Built:	2014
Engine:	2.4
Category:	People Mover
Variant Applicability*:	All variants

Frontal offset test at 64 km/h

Airbags	ESC	Frontal Offset	Side Impact	Pole	Whiplash	Pedestrian	Seat Belt Reminders	Overall Score	ANCAP Safety Rating
Frontal + Side + Head	Standard	12.75 (out of 16)	16.00 (out of 16)	2.00 (out of 2)	GOOD	ACCEPTABLE	2 (out of 3)	32.75 (out of 37)	★★★★★

The tested model of Honda Odyssey was introduced in Australia and New Zealand in 2014. This ANCAP safety rating applies to all variants.

Dual frontal, side chest and side head airbags (curtains) are standard. Antilock brakes (ABS), electronic brake distribution (EBD) and electronic stability control (ESC) are also standard. Advanced seat belt reminders are fitted to both front seats. Autonomous emergency braking (AEB) and lane departure warning (LDW) is standard on all variants built from December 2020.

In the frontal offset crash test, driver leg and foot protection was marginal. Passenger chest protection was acceptable in this test. In the side impact crash test driver protection was good. Head protection in the side pole test was also good.

OCCUPANT PROTECTION

Frontal Offset Test.

Each body region is scored out of 4 points

Head / neck:	4.00 points
Chest:	3.89 points
Upper legs:	4.00 points
Lower legs:	0.86 points

The passenger compartment held its shape well but there was excessive pedal movement. All doors remained closed during the crash. After the crash the driver door opened with high manual effort.

Side Impact Test.

Each body region is scored out of 4 points

Head:	4.00 points
Chest:	4.00 points
Abdomen:	4.00 points
Pelvis:	4.00 points

Good protection was provided for the driver in the side impact test. The side airbags performed well. The electrically operated sliding door on the passenger side could not be easily opened until the transmission control was placed in the "park" position. This is a safety feature for normal use but could hamper rescue in the event of a crash.

Pole Test.

Scored out of 2 points

The vehicle was eligible for a side pole test because it has side curtain airbags. The vehicle scored the maximum 2 points for head protection in this test.

Whiplash Protection Test.

Whiplash protection is assessed to the RCAR Protocol

Geometric test:	GOOD
Dynamic test:	GOOD
Overall whiplash rating:	GOOD

ANCAP Safety Rating HONDA ODYSSEY (From 2014)

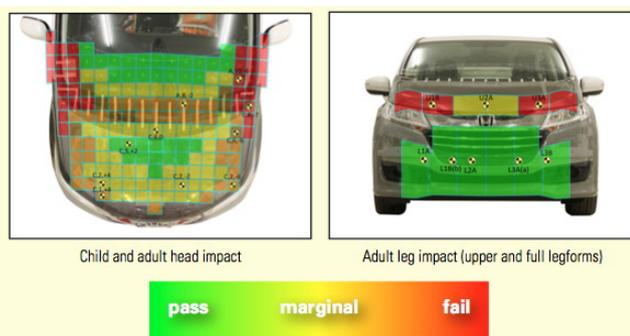

PEDESTRIAN PROTECTION

Pedestrian Test.

ACCEPTABLE - Scored 23.540 out of 36 points

Child head impacts: 7.97 points
 Adult head impacts: 7.84 points
 Upper leg impacts: 1.73 points
 Lower leg impacts: 6.00 points

The Odyssey provided mostly good protection in the child head and adult leg impact zones. Performance was mostly poor in the windscreen surround and the upper leg impact zone (v6.0).

SCORE DEDUCTIONS

Deductions from frontal offset test scores

Excessive park brake pedal vertical movement (93mm):
 1 point from lower leg score

Excessive brake pedal rearward movement (158mm):
 2.31 points from foot score

Blocked brake pedal:
 0.83 points from foot score

Note: Steering column and pedal movements are measured relative to the driver's seat.

Deductions from side impact test score

No deductions for side impact test.

Deductions from pole test score

No deductions for pole test.

* For information about the application of ANCAP ratings to model variants see the ANCAP Variant Policy. In brief, ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model.
