INTRODUCTION
The American Whippet Club (AWC), a national organization dedicated to the Whippet, would like to provide you with some basic information. Included in this brochure is a bibliography of related reading materials and the address of the Club Secretary who can furnish you with further information concerning regional clubs and activities, as well as offer two detailed breed brochures.

HISTORY
Small Greyhound-type dogs have existed for centuries and can be found in art works of great antiquity. There are various theories about the recent development of today’s Whippet, the most commonly held being that they originated roughly two hundred years ago in the industrial areas of Northern England and Wales from crosses of small Greyhounds and Terriers. They were used for poaching small game for the table and, on “off” days, for racing on flat straight courses, running to a rag being waved at the far end of the track by their owners—hence the nicknames “rag dog” and “poor man’s race horse.”

CHARACTER
Your Whippet is a member of a most versatile breed—graceful, intelligent, eager to please, exceptionally affectionate, and generally healthy. Whippets are particularly well adapted for human companionship and make excellent house dogs and devoted friends. They are natural athletes, enjoying regular exercise and excelling at a variety of field events, including lure coursing and racing. At the same time, the adults are quiet and relaxed at home, although puppies can be rambunctious for their first year of life.

CARE & HOUSING
Given proper nutrition, exercise, regular vaccinations and veterinary care, most Whippets live for 12 to 15 years, some longer. They do not adjust well to kennel life and do best when living as house dogs. A fenced area for exercise and play is very important, and being leashed otherwise when outdoors is recommended, as their chase instinct is strong. The judicious use of a covered pen or crate when leaving puppies alone keeps both the puppy and your house safe while you are out.

Obedience
One of the most important things you can do with your new Whippet is to take an obedience class. You and your dog will learn to understand each other and in the process create a permanent bond. Look for puppy kindergarten to advanced classes in your area. Often kennel clubs will offer them as a community service.

TO BREED OR NOT
Today, with an increased awareness of pet population issues, the question of whether or not to breed your pet has become a serious and complex one. Dedicated breeders spend years learning about their breed, studying pedigrees and genetics and striving to avoid breedings that may produce inherited health and temperament problems. They are prepared to feed, house, socialize and provide essential veterinary care for their puppies for months or even years, as well as cope with any unforeseen problems that may arise before, during or after the birth of the litter. They carefully screen potential homes, educate new owners, and are willing to be responsible for every dog of their breeding for its lifetime.

Breeders who utilize the AKC’s limited registration, a spay/neuter non-breeding agreement, are expressing their concerns about pet population issues and their dedication to the successful future of the breed. Recent studies have concluded that companion animals are usually happier and more polite and stable when neutered. Males are less likely to exhibit territorial marking and aggression, and females often live longer with fewer health problems. Their temperaments remain the same.

THE OFFICIAL AKC STANDARD
The standard is a word picture describing appearance and behavior and provides a model of what breeders strive to produce. The Whippet standard in part calls for “A medium
size sighthound giving the appearance of elegance and fitness, denoting great speed, power, and balance without coarseness. Symmetry of outline, muscular development and powerful gait are the main considerations; the dog being built for speed and work, all forms of exaggeration should be avoided.

Temperament: Amiable, friendly, gentle, but capable of great intensity during sporting pursuits.

Disqualifications: more than one-half inch above or below stated height limits. Blue eye(s), any portion of blue in the eye(s), eyes not of the same color; undershot; overshot one-quarter inch or more; any coat other than short, smooth, and firm in texture.

ACTIVITIES

There are a number of competitive events that offer titles to talented Whippets and their owners and they include dog shows, obedience, lure coursing, oval track and straight racing, junior showmanship, Rally and agility. With the exception of AKC licensed or sanctioned conformation shows that are aimed at the selection of breeding stock, all events are open to altered dogs.
