

SONIC ELITE OUTDOOR VB NET

SET INCLUDES:

The Sonic Elite Outdoor Volleyball Net is part of the Sonic series, but it's universal design is **adaptable to use with nearly any system**. Made in the USA, it's versatility and durability make it the go-to outdoor volleyball net for all levels of play.

- * Regulation size (36" H x 32' L)
- * Made of heavy duty weather treated vinyl binding (no dowels)
- * 36' 6" x 3/16" coated steel top and bottom cables

NET ATTACHMENT/ ADJUSTMENTS

- Attach single net cables, with looped ends, using the carabiner and loop through the upper pole and lower eyebolts.
- Extend the net cables to the opposite pole and insert the top cable down through the upper eyebolt and attach one lever ratchet carabiner to hold the cable in place and prevent it from going back through the eyebolt. Bring the lower net cable up through the lower eyebolt and attach the end to the lower lever ratchet carabiner. This step may require two people. (Adult assembly only.)
- The net is now ready to be tightened. The lever ratchet will tighten both the upper and lower cables evenly. Do not over tighten the cables as it may damage your equipment.
- To adjust the net height, carefully remove the net. **CAREFULLY** release the net tension by lifting the lever ratchet release. This may require 2 adults to control the release of the net tension.
- Raise or lower pole and lock into the chosen height.
- If additional net cable tension is required, you may need to re-configure the fixed cable end attachment or shorten the cable using cable bolts.
