Occupant Protection.

Frontal Offset Test

Each body region is scored out of 4 points

Head / neck: 3.00 points 2.79 points Chest: Upper legs: 2.00 points Lower legs: 2.67 points

In the frontal offset test, protection of the driver head and chest was acceptable and lower legs was marginal. Insufficient inflation of the passenger airbag caused bottoming out of the dummy head and was penalised. The passenger compartment held its shape well in the frontal offset test. Pedal and steering wheel displacements were well controlled. All doors remained closed during the crash.

Side Impact Test

Each body region is scored out of 4 points

Head: 4.00 points Chest: 4.00 points Abdomen: 4.00 points 4.00 points Pelvis:

Good protection was provided for the driver in the side impact test.

Pole Test

Scored out of 2 points

Score: 2.00 points

The vehicle has side curtain airbags so was eligible for a side pole test. The vehicle scored the maximum 2 points for head protection in this test.

Whiplash Protection Test

Whiplash protection is assessed to the RCAR Protocol

Geometric test: Good Dynamic test: Good Overall whiplash rating: Good

Pedestrian Protection.

Pedestrian Test

Scored out of 36 points

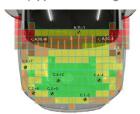

Adult & child head impacts: 17.02 points Upper leg impacts: 3.53 points Lower leg impacts: 6.00 points

This vehicle scored 26.55 out of 36 points (Acceptable). The bonnet provided predominantly good or adequate protection to the head of a struck pedestrian, with some poor results recorded at the base of the windscreen and on the windscreen pillars. Protection of the pelvis area was mixed with good results at the edges and poor results around the centre. The bumper showed good results for leg impacts.

Child and adult head impact

Adult leg impact (upper and full legforms)

[^] Rating Year: The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and may be based on the year in which a new vehicle model is first launched into the Australian and/or New Zealand markets; the year in which the vehicle was tested (if tested by Euro NCAP); or, for vehicles which hold an existing ANCAP safety rating, the year in which the rating was updated (or earlier applicable year).

^{*} Model Variants: ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on extending a rating to additional variants of a model. For further information about the application of ANCAP safety ratings to model variants, see the ANCAP Variant Policy.
