side head, centre

ANCAP
SAFETY

TESTED
2025

The BMW 2 Series Gran Coupé was introduced in Australia in January 2025. This ANCAP safety rating applies to all BMW 2 Series Gran Coupé variants.

The ANCAP safety rating for the BMW 2 Series Gran Coupé is based on testing of the closely-related BMW 1 Series. An additional side impact crash test was conducted on the BMW 2 Series Gran Coupé, and ANCAP was provided with technical information and additional test data to show that test results of the BMW 1 Series also apply to the BMW 2 Series Gran Coupé.

Dual frontal, side chest-protecting and side head-protecting airbags are standard. A centre airbag, which provides added protection to front seat occupants in side impact crashes, is also standard.

Autonomous emergency braking (Car-to-Car, Vulnerable Road User, Junction & Crossing, Backover and Head-On) and a lane support system with lane keep assist (LKA), lane departure warning (LDW) and emergency lane keeping (ELK), and a speed assist system (SAS) with a speed sign recognition system, are standard on all variants.

FAR SIDE IMPACT
4.00 points out of 4

* Scaled scores. Total test scored out of 16.00 points.

The passenger compartment remained stable in the **frontal offset (MPDB)** test. Protection of the driver's head was ADEQUATE, while chest protection was WEAK. Protection of the lower legs of both the driver and front passenger was MARGINAL. Structures in the dashboard were a potential source of injury and protection of the upper legs was WEAK for the driver and MARGINAL for the front passenger. Protection of the head and chest of the front passenger was GOOD.

The front structure presented a moderate risk to occupants of an oncoming vehicle in the MPDB test (which evaluates vehicle-to-vehicle compatibility), and a 2.34 point penalty (out of 8.00 points) was applied.

In the **full width frontal** test, protection was WEAK for the chest of both the driver and the rear passenger, with GOOD protection of all other critical body areas.

GOOD protection was provided for the driver in the **side impact** and **oblique pole** tests, and the vehicle scored maximum points.

The BMW 2 Series Gran Coupé is equipped with a centre airbag to protect against occupant-to-occupant interaction in side impacts and it provided GOOD protection for the head of both front seat occupants. Prevention of excursion (movement towards the other side of the vehicle) in the **far side impact** tests was assessed as ADEQUATE for both the vehicle-to-vehicle impact scenario and the vehicle-to-pole scenario.

A Rescue Sheet, providing information for first responders in the event of a crash is available, and a multi-collision braking system is fitted. It was demonstrated that, if the car entered water, the doors and windows of the BMW 2 Series Gran Coupé would remain functional for the minimum required time period.

ON-BOARD SAFETY FEATURES
7.00 points out of 13

In the **frontal offset** test, protection of the neck of both the 10 year and 6 year dummies was ADEQUATE, while the protection offered to all other critical body regions was GOOD.

In the **side impact** test, protection of the head of the 10 year dummy was ADEQUATE, while the protection offered to all other critical body regions of both the 6 and 10 year dummies was GOOD.

The BMW 2 Series Gran Coupé is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, though one of the selected booster seats could not be correctly installed in the centre rear seating position.

A child presence detection (CPD) system is not available.

GOOD ADEQUATE MARGINAL WEAK POOR NOT TESTED

NOTE: The child restraints fitted to vehicles tested by Euro NCAP are relevant to the European market. For Australasian consumers, this information should be used as a guide to vehicle features only. The Child Restraint Evaluation Program (CREP) provides an independent assessment on the safety of Australasian child restraints - see www.childrearseats.com.au. * Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible. ^ The list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

Vulnerable Road User Protection

85%

53.92 out of 63

HEAD PROTECTION (Adult, Child, Cyclist) 12.53 points out of 18	KNEE & TIBIA PROTECTION 8.59 points out of 9	AEB CYCLIST 8.57 points out of 9
PELVIS PROTECTION 4.17 points out of 4.5	AEB PEDESTRIAN (Forward) 6.56 points out of 7	AEB MOTORCYCLE 6.00 points out of 6
FEMUR PROTECTION 4.50 points out of 4.5	AEB PEDESTRIAN (Backover) 0.00 points out of 2	LSS MOTORCYCLE 3.00 points out of 3

The BMW 2 Series Gran Coupé has an ‘active’ bonnet. Sensors detect when a pedestrian is struck and actuators lift the bonnet to provide greater clearance to stiff components in the engine bay. In **pedestrian impact** tests, the bonnet was tested in the raised position and GOOD or ADEQUATE results were recorded over most of the bonnet area, with WEAK and POOR results recorded at the base of the windscreen and on the windscreen pillars.

Protection of the pelvis and lower legs was GOOD or ADEQUATE, while protection of the femur was GOOD.

The autonomous emergency braking (AEB) system is capable of detecting and reacting to vulnerable road users such as pedestrians, cyclists and motorcyclists.

Testing of this system showed GOOD performance in **AEB Pedestrian** test scenarios, with collisions avoided or mitigated in all forward tests, including turning scenarios. The AEB system fitted to Australian and New Zealand vehicles reacts to vulnerable road users in reverse (**AEB Backover**) but the system was not standard on the tested vehicle, and hence AEB Backover tests were not conducted.

GOOD performance was seen in **AEB Cyclist** test scenarios with collisions avoided or mitigated at most test speeds, including in turning scenarios. The vehicle provides information and warning when a bicycle is approaching from behind (**cyclist anti-dooring**).

GOOD performance was seen in the **AEB Motorcyclist** tests, including in turning and in emergency lane keeping scenarios, earning full points.

The BMW 2 Series Gran Coupé is fitted with an autonomous emergency braking (AEB) system capable of functioning at highway speeds, a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality, and blind spot monitoring (BSM).

Tests of the **AEB (Car-to-Car)** system showed GOOD performance with collisions avoided or mitigated in all test scenarios, including in **AEB Junction** and **AEB Crossing** scenarios where the test vehicle can autonomously brake to avoid crashes when turning across or crossing the path of an oncoming vehicle. **AEB Head-On** system functionality showed GOOD performance.

Tests of **lane support system** functionality showed GOOD performance, including in the more critical emergency lane keeping test scenarios.

A speed assistance system (SAS) with speed limit information function (SLIF), intelligent adaptive cruise control (iACC) and intelligent speed limiter (ISL) is standard, informing the driver of the local speed limit and allowing the driver to accept the change in speed accordingly.

A seatbelt reminder system with occupancy detection is fitted to all passenger seating positions.

A driver monitoring system (DMS) detecting driver drowsiness (indirect) is fitted as standard.
