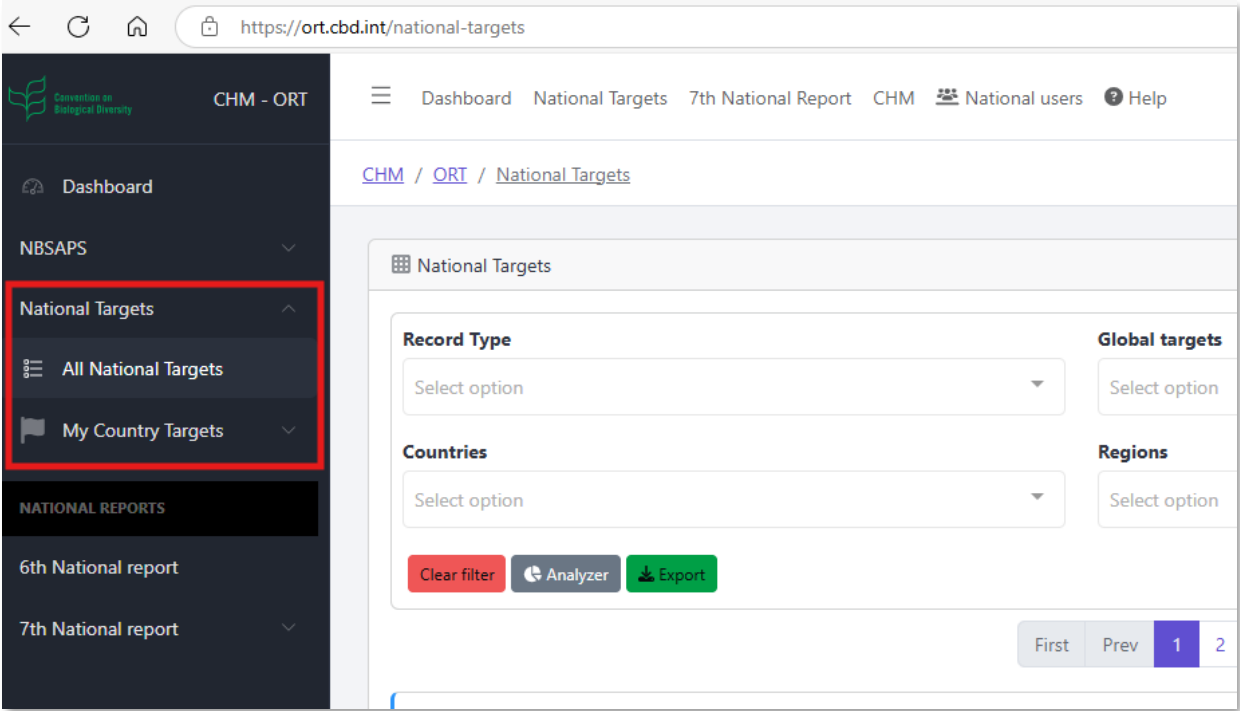

³ This information will be collected through the online reporting tool and it will also be utilized in the national reporting template.

	<p>(drop-down menu of component indicators for the global targets indicated above)</p> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <u>Complementary indicators</u> (drop-down menu of complementary indicators for the global targets indicated above) <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <u>Other national indicators</u> <input type="checkbox"/> _____ <input type="checkbox"/> _____ <input type="checkbox"/> _____ ...	
	<p>Non-State actor commitments (optional) List the non-state commitments towards this national Target:</p> <hr/> <hr/> <hr/> <p>Are there any overlaps or links between this national target and targets or commitments submitted as non-State actor commitments to the Kunming-Montreal Global Biodiversity Framework? If “Yes”, please indicate which commitment(s) and which actor(s).</p> <hr/> <hr/> <hr/>	<p>It is important to describe in this entry how the initiative involves the national Government <u>and</u> others. This box would be used to reduce double counting.</p>
	<p>Means of implementation and barriers to implementation (optional) Please indicate if additional means of implementation are needed for the attainment of this national target.</p> <input type="checkbox"/> Additional means of implementation are needed Explain: <hr/> <hr/> <hr/> <hr/> <input type="checkbox"/> Means of implementation available <input type="checkbox"/> Other <hr/> <hr/> <p>Additional explanation: (optional)</p> <hr/> <hr/>	

GLOBAL GOALS/TARGETS			
Global goals and targets	National target(s) contributing to this global target	Elements of the global targets addressed by national targets	Notes
Global goal or target (full name/title)	<i>(Automatically generated list from Party’s input in the national targets table)</i>	<i>(Free text)</i>	<p><i>This table is to be repeated for each global goal and target</i></p> <p><i>Response is required for each of the global targets</i></p>

GLOBAL GOALS/TARGETS		
	<p>Indicators used to assess the global goal or target <i>(Pre-populated from the indicators listed in the Party's input in the national targets table)</i></p> <p>Is there a reference period and national target which relates to the headline indicator? If yes,</p> <p>Explanation (optional) _____</p>	<p><i>Note that the headline indicator for each goal or target should be included in the list of indicators and associated with a relevant national target.</i></p>

The ORT was developed following this template. National targets should be entered in the ORT at: <https://ort.cbd.int/national-targets> . Guidance on the use of the reporting tool to enter national targets is available in the “Help” section of the online reporting tool⁴ and in the user guide for the online reporting tool⁵.

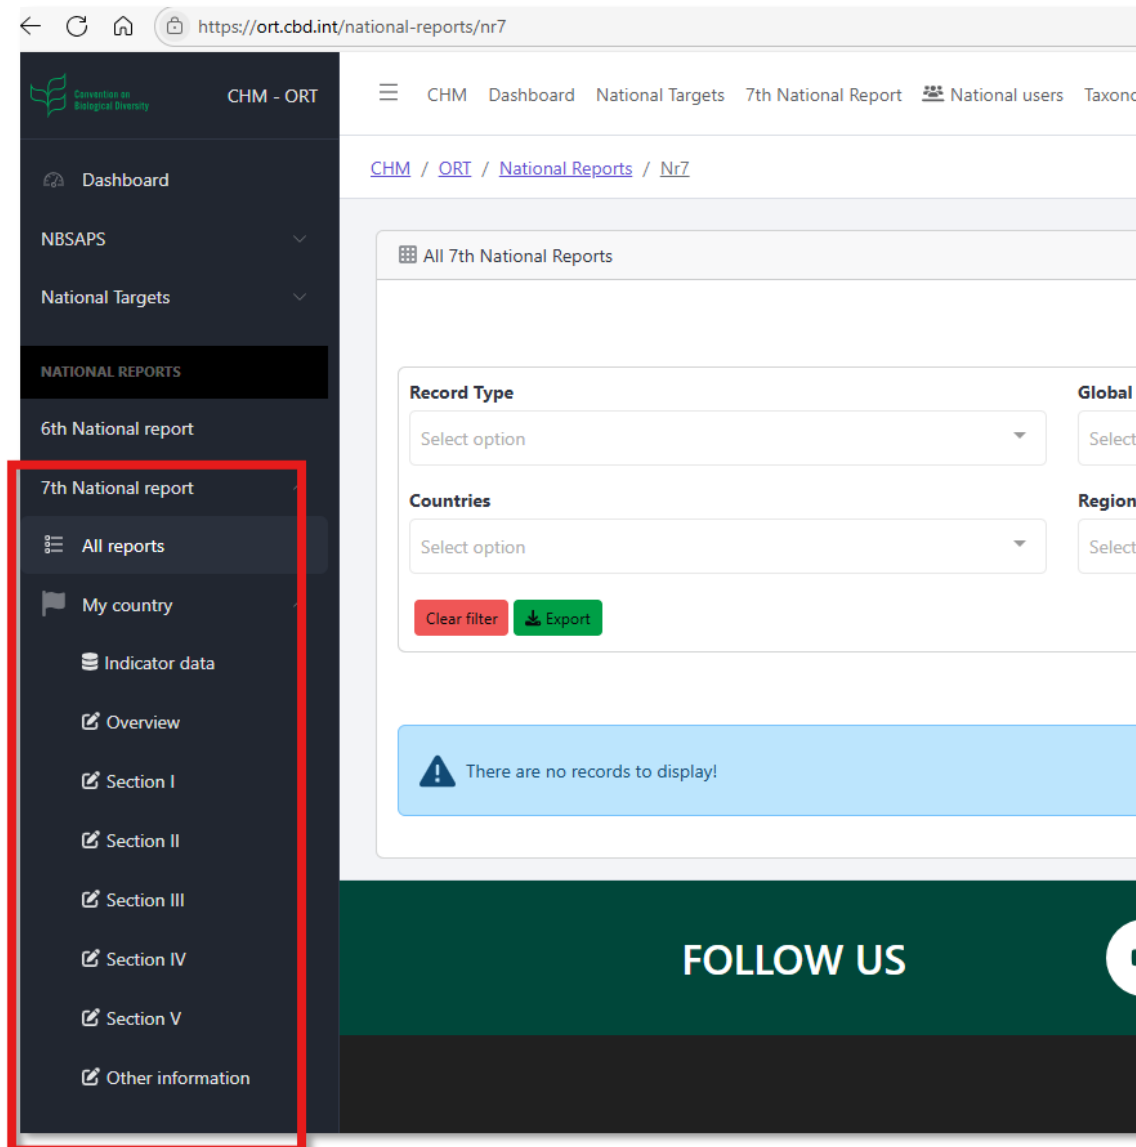

⁴ Using an Online Reporting Tool for National Targets on Biodiversity Conservation: <https://ort.cbd.int/knowledge-base/articles/664c60c6d15594956c35b71e>

⁵ User guide to the online reporting tool available at: <https://www.cbd.int/reports/NR7>

4.2 National report

The template for the seventh and eighth national reports was adopted in Annex I of decision 16/32⁶. The sections of the template are reproduced below, with some additional guidance on the type of information that can be provided.

The seventh national report section of the online reporting tool has been designed to reflect the template adopted in Annex I of decision 16/32 and is available at: <https://ort.cbd.int/national-reports/nr7>. Note that the online reporting tool includes a flexible functionality which allows Parties to draft and publish one or more sections of the report at a time, which would make partial information available for use in the global report in advance of submitting the full report.

The screenshot shows the web interface for the 7th National Report. The browser address bar displays <https://ort.cbd.int/national-reports/nr7>. The page header includes the CHM - ORT logo and navigation links: CHM, Dashboard, National Targets, 7th National Report, National users, and Taxonomy. A breadcrumb trail reads CHM / ORT / National Reports / Nr7. The main content area is titled "All 7th National Reports" and contains filter options for "Record Type" and "Countries", both with "Select option" dropdown menus. There are also "Clear filter" and "Export" buttons. A message box states "There are no records to display!". The footer features a "FOLLOW US" banner. A red box highlights the left sidebar menu, which includes: Dashboard, NBSAPS, National Targets, NATIONAL REPORTS, 6th National report, 7th National report, All reports, My country, Indicator data, Overview, Section I, Section II, Section III, Section IV, Section V, and Other information.

⁶ For ease of reference, the Secretariat prepared a document containing the guidance (extracted from Annex II of decision 15/6, and the template (extracted from Annex I of decision 16/32), for the seventh national report. The document is available in all six United Nations languages at: <https://www.cbd.int/reports/NR7>

Section I. Brief overview of the process of preparation of the report

In this section, Parties are expected to briefly describe the national process followed for the preparation of the report, including information on the authorities responsible for the preparation and submission of the report, coordination mechanisms or methodologies used, as well as consultations undertaken for preparing the report. Parties may wish to highlight any challenges encountered in the process of preparing the report.

Template for section I provided in Annex I of decision 16/32

I. Brief overview of the process of preparation of the report

Country name	
National authorities responsible for the preparation and submission of the report	
Contact person	
Contact details	
Briefly describe the process followed for the preparation of the present report. Responses may include the following: <ul style="list-style-type: none">• Coordination mechanisms and methodology for data collection and validation employed, if applicable, as well as key challenges encountered.• Consultations undertaken at various levels for preparing the present report, involving and engaging various stakeholders and taking into account national circumstances, including by using a whole-of-government and whole-of-society approach.	

Section II. Status of the revised or updated national biodiversity strategy and action plan in alignment with the Kunming-Montreal Global Biodiversity Framework

In this section, Parties are asked to provide information on the status of the revised or updated NBSAP in alignment with the KMGBF including information on the type of legal or policy instrument that the NBSAP has been adopted as.

Parties are also asked to describe the national biodiversity monitoring system and how it tracks progress in the implementation of the NBSAP. This could include describing at what level the monitoring system has been established, the scope of monitoring, leading agencies to collect, verify and process different sets of data, which target and action in the NBSAP are being monitored and by whom, and what kind of information system or database has been established.

Please note that some of this information is also requested in the NBSAP submission template in the online reporting tool. Parties may wish to ensure that the information provided in both places is the same.

II. Status of the revised or updated national biodiversity strategy and action plan in alignment with the Kunming-Montreal Global Biodiversity Framework

1.	<p>Has your country revised or updated its national biodiversity strategy and action plan in alignment with the Framework?</p>	<p><input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> In progress</p> <p>If the answer is “no” or “in progress”, please indicate the expected date of completion of the revision or updating of the national biodiversity strategy and action plan:</p> <p>_____</p>
2.	<p>Did your country involve and engage stakeholders in revising or updating its national biodiversity strategy and action plan?</p>	<p><input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p><input type="checkbox"/> If the answer is “yes”, please select among the following (drop-down menu):</p> <ul style="list-style-type: none"> <input type="radio"/> Indigenous peoples and local communities <input type="radio"/> Women <input type="radio"/> Youth <input type="radio"/> Local and/or subnational government <input type="radio"/> Private sector <input type="radio"/> Other stakeholders
3.	<p>Has your country’s revised or updated national biodiversity strategy and action plan been adopted as a policy or a legal instrument, and/or integrated into other strategies?</p> <p>_____</p>	<p><input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> In progress <input type="checkbox"/> Other</p> <p>If the answer is “no” or “other”, please specify and indicate the expected date of adoption:</p> <p>_____</p>
4.	<p>If the answer to question 3 is “yes”, indicate how your country’s revised or updated national biodiversity strategy and action plan has been adopted.</p>	<p><input type="checkbox"/> Adopted through legislation or otherwise by parliament <input type="checkbox"/> Adopted by the Council of Ministers, the Office of the President or of the Prime Minister, or an equivalent body <input type="checkbox"/> Adopted by the Ministry of the Environment or another sectoral ministry <input type="checkbox"/> Integrated into the poverty reduction strategy, sustainable development strategy, national development plan or another related strategy or plan <input type="checkbox"/> Other (please specify)</p> <p>_____</p>
5.	<p>Briefly describe the national biodiversity monitoring system and how it tracks progress in the implementation of the national biodiversity strategy and action plan.</p>	

Section III. Assessment of progress towards national targets

In this section, Parties are asked to report on progress in the implementation of their country's national targets and revised or updated national biodiversity strategy and action plan in alignment with the Framework. Targets are pre-populated from the submission of national targets or from the text of the global target when a national target does not exist for that global target. Please note that Parties must submit at least one national target.

Template for section III provided in Annex I of decision 16/32

III. Assessment of progress towards national targets

Please use the following template to report on progress in the implementation of your country's national targets and revised or updated national biodiversity strategy and action plan in alignment with the Framework. In cases where no national target is linked with one or more related global targets, it is suggested that countries report directly on progress contributing to the global targets.

National target (pre-populated from the submission of national targets or from the text of the global target when a national target does not exist for that global target)	
1.	Briefly describe the main actions taken to implement the target
2.	Indicate the current level of progress towards the target <input type="checkbox"/> On track to achieve target <input type="checkbox"/> Progress made but at an insufficient rate <input type="checkbox"/> No significant progress <input type="checkbox"/> Not applicable <input type="checkbox"/> Unknown <input type="checkbox"/> Achieved
3.	Provide a summary of progress towards the target, including the main outcomes achieved Provide a summary of key challenges encountered and different approaches that may be taken for further implementation
4.	Provide data on headline indicators used for assessing progress towards the target (pre-populated from the submission of national targets) <i>This section can be completed for targets with a headline indicator.</i> <input type="checkbox"/> Use national data sets <input type="checkbox"/> Use the data available from relevant global data sources provided <input type="checkbox"/> No data available. Please explain why: _____ <input type="checkbox"/> Not relevant. Please explain why: _____ <i>Parties that choose to use national data sets are requested to submit them in a tabular format and to specify the sources of data. Parties will submit data for each indicator once, even if the indicator is used for multiple goals and targets.</i> <i>Parties that choose to use globally or regionally available data sets will be provided with a tabular view of the data for the indicator.</i> <i>Parties that answer "no data available" are requested to briefly describe efforts under way to develop relevant indicators and data sets.</i> Comments (optional): _____

5.	<p>Respond to the questions for the binary indicator</p> <p><i>This section applies to targets with a binary indicator only</i></p>	<p><i>The binary indicators and questions will be included on the basis of the list adopted by the Conference of the Parties at its sixteenth meeting.</i></p> <p><i>Parties will submit data for each binary indicator only once, even if the indicator is used for multiple goals and targets.</i></p> <p>Comments (optional): _____</p>
6.	<p>Provide data on component, complementary or other national indicators used for assessing progress towards the target (optional) (pre-populated from the submission of national targets)</p>	<p><i>Parties may wish to provide data and sources of information in a tabular format.</i></p> <p>Comments (optional): _____</p>
7.	<p>Provide examples or cases to illustrate the effectiveness of the actions taken to implement the target. Provide relevant hyperlinks or attach related materials or publications, as needed.</p>	
8.	<p>Briefly describe how the implementation of the target relates to progress in achieving the related Sustainable Development Goals and associated targets, and the implementation of other related agreements (optional)</p>	

In this section, a country may encounter one of the following three situations:

- 1) If a country's national targets cover all the 23 global targets, the country reports on all its national targets in this section.
- 2) If a country's national targets cover some but not all of the global targets, the country is invited to report on all national targets as well as those global targets that are not covered by its national targets.
- 3) If a country has yet to enter national targets, it should enter national targets before proceeding (this section of the ORT requires a minimum one national target). There are fields in the national target template that are not covered in other parts of the national report. It is thus suggested that the national targets be entered as the first step in the reporting process. It is possible to use any existing national target, for example from an NBSAP that is still valid or from another policy document.

The metadata for the indicators was welcomed in decision 16/31 and is accessible in document CBD/COP/16/INF/3/Rev.1⁷. The metadata contains a summary of the methodology for the indicator, including the computation methods, guidance on possible disaggregations, information on data compilation processes, available data sources, and additional references and guidance material. UNEP-WCMC has made the metadata for the headline and binary indicators available through a webpage so that it can be more easily used.⁸ UNEP-WCMC has also developed a "Target Tracker" online tool⁹ to visualise progress towards each of the goals and targets of the KMGBF. The "Target

⁷ Revised guidance on using the indicators of the monitoring framework of the Kunming-Montreal Global Biodiversity Framework. CBD/COP/16/INF/3/Rev.1:

⁸ See <https://www.gbif-indicators.org/>

⁹ UNEP-WCMC Target Tracker: <https://target-tracker.org/en>

Tracker” shows progress at global, regional and national scales using headline indicators, derived and aggregated from national data where possible. A table containing links to the metadata associated with each of the headline indicators is also available in Annex I to this document.

In addition, Annex II to this resource manual contains key elements, guiding questions and resource materials including web links compiled to assist with the review of progress in the implementation of each of the 23 targets of the Framework.

Indicator data

In section III, the list of targets with their associated indicators will be generated from the submission of national targets. It is for this reason that Parties are encouraged to complete the national targets section in the online reporting tool as a first step in the preparation of their national report.

Data for the indicators can be added in section III under each of the indicators (as described Box 1. below). Alternatively, Parties may add data for the indicators under the “Indicator Data” tab in the left-hand menu of the online reporting tool before completing section III of the report.

In section III, Parties are asked to report on their targets by filling out the descriptive fields with qualitative data and information. Unless the indicator information has been previously entered, Parties will also be prompted to enter their indicator data (see Box 1).

Parties will need to report against all of the headline indicators. For each headline indicator, there are four options as follows:

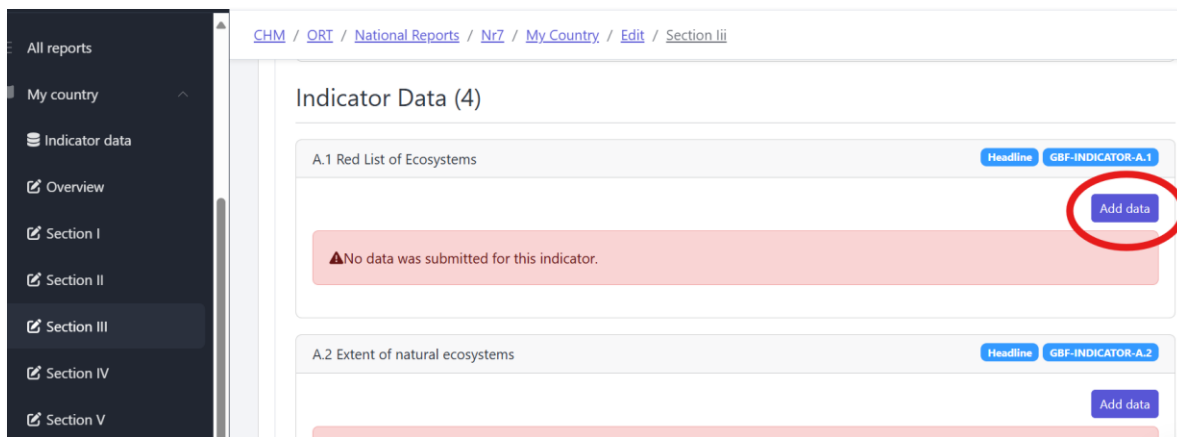

- 1) **Parties may report using their national data sets.** Parties are required to submit the information in a pre-determined tabular format. For each indicator, the Party will be asked to indicate the indicator value and unit, indicate if the value is a disaggregation of the headline indicator, the unit of the value and the year the value corresponds to. Additional information about the indicator can also be provided. Parties only need to submit data for each indicator once, even if the indicator is used for multiple goals and targets. See Box 1 for an example.
- 2) **Parties may report using global data which has been disaggregated.** In the online reporting tool, data for the headline indicators from global sources, where available and possible, will be disaggregated for each country and pre-populated in the online reporting tool. Parties will be able to review the global data and decide if they wish to use it in their national report or not.
- 3) **If a Party does not have suitable national data and they do not wish to use the available global data, they can choose to report no data.** If they do not report any data they will be asked to describe the situation, what any reporting challenges are and what efforts are under way to develop relevant indicators and data sets.
- 4) **A Party can report that the headline indicator is not relevant to their national context.** If they report that an indicator is not relevant, they will be asked to describe the situation and to explain why the indicator is not relevant.

For the binary indicators, Parties will be invited to answer the questions as adopted in Annex III to [decision 16/31](#).

Parties may also provide data for the component and complementary indicators and any related national indicators on a voluntary basis.

Box 1. Steps for adding indicator data in the online reporting tool

- For each of the headline indicators, click “Add data”.

- Select one of the options for the **source of data**.

A.1 Red List of Ecosystems

A screenshot of the data entry form for 'A.1 Red List of Ecosystems'. At the top, there is a progress bar with three steps: '1 Introduction', '2 Submission' (highlighted in blue), and '3 Review'. Below the progress bar are five buttons: 'Save Draft', 'Review', 'PDF', 'Print', and 'Close'. The form has a 'General' section and a 'Data' section. The 'Data' section is expanded, showing a 'Source of Data' field with four radio button options: 'Use national data set' (selected), 'Use the available data (pre-populated data)', 'No data available', and 'Not relevant'. At the bottom of the form, there is another set of buttons: 'Save Draft', 'Review', 'PDF', 'Print', and 'Close', and another progress bar with the same three steps.

- When selecting “**Use national data set**”, the data must be entered using the format of the sample template provided for download.

[Download sample template for the Indicator ↓](#)

The system strictly requires the data in the format of the sample template. Please download the sample template and fill in the data accordingly.

Choose File No file chosen

Comments

English (0) Arabic (0)

- Click on “Download sample template for indicator”.
- The screenshot below provides an example of a template for a specific indicator and the categories it contains.

	A	B	C	D	E	F	G	H
	Indicator code	Indicator	Does this data row represent a disaggregation	Disaggregation	Year	Unit	Value	Footnote
2	3.1	3.1 Coverage of protected areas and other effective area-based conservation measures			2025			
3	3.1	3.1 Coverage of protected areas and other effective area-based conservation measures			2024			
4	3.1	3.1 Coverage of protected areas and other effective area-based conservation measures			2023			
5	3.1	3.1 Coverage of protected areas and other effective area-based conservation measures			2022			
6	3.1	3.1 Coverage of protected areas and other effective area-based conservation measures			2021			

- You may wish to refer to Annex 1 of this manual, which contains the list of indicators, their codes, links to the metadata and additional information that may help fill out the template.
- Indicate if the value is a disaggregation of the headline indicator, the unit (e.g. hectares), the value (e.g. 5,000) and the year the value corresponds to. Additional information about

the indicator can also be provided. Parties only need to submit data for each indicator once, even if the indicator is used for multiple goals and targets.

- Once completed, save the file on your computer and upload it using the button “Choose file”.
- When selecting “**Use the available data (pre-populated data)**”, the system will look for national data within a global database which is identified in the metadata for that indicator. This global data is collected through the Target Tracker¹ which has been developed by UNEP-WCMC. The Target Tracker connects with different global databases which are maintained by international organizations listed in the metadata and allows this data to be pre-populated in the online reporting tool. If no global data is available through the Target Tracker, then this option will not be available for that indicator.
- When selecting “**No data available**” or “**Not relevant**”, Parties are requested to briefly describe efforts under way to develop relevant indicators, or why the indicator is not relevant.
- For each of the binary indicators, please click “Add response” and answer the questions by selecting either “No”, “Under development”, “Partially”, “Fully” or “Not applicable”.

Binary indicator: 6.b Number of countries adopting relevant regulations, processes and measures to reduce the impact of invasive alien species (KMGBF-INDICATOR-BIN-6)

[Add response](#)

6.1 Does your country have regulations and processes empowering relevant institutions to implement the measures necessary for a reduction in the introduction and impact of invasive alien species?

▲ Your country has not yet provided a response to this binary indicator question.

6.2 Does your country have measures in place for preventing the introduction and establishment of invasive alien species?

▲ Your country has not yet provided a response to this binary indicator question.

6.3 Does your country have measures in place for eradicating or controlling invasive alien species?

▲ Your country has not yet provided a response to this binary indicator question.

Section IV. Assessment of national progress contributing to the goals of the Kunming-Montreal Global Biodiversity Framework

In this section, for each of the 2050 goals, Parties are invited to provide a summary of national progress contributing to the global goals, including main outcomes achieved so far, as well as key challenges encountered, and different approaches that may be taken for further implementation in the future.

Headline, binary, component, and complementary and other national indicators are pre-populated from the submission of national targets. Steps to follow for entering indicator data is similar to the procedure described above for Section III.

IV. Assessment of national progress contributing to the goals of the Kunming-Montreal Global Biodiversity Framework

<i>2050 goals</i>	<i>Summary of national progress contributing to the global goals</i>	<i>Headline and binary indicators (pre-populated from the submission of national targets)</i>	<i>Component, complementary or other national indicators (pre-populated from the submission of national targets)</i>	<i>Source of data for indicators</i>
Goal ____		<i>(Relevant indicators will be provided for selection, as described in section III above)</i>	<i>(Relevant indicators will be provided for selection, as described in section III above) For national indicators, countries may need to submit relevant national indicators in a tabular format.</i>	

Section V. Conclusions on the national implementation of the Convention on Biological Diversity and the Kunming-Montreal Global Biodiversity Framework

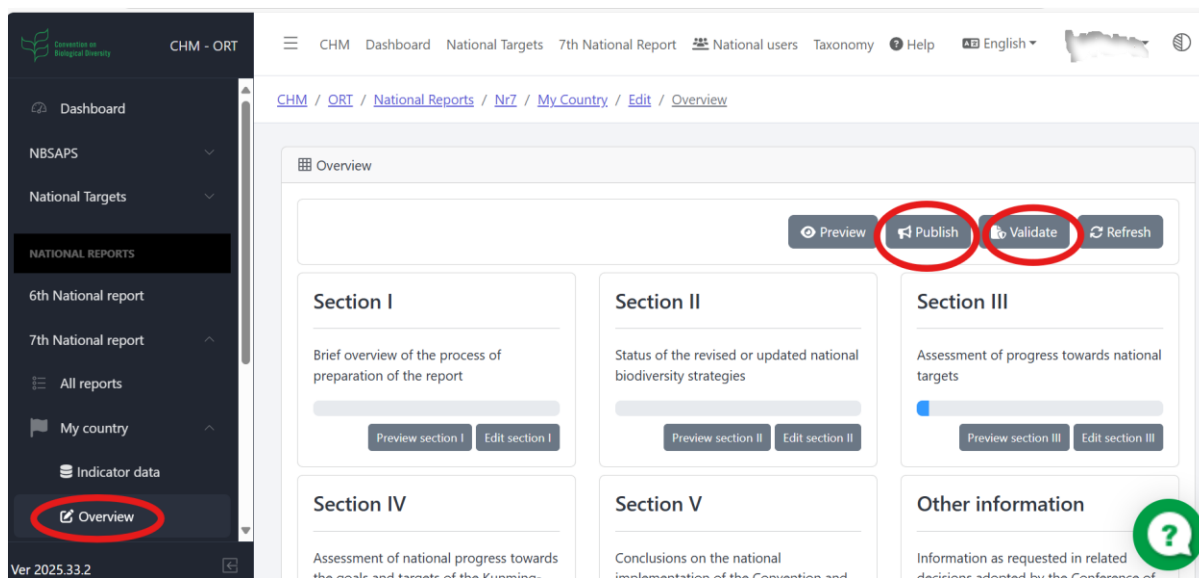

In section V, Parties are encouraged to provide a summary of the national implementation of the Convention on Biological Diversity and the Framework and all its sections, including their main achievements and challenges encountered, in particular those related to capacity, technical, technological, institutional and financial gaps and constraints, and support provided for implementation. Parties may refer to cross-cutting challenges affecting the implementation of the Convention and the Framework or specific obstacles that have hindered progress in the implementation of their NBSAP or in reaching specific national targets. Examples of cross cutting challenges and obstacles that Parties may wish to report on include lack of adequate financial, human and technical resources; difficulties regarding interministerial or inter-agency cooperation and coordination; lack of timely and reliable access to knowledge, information and data; lack of the scientific expertise needed to support project development and management; and lack of access to relevant technology for implementation. Parties should try to avoid duplication if such information is covered in the sections above.

Other information. Information as requested in related decisions adopted by the Conference of the Parties at its fifteenth meeting

In this section, Parties may wish to include information on the implementation of decisions adopted by the Conference of the Parties at its fifteenth meeting, such as the long-term strategic framework for capacity-building and development (decision 15/8, annex I), the strategy for resource mobilization (decision 15/7, annex I), the Gender Plan of Action (2023–2030) (decision 15/11, annex), and/or on subjects such as mainstreaming of biodiversity, plant conservation or any other relevant information.

Box 2. Steps to preview and publish a national report in the online reporting tool

In the **“Overview section”**, first use the **“Validate”** button to check if any mandatory fields are missing. You may press **“Preview”** to see all sections of the national report at once. When ready to publish the report, press the **“Publish”** button.

A PDF file of the entire report may be generated from the overview page.

V. Additional resources

Annex II provides links to key decisions of the Conference of the Parties, key elements, guiding questions and resource materials for the 23 targets of the Kunming-Montreal Global Biodiversity Framework.

Additional resources, including a user guide for the online reporting tool, and links to webinars, is made available at: <https://www.cbd.int/reports/NR7>

If you have any questions about completing your national report or questions about this manual, please contact secretariat@cbd.int.

Questions relating to the use of the online reporting tool may be sent to mea-cbd-monitoring-support@un.org.

Annex I.¹⁰ Headline indicators and voluntary component and complementary indicators in the monitoring framework for the Kunming-Montreal Global Biodiversity Framework, metadata and optional disaggregations

<i>Goal/target</i>	<i>Headline or binary indicator</i>	<i>Metadata</i>	<i>Optional disaggregations</i>	<i>Component indicator</i>	<i>Complementary indicator</i>
A	A.1 Red List of Ecosystems	Metadata A.1	For indicator A.1: By realm, biome and ecosystem functional group (Global Ecosystem Typology levels 2 and 3 or equivalent) By indigenous and traditional territories By protected areas or other effective area-based conservation measures By drivers (matched to the International Union for Conservation of Nature Threats Classification Scheme)	A.CT.1 Ecosystem Intactness Index A.CT.2 Ecosystem Integrity Index A.CT.3 Species Habitat Index A.CT.4 Biodiversity Habitat Index A.CT.5 Biodiversity Intactness Index A.CT.6 Protected Connected Index A.CT.7 Protected Area Representativeness and Connectedness Indices A.CT.8 Number of extinctions averted	A.CY.1 Forest area as a proportion of total land area A.CY.2 Rate of tree cover loss A.CY.3 Mountain Green Cover Index A.CY.4 Continuous global mangrove forest cover A.CY.5 Mangrove forest fragmentation A.CY.6 Mangrove extent A.CY.7 Global salt marsh extent A.CY.8 Wetland Extent Trends Index A.CY.9 Forest Fragmentation Index A.CY.10 Forest Landscape Integrity Index A.CY.11 Global Vegetation Health Products 8.CT.2 Bioclimatic Ecosystem Resilience Index A.CY.12 Relative magnitude of fragmentation A.CY.13 Ocean Health Index A.CY.14 Extent of physical damage to predominant seafloor habitats A.CY.15 River Fragmentation Index A.CY.16 Mean species abundance 3.CT.2 Species Protection Index A.CY.17 Changes in plankton biomass and abundance A.CY.18 Comprehensiveness of conservation of socioeconomically and culturally valuable species
	A.2 Extent of natural ecosystems	Metadata A.2	For indicator A.2: By realm, biome and ecosystem functional group (Global Ecosystem Typology levels 2 and 3 or equivalent) By indigenous and traditional territories By natural and seminatural ecosystem, if feasible	A.CT.9 Evolutionarily Distinct and Globally Endangered Index A.CT.10 Living Planet Index A.CT.11 Wild Bird Index	A.CY.17 Changes in plankton biomass and abundance A.CY.18 Comprehensiveness of conservation of socioeconomically and culturally valuable species
	A.3 Red List Index	Metadata A.3	For indicator A.3: ¹¹		4.CT.1 Number of (a) plant and (b) animal genetic resources for food and agriculture

¹⁰ In line with paragraphs 2 (a) and (b) of annex I to decision [15/5](#), the relevant data and the methodology for indicators must be publicly available and accessible for all.

¹¹ Specific Red List Index disaggregations are also included in the relevant targets as complementary indicators.

<i>Goal/target</i>	<i>Headline or binary indicator</i>	<i>Metadata</i>	<i>Optional disaggregations</i>	<i>Component indicator</i>	<i>Complementary indicator</i>
	A.4 The proportion of populations within species with an effective population size greater than 500	Metadata A.4	By realm, biome and ecosystem functional group (Global Ecosystem Typology levels 2 and 3 or equivalent) By migratory species By drivers (matched to the International Union for Conservation of Nature Threats Classification Scheme) For indicator A.4: Species Taxonomic groups		secured in either medium- or long-term conservation facilities 4.CT.4 Proportion of local breeds classified as being at risk of extinction A.CY.19 Red List Index (wild relatives of domesticated animals) A.CY.20 Species Status Information Index A.CY.21 Expected loss of phylogenetic diversity A.CY.22 Proportion of populations maintained within species

Target 1	
Key elements of the target¹⁴	<p>All areas are under spatial planning and/or other management processes, addressing land/sea use change</p> <p>Ecosystems covered by spatial planning/management processes as specified in the national target</p> <p>Spatial planning is participatory, integrated and biodiversity-inclusive</p> <p>Loss of areas of high biodiversity importance brought close to zero by 2030</p> <p>Spatial planning/management processes respect the rights of IPLCs.</p>
Guiding questions to be used for review of progress	<p>Has your country developed a national spatial plan or put in place effective management processes?</p> <p>If yes, has the national spatial plan covered all areas of the country or are these effective management processes participatory, integrated and biodiversity inclusive?</p> <p>Who has been involved in the development and implementation of the national spatial plan or effective management processes and what are their roles?</p> <p>What are key actions or measures taken to implement the national spatial plan and what are outcomes achieved?</p> <p>How effective are these management processes or the national spatial plan in bringing the loss of areas of high biodiversity importance to zero or addressing land or sea use change?</p> <p>What are main challenges encountered and further measures identified to address them?</p>

Target 2

Key elements of the target	<p>By 2030, at least 30% of areas of degraded terrestrial ecosystems are under restoration</p> <p>By 2030, at least 30% of areas of degraded inland ecosystems are under restoration</p> <p>By 2030, at least 30% of areas of degraded marine and coastal ecosystems are under restoration</p> <p>Restoration is effective and enhancing biodiversity, ecosystem functions and services, as well as ecological integrity and connectivity.</p>
Guiding questions to be used for review of progress	<p>Has your country identified or assessed degraded areas or ecosystems that need to be restored?</p> <p>What are key actions or measures taken to restore some or all of these areas or ecosystems?</p> <p>Who are actors involved in these actions?</p> <p>How effective are these measures in terms of enhancing biodiversity, ecosystem functions or services as well as ecological connectivity and integrity?</p> <p>What outcomes have been achieved and what are key challenges encountered?</p> <p>What are further measures or needs identified for further implementation?</p>

Target 3	
Key elements of the target	<p>By 2030, at least 30% of terrestrial and inland water areas are included in the system of protected areas and other effective area-based conservation measures, recognizing indigenous and traditional territories where applicable.</p> <p>By 2030, at least 30% of marine and coastal areas are included in the system of protected areas and other effective area-based conservation measures, recognizing indigenous and traditional territories where applicable.</p> <p>By 2030, at least 30% of areas of particular importance for biodiversity are included in the system of protected areas and other effective area-based conservation measures, recognizing indigenous and traditional territories where applicable.</p> <p>By 2030, at least 30% of areas of particular importance for ecosystem functions and services are included in the system of protected areas and other effective area-based conservation measures, recognizing indigenous and traditional territories where applicable.</p> <p>Systems of protected areas and OECMs effectively conserve and manage terrestrial, inland water and marine and coastal areas,</p> <p>Systems of protected areas and OECMs are ecologically representative.</p> <p>Systems of protected areas and OECMs are well connected.</p> <p>Systems of protected areas and OECMs are equitably governed.</p> <p>Systems of protected areas and OECMs are integrated into the landscape and seascapes and the ocean.</p> <p>Sustainable use where appropriate in such areas is fully consistent with conservation outcomes.</p> <p>Systems of protected areas and OECMs recognize and respect the rights of IPLCs including over their traditional territories.</p>
Guiding questions to be used for review of progress	<ul style="list-style-type: none"> . What is the current extent of protected areas and OECMs on land, in inland waters and in marine and coastal areas in the country? How representative are these areas of the eco-regions in the country? Do these areas cover areas particularly important for biodiversity, ecosystem functions and services? How are they connected and integrated into the wider landscape and seascape and ocean? . How effective are existing protected areas and OECMs in terms of conserving and managing terrestrial, inland water and marine and coastal areas and achieving their conservation outcomes and what measures are taken to improve management effectiveness? . What measures are in place to ensure the equitable governance of protected areas and OECMs? How do these measures take into account the rights of IPLCs. . How effective are sustainable use and benefit-sharing measures in place and are they consistent with conservation outcomes? . What are main challenges for the implementation of this target? . What additional resources and capacities are needed to achieve the national target if any or contribute to the global target?

Target 5	
Key elements of the target	<p>Ensure that use and harvesting of wild species is sustainable, preventing overexploitation, minimizing impacts on non-target species and ecosystems.</p> <p>Ensure that the trade in wild species is sustainable, preventing overexploitation, minimizing impacts on non-target species and ecosystems.</p>

	<p>Ensure that use, harvesting and trade of wild species is safe, reducing the risk of pathogen spillover</p> <p>Ensure that the use, harvesting and trade of wild species is legal</p> <p>Apply the ecosystem approach in addressing sustainable, safe and legal use and harvesting and trade of wild species</p> <p>Respect and protect customary sustainable use by IPLCs in addressing sustainable, safe and legal use, harvesting and trade of wild species</p>
Guiding questions to be used for review of progress	<p>What measures has your country taken to ensure that use, harvesting and trade of wild species is sustainable, safe and legal?</p> <p>How did your country minimize impacts of harvesting and trade of wild species on non-target species and ecosystems including reducing the risk of pathogen spillover?</p> <p>What approach(es) has your country taken to ensure the sustainable, safe and legal use and harvesting and trade of wild species?</p> <p>What measures has your country taken to protect customary sustainable use by IPLCs?</p> <p>How effective are these measures and what needs to be done further to achieve this target?</p>

Target 6	
Key elements of the target	<p>Eliminate, minimize, reduce and /or mitigate impacts of Invasive alien species on biodiversity</p> <p>Eliminate, minimize, reduce and/or mitigate impacts of IAS on ecosystem services</p> <p>Identify and manage pathways of the introduction of IAS</p> <p>Prevent the introduction and establishment of priority IAS</p> <p>Reduce the rates of introduction and establishment of other known or potential invasive alien species by at least 50% by 2030</p> <p>Eradicate or control IAS especially on priority sites, such as islands</p>
Guiding questions to be used for review of progress	<p>Has your country undertaken the assessment of the status of invasive alien species and their impacts on biodiversity, ecosystem services, human health, food production and the economy?</p> <p>Has your country established a system to monitor the introduction of IAS including their pathways and risks? What coordination and collaboration mechanisms are in place to address IAS?</p> <p>What measures are in place to prevent, manage, control and eradicate the introduction and establishment of IAS? How effective are these measures?</p> <p>What measures has your country undertaken to eliminate, minimize, reduce and/or mitigate impacts of IAS on biodiversity and ecosystem services?</p> <p>What measures has your country taken to eradicate or control IAS on priority sites?</p> <p>What are main challenges in achieving this target?</p>

Target 7	
Key elements of the target	<p>Reduce pollution risks and the negative impact of pollution from all sources by 2030 to levels that are not harmful to biodiversity, ecosystem functions and services, considering cumulative effects</p> <p>Reduce excess nutrients lost to the environment by at least half including; through more efficient nutrient cycling and use</p> <p>Reduce the overall risks from pesticides by at least half, including through integrated pest management, based on science and taking into account food security and livelihoods</p> <p>Reduce the overall risks of highly hazardous chemicals by at least half.</p> <p>Work towards eliminating plastic pollution</p>

Guiding questions to be used for review of progress	<p>Has your country made assessments of negative impacts of pollution on biodiversity, ecosystem functions and services?</p> <p>Have the assessments made covered all sources of pollution and considered the level of harm that pollution may cause to biodiversity, ecosystem functions and services as well as cumulative effects?</p> <p>What measures has your country taken to reduce the negative impacts of pollution on biodiversity, ecosystem functions and services including reducing excess nutrients lost to the environment and risks from pesticides and highly hazardous chemicals? How effective are these measures?</p> <p>What factors did your country take into account when developing and implementing these measures?</p> <p>What measures has your country taken to work toward eliminating plastic pollution?</p>

Target 12	
Key elements of the target	<p>Increase the area and quality and connectivity of, access to and benefits from green and blue spaces in urban and densely populated areas.</p> <p>Biodiversity-inclusive urban planning.</p> <p>Mainstreaming the conservation and sustainable use of biodiversity in urban and densely populated areas.</p>
Guiding questions to be used for review of progress	<ul style="list-style-type: none"> · What processes has your country put in place to plan and manage green and blue spaces? How were these made more biodiversity inclusive? · What measures have been taken or being taken by sub-national governments, states/provinces and cities to increase the area, quality, connectivity of, access to and benefits from green and blue spaces? · How effective are these measures and what additional and capacities are needed?

ENCORE (Exploring Natural Capital, Opportunities, Risks and Exposure	https://www.encorenature.org/en

Target 16	
Key elements of the target	<p>Sustainable consumption choices by establishing supportive policy, legislative or regulatory frameworks and improving education and access to relevant and accurate information and alternatives.</p> <p>Reducing global footprint of consumption.</p> <p>Halving global food waste.</p> <p>Significantly reducing overconsumption.</p> <p>Substantially reducing waste generation.</p>
Guiding questions to be used for review of progress	<p>What measures has your country taken to encourage sustainable production and consumption? How do these measures address food waste and waste generation?</p> <p>Has your country made an assessment of the ecological, economic, and social costs and benefits of addressing unsustainable consumption and production?</p> <p>Who are the actors that may be affected and how can they be involved and their needs addressed?</p> <p>How effective are these measures and what are main challenges?</p>

Target 16 resource materials	
Sustainable production and consumption: a handbook for policy makers, UNEP (2019)	https://www.unep.org/resources/report/sustainable-consumption-and-production-handbook-policymakers
Food Waste Index Report, UNEP (2024)	https://www.unep.org/resources/publication/food-waste-index-report-2024

Cartagena Protocol on Biosafety, documents on assessment and review, CBD	https://bch.cbd.int/protocol/issues/cpb_art35_doc.shtml

Target 18	
Key elements of the target	<p>Identify, eliminate, phase out and reform incentives, including subsidies, harmful for biodiversity by 2025.</p> <p>Incentives, including subsidies, harmful for biodiversity.</p> <p>In a proportionate, just fair, effective and equitable way.</p> <p>Substantially and progressively reduce incentives, including subsidies, harmful for biodiversity, by at least \$500 billion per year by 2030, starting with the most harmful incentives.</p> <p>Scale up positive incentives.</p>
Guiding questions to be used for review of progress	<p>Has your country identified incentives, including subsidies, harmful for biodiversity?</p> <p>What measures or actions has your country taken to eliminate, phase out or reform harmful incentives?</p> <p>What measures or actions has your country taken to scale up positive incentives? How do these actions contribute to addressing the main threats to biodiversity?</p> <p>Who are stakeholders that may be affected by these measures, how can they be involved and how are their concerns and needs addressed?</p> <p>How effective are these measures and what are main challenges?</p>

Increasing participation in incentive programs for biodiversity conservation, journal article (2013)	https://esajournals.onlinelibrary.wiley.com/doi/abs/10.1890/12-1878.1

Target 19	
Key elements of the target	<p>Increasing total biodiversity related international financial resources from developed countries and from countries.</p> <p>Significantly increasing domestic resource mobilization.</p> <p>Leveraging private finance, promoting blended finance, implementing strategies for raising new and additional resources, and encouraging the private sector to invest in biodiversity.</p> <p>Stimulating innovative schemes such as payment for ecosystem services, green bonds, biodiversity offsets and credits, benefit-sharing mechanisms, with environmental and social safeguards.</p> <p>Optimizing co-benefits and synergies of finance.</p> <p>Enhancing the role of collective actions, including by indigenous peoples and local communities, Mother Earth centric actions and non-market-based approaches.</p> <p>Enhancing the effectiveness, efficiency and transparency of resource provision and use.</p>
Guiding questions to be used for review of progress	<p>Has your country undertaken a financing needs assessment for the implementation of your NBSAP and the Framework at the national level?</p> <p>Has your country developed a national biodiversity financing plan or a similar instrument?</p> <p>How much financial resources has your country provided to biodiversity from the public and private sectors and other sources? What measures has your country taken to mobilize financial resources for the implementation of the NBSAP and the Framework? What measures has your country taken to align the financial flows to biodiversity?</p> <p>What innovative financing solutions or schemes has your country identified and implemented?</p> <p>What measures has your country undertaken to enhance synergies among biodiversity, climate and other financing?</p> <p>For developing countries how much has your country received from international sources including through ODA</p> <p>For developed countries how much has your country provided to developing countries through various channels?</p> <p>What are main challenges for mobilizing resources?</p>

Biodiversity, technology transfer, and capacity building: A World Bank perspective and case study, journal article (2014)	https://doi.org/10.5172/impp.2004.6.2.247

Target 21	
Key elements of the target	<p>Improved accessibility to relevant biodiversity data, information and knowledge</p> <p>Best available information and knowledge is accessible to decision-makers, practitioners and the public</p> <p>Communication, awareness-raising, education</p>

	<p>Knowledge management</p> <p>Monitoring</p> <p>Research</p> <p>Knowledge, innovation, practices and technologies of IPLCs</p>
Guiding questions to be used for review of progress	<p>Has your country developed programmes or is implementing programmes to generate data, information and knowledge on biodiversity? What are main gaps?</p> <p>What mechanisms or systems has your country established to manage and share biodiversity data, information and knowledge? How do these mechanisms address traditional knowledge, innovations, practices and technologies?</p> <p>To what extent is biodiversity data, information and knowledge in your country being used for awareness-raising, communication and education purposes?</p> <p>How effectively is biodiversity data, information and knowledge used by decision-makers, practitioners and the public to guide the governance and participatory management of the conservation and sustainable use of biodiversity?</p> <p>What actions has your country taken to access and use relevant technologies for knowledge generation, discovery, collection, organization, integration, sharing and use?</p> <p>What are main challenges and main needs for further support?</p>

Target 22	
Key elements of the target	<p>Participation of IPLCs, women and girls and persons with disabilities.</p> <p>Access to justice and information.</p> <p>Rights of IPLCs over their cultures, lands, territories, resources and traditional knowledge.</p> <p>Full, equitable, inclusive, effective and gender-responsive representation and participation in decision-making related to biodiversity by IPLCs, women and girls, and persons with disabilities.</p>

	<p>Access to justice related to biodiversity by IPLCs, women and girls, and persons with disabilities, persons with disabilities.</p> <p>Full protection of environmental human rights defenders.</p>
<p>Guiding questions to be used for review of progress</p>	<p>What processes or mechanisms did your country put in place to ensure that participation of IPLCs in decision-making processes?</p> <p>What legislative and policy measures has your country taken to protect the rights of IPLCs over their lands, territories and resources?</p> <p>What measures has your country taken to promote the gender equality and participation of women and girls and ensure the participation of children and youth and persons with disabilities?</p> <p>What mechanisms has your country adopted to ensure the full protection of environmental human rights defenders as well as timely and accurate information and access to justice for them?</p> <p>How effective are these measures or mechanisms and what are main challenges.</p>
