

NABC Robot Individual

Special Event Conditions of Contest

Event Format and Schedule

1. The NABC Robot Individual is a three day, three-session robot duplicate event hosted by Bridge Base Online (BBO).
2. This is a national-rated contest held prior to the start of every NABC. For specific dates, see acbl.org/NABCrobot.
3. Each session comprises 24 boards.
4. Each session spans one calendar day.
5. A registered player may begin their daily session at any time during the calendar day but must complete their 24 boards within eighteen (18) hours of their session start time, or prior to 23:59:59 hours (Eastern Time), whichever comes first.
6. Players must complete at least one board in a session to continue in the event. Players who skip a session are eliminated from the event.
7. Any incomplete boards are scored as a zero.
8. Every session is weighed equally for the final result with full carryover. There is no elimination between sessions, unless players do not complete at least one board (see item 6).
9. The event is played robot duplicate style: The player sits South, with robots at the other three seats at the table.
10. The event is played best-hand style: Player always receives the hand with the most high-card points at the table or tied for the most high-card points. (Best-hand is defined solely by high-card points and does not take into account hand pattern.)
11. Human player declares for his robot partner when their side wins the contract.
12. The event is scored by matchpoints. Each session is played without running scores; the provisional leaderboard is generated following each session. Players can use either the BBO mobile app or the BBO website (www.bridgebase.com) to participate.

Registration/Player Eligibility

13. Pre-registration is required to participate in the event. See acbl.org/NABCrobot for registration timing and details. Players can register using the BBO mobile app or at the BBO website (www.bridgebase.com).
14. Card fees are \$50 for the event. Participants who register before the promotional deadline pay a reduced fee. See acbl.org/NABCrobot for details. All prices in US Dollars. Participants may pay using an accepted credit card or PayPal.
15. Registration is limited to ACBL members in good standing. Non-members wishing to join the ACBL—or players whose membership has lapsed—should become active ACBL members prior to registering (see acbl.org/join). For event registration and membership join/renewal deadlines, check acbl.org/NABCrobot.
16. ACBL and BBO employees, and their immediate family members may not participate.

Playing with Robots

17. BBO robots play a modified 2/1 system. System notes and a convention card are available at www.bridgebase.com/doc/gib_system_notes.php
18. The robots sometimes deviate from notes if simulations lead them to other conclusions.
19. The robot's understanding of what a bid means can be seen by hovering over the highlighted bid.
20. When it is a player's turn to bid, the player can see what robots think a bid means before making the bid. If the bid is not highlighted, it means the robots have no special understanding or definition for that particular bid.

Security

21. This event utilizes deal pools. Not every player will play the same boards. Each board will be duplicated a limited number of times.
22. Players are expected to refrain from communication with anyone else about the boards they have played in a session until the conclusion of the session. Players agree not to misrepresent themselves.
23. Following each session, provisional winners are listed, subject to manual review by an expert panel. The confirmed winner list for each session and the overall event will be released after review, and the decisions of the panel are final.

Awards and Title

24. This event shall be stratified as Unlimited / 2000 / 500
25. Non-North American players shall be considered Unlimited entrants.
26. This event awards one-third gold, and two-thirds red ACBL masterpoints.
27. The Unlimited winner is conferred an NABC title.
28. First place overall awards up to 48 masterpoints.
29. Each session awards up to 18 masterpoints.

Miscellaneous

30. If there are insufficient entrants the event will be cancelled, and all card fees refunded. The decision whether to cancel the event is at ACBL's sole discretion. Players will be notified about the event cancellation before event start date.
31. If there are severe technical issues on BBO's part that result in a player's inability to complete their session (hence disqualifying them from the event), the player's card fees will be refunded for the full event.
32. If there are minor technical issues on BBO's part that impede, but do not prohibit a player's ability to complete a session, no refunds are given.
33. Participants in this event are allowed to play other simultaneous events sanctioned by ACBL and receive full masterpoint awards.
34. To prevent misunderstandings, players are encouraged to familiarize themselves with BBO software and the mechanics of robot play on BBO prior to the event. In particular, players are strongly encouraged to learn how to read robot's alerts, how to claim properly, and how to customize the software to ensure their full comfort (card size, card type, chat font size, etc.) before the event begins.
35. Unless specifically noted, the General Conditions of Contest, the Laws of Duplicate Bridge and ACBL's Zero Tolerance Policy shall govern this event.
36. The event's Director in Charge shall determine / adjudicate any items not specifically covered in these conditions. Decisions of the event Director in Charge are final.
