

IMPLANTS: ACCEPTING THE CHALLENGE

Main Speaker: Dr. David Troncoso

Biologic and Aesthetic Evidence for Implant Supported Restorations in the Anterior Zone: A predictable option.

Date: Thursday, November 10, 2011

Lecture: 6:00 pm - 9:00 pm

Dinner: 9:00 pm - 11:00 pm

Place: Sheraton Convention Center Hotel

Tuition fee: \$65.00 (Valid thru Oct. 31, 2011)
\$75.00 (After Oct. 31, 2011)

CE Credits: 3 hrs.

Topics:

- ✓ Possible therapeutic options for cases involving implants in the "Aesthetic Zone".
- ✓ Changes of paradigms and new evaluation criteria of aesthetic results based on new markers and indexes such as PES & WES (pink / white esthetic score).
- ✓ Possible risk factors from a surgical and prosthetic point of view (SAC system) for guiding the clinician towards different levels of complexity in the anterior zone.
- ✓ Chronological classification for implant placement in relation to tooth extraction based on the healing process of the socket and the sequence of biological events in respect to the buccal plate, based on evidence.
- ✓ Criteria to consider in cases involving adjacent implants in respect to hard and soft tissues.
