The following Parent Club Health Statement is approved by the Dogo Argentino Club Of America’s Board of Directors.

**BAER (Brainstem Auditory Evoked Response) Test:** The Dogo Argentino Club of America requires all breeders conduct this test on all breeding stock and produced litters to implement the eradication of deafness in the breed.

**Hip Dysplasia:** The Dogo Argentino Club of America recommends all breeders participate in a hip screening program on their breeding stock with OFA (Orthopedic Foundation for Animals) or AIS PennHip to implement the eradication of hip dysplasia in the breed.

**Cardiac:** The Dogo Argentino Club of America recommends all breeders to participate in the testing for cardiac disease to implement the eradication of the disease in the breed.
