AUDI E-TRON

OVERVIEW

The Audi e-tron was introduced in New Zealand in July 2019 and Australia in late 2020. This ANCAP safety rating applies to all variants excluding the e-tron S. A separate rating applies to Audi Q8 e-tron variants, introduced from September 2023.

Dual frontal, side chest-protecting airbags and side head-protecting (curtain) airbags for the front and second rows are standard.

Autonomous emergency braking (City, Interurban & Vulnerable Road User) as well as lane keep assist (LKA) with lane departure warning (LDW) and emergency lane keeping (ELK) are standard.

ADULT OCCUPANT PROTECTION

91%

34.85 POINTS
OUT OF 38

The passenger compartment of the Audi e-tron remained stable in the frontal offset test. Dummy readings indicated ADEQUATE protection for the driver's lower legs and the chest of both the driver and front passenger. Protection for all other critical body regions was GOOD.

In the full width frontal test, protection was ADEQUATE for the chest of both the driver and the rear passenger, with GOOD protection for all other critical body areas.

In the side impact test, protection offered to all critical body regions of the driver was GOOD.

In the oblique pole test, chest protection for the driver was WEAK. All other critical body regions saw GOOD results.

The autonomous emergency braking (AEB) system showed GOOD performance in low-speed test scenarios typical of city driving.

FRONTAL OFFSET#	7.42 (out of 8)

In the frontal offset test, protection of the neck of the 10 year dummy was ADEQUATE, while the protection offered to all other critical body regions was GOOD.

In the side impact test, protection of all critical body areas was GOOD for both child dummies.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, though the Type A capsule could not be correctly installed in the centre rear position.

The Audi e-tron is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

VULNERABLE ROAD USER PROTECTION

71%

34.38 POINTS
OUT OF 48

The bonnet provided predominantly GOOD or ADEQUATE protection to the head of a struck pedestrian, while POOR results were recorded at the rear of the bonnet, at the base of the windscreen, and on the stiff windscreen pillars.

Protection of the pelvis was mixed, with areas of GOOD and POOR performance. The bumper provided GOOD protection to pedestrians' legs.

The AEB system offered GOOD performance in tests of its effectiveness in pedestrian test scenarios, with GOOD performance recorded in daylight scenarios and ADEQUATE performance in some night-time scenarios. In cyclist test scenarios, the AEB system offered GOOD performance. The system's overall performance was classified as GOOD.

The Audi e-tron is fitted as standard with a range of safety assist features including autonomous emergency braking (AEB) and a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality.

Tests of the AEB system showed GOOD performance with collisions avoided or mitigated in all test scenarios. Overall, effectiveness of the AEB system performance in highway speed scenarios was rated as GOOD.

Tests of LSS functionality showed ADEQUATE performance in lane keep assist scenarios, and ADEQUATE performance in the more critical ELK scenarios. Overall performance of the LSS system was classified as ADEQUATE.

A driver-set speed limiter is standard equipment. A speed limit information function (SLIF) is not available.

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.
