KIA CERATO S

OVERVIEW

The Kia Cerato sedan (BD series) was first introduced in Australia in May 2018, with hatch variants released from December 2018. The Cerato sedan and hatch were first released in New Zealand from September 2018.

This 4 star ANCAP safety rating applies to updated Cerato S and Cerato Sport variants built from April 2021 (on sale from June 2021) without *Safety Pack 1*. A separate ANCAP safety rating is available for other variants.

Dual frontal, side chest-protecting and side head-protecting (curtain) airbags are standard. Autonomous emergency braking (City, Interurban & Pedestrian) is standard on all variants built from April 2021. A more advanced AEB system is available as an option as part of *Safety Pack 1* for Cerato S and Cerato Sport variants, and standard on other variants.

Cerato S and Sport variants (without the optional *Safety Pack 1*) built from April 2021 are fitted with an improved *AEB Vulnerable Road User* system capable of recognising and reacting to pedestrians (not cyclists). This updated system however has not been tested by ANCAP.

A lane keep assist (LKA) system with lane departure warning (LDW) and a manual-set speed limiter are standard on all variants.

ADULT OCCUPANT PROTECTION

90%
34.25 POINTS
OUT OF 38

The passenger compartment remained stable in the frontal offset test. Dummy readings indicated ADEQUATE protection of the driver's chest and the lower legs of both the driver and front passenger. Brake pedal movement resulted in driver foot protection being rated ADEQUATE. Protection was GOOD for all other critical body regions for both the driver and front passenger.

In the full width frontal test, chest protection was ADEQUATE for the driver and MARGINAL for the rear passenger, otherwise GOOD protection was offered to all other critical body regions for both the driver and rear passenger.

GOOD protection was provided for the driver in the side impact test. In the oblique pole test, protection of the chest was WEAK while all other areas provided GOOD protection.

The autonomous emergency braking system (AEB) showed GOOD performance in low speed test scenarios typical of city driving and earned full points.

FRONTAL OFFSET#	6.85 (out of 8)
FULL WIDTH FRONTAL#	7.36 (out of 8)

CHILD OCCUPANT PROTECTION

83%

41.06 POINTS
OUT OF 49

In the frontal offset test, dummy readings indicated WEAK protection of the neck of the 10 year dummy. Otherwise, protection of both dummies was GOOD.

In the side impact test, protection of all critical body areas was GOOD for both child dummies.

The Kia Cerato is fitted with lower ISOfix anchorages for the rear outboard seats, and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, though one of the selected Type A convertible seats could not be correctly installed in rearward facing mode using the ISOfix anchorages. In addition, care is required when installing a Type E booster in the centre rear position.

* Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible.

[^] The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

VULNERABLE ROAD USER PROTECTION

55%

26.51 POINTS
OUT OF 48

The bonnet provided predominantly GOOD or ADEQUATE protection to the head of a struck pedestrian, while MARGINAL and POOR results were recorded at the rear of the bonnet, at the base of the windscreen and on the stiff windscreen pillars.

Protection of the pelvis area was GOOD or ADEQUATE, while the bumper showed GOOD results for leg impacts.

The autonomous emergency braking (AEB) system fitted as standard to Cerato S and Cerato Sport variants at the time of rating was not designed to react to vulnerable road users and scored no points for *AEB Pedestrian* or *AEB Cyclist*. An upgraded system has been fitted to vehicles built from April 2021 that is designed to detect and react to pedestrians, however this system has not been tested by ANCAP. A more advanced AEB system capable of detecting and reacting to pedestrians and cyclists is available as an option for S and Sport variants, and is standard on all other Cerato variants. Details on performance of the more advanced system are available as part of a separate rating.

The Kia Cerato is fitted with an autonomous emergency braking system (AEB) as standard equipment. Cerato S and Cerato Sport variants are fitted with a camera-only AEB system which offers slightly reduced performance at highway speeds. A more advanced system is available as part of an optional safety pack for these variants, and is standard on all other variants. Overall, effectiveness of the basic AEB system in AEB Interurban scenarios was rated ADEQUATE.

A lane support system (LSS) with lane keep assist (LKA) and lane departure warning (LDW) is standard. A blind spot monitoring system (BSM) is optional on some variants and standard on others.

Tests of LSS functionality showed GOOD performance, with the system intervening in some of the more critical emergency lane keeping (ELK) test scenarios.

SPEED ASSISTANCE SYSTEMS	1.25 (out of 3)
SEAT BELT REMINDERS	2.83 (out of 3)
LANE SUPPORT SYSTEMS	3.25 (out of 4)
AEB - Interurban	1.95 (out of 3)

A seatbelt reminder system is fitted to all seating positions with occupancy detection available for the front passenger and rear outboard seating positions. A manually-set speed assistance system is standard equipment. A speed limit information function is not available.

● STANDARD ○ NOT AVAILABLE ON BASE VARIANT BUT STANDARD OR OPTIONAL ON HIGHER VARIANTS ○ OPTIONAL ✗ NOT AVAILABLE

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.
