

AMERICAN
KENNEL CLUB

Questions and Answers: OEMS Webinar

1. Why was no mention made of the Advanced Panel Management?

The Advanced Panel Management can be used, but the technology associated with it is very old and outdated. Most people/clubs find it cumbersome and difficult to use. Additionally, most people need to contact AKC to allow the user to access this tool. It is being phased out and therefore, we encourage people to use the Quick Submit tool.

2. When adding Premium List information, does this only apply for AKC Licensed/Sanctioned events?

If the NADD or BHA events are included in the event premium list, that can be added through document management. However, if there is a separate premium list for those events, they cannot be added as each document must be associated with its event number.

3. How do I get my club number and password?

A club officer must email eventplans@akc.org to request the club ID & password.

4. Our club live streams our event on Facebook. Is this something now that the box needs to be checked and make sure is in compliance?

You will need to contact akctv@akc.org to inquire about this matter.

5. Is there a future plan to modify the online system to include the ability to create new events?

Due to the extensive conflict checks that must be done on most new events, there are no plans to add the ability to create events in the online system.
