

Our Kids on Porn

Do you know that the average age of a child's first exposure to porn is just *11-years-old*? By the time children are 16, 90% will have viewed porn online in some manner.

It can be quite shocking to think about and even easier to think 'not my child' but don't let that be you! With a little information up your sleeve, you can have a strategy that works!

Join Author, [Emily Olivia](#)

as she unpacks the problem with porn and highlights what strategies may work best for your family.
