SUBARU Forester HYBRID

5 door SUV

CY:2025-

	Airbag		Stored gas inflator		Seat belt pretensioner		SRS control unit		
	Battery low voltage		Gas strut / Preloaded spring		Fuel tank		High strength zone		Zone requiring special attention
	Battery pack, high-voltage		High voltage power cable		High voltage device that disconnects high voltage		Fuse box disabling high voltage		High voltage component
ID No.		Version No.		Version date		Page			
JF2-T8440AE		01		04 / 2025		1 / 4			

1. Identification / Recognition

Location of vehicle badges

Never assume the e-BOXER is shut off simply because it is silent.

2. Immobilisation / Stabilisation / Lifting

Completely immobilize the vehicle

1. Chock wheels and set the parking brake.

2. Shift the select lever to the Park position.

Stabilisation-lifting point

Crib at 4 points directly under the front and side sills.

- 1 Cribbing Points
- 2 Side Sill Garnish
- High Voltage

Do not place cribbing under the orange colored power cables, exhaust system, or fuel system.

3. Disable direct hazards / Safety regulations

If any of the following systems are required to be operated, operate them BEFORE disconnecting the battery.

Power door lock
Electric parking brake

Power window
Power seat controls

Rear gate opener

Once the 12 Volt auxiliary battery is disconnected, power controls will not operate.

1. High-voltage circuit cutoff and 12V circuit cutoff procedure

<Turn the ignition switch to OFF> : Keep off the high voltage circuit and 12V system circuit.

2A. High voltage circuit interruption

<Remove the service plug>

- If cannot cut off the high-voltage circuit, do not touch, disconnect, or open the high-voltage components and high-voltage battery.
- To prevent injury wear personal protective equipment suitable for organic solvents including SCBA.

In case of a collision with airbag deployment and/or seat belt pretensioner activation, the propulsion system will be disabled. The restraint systems are still active.

2B. <Alternative>12V circuit interruption

If the ground terminal of 12V battery cannot be removed, 12V circuit cannot be cut off.
Be careful when working, as SRS Airbag System may suddenly expand due to a short circuit or impact on the harness, which may result in serious injury.

<Disconnect the ground terminal from battery sensor>

<Alternatively, remove the FUSE>

4. Access to the occupants

■ Window Glass

■ Seat adjustment

<Electric>

<Manual>

■ Steering Column adjustment

■ High strength steel in Body

270 Mpa (2,753 kgf /cm², 39,150 psi)

340 to 440 Mpa (3,467 to 4,487 kgf /cm², 49,299 to 63,799 psi)

590 Mpa (6,016 kgf /cm², 85,549 psi)

980 MPa (9,993 kgf /cm², 140,299 psi)

1,500 Mpa (15,295 kgf /cm², 217,498 psi)

■ Door Latches

■ Roof Removal Area

ID No.	Version No.	Version date	Page

5. Stored energy / Liquids / Gases / Solids

	Li-ion : 259 V	    
	12 V	  
	63 L	
	HFO-1234yf : 0.450 kg (0.99 lb)	  

6. In case of fire

USE COPIOUS AMOUNTS OF WATER

If it is difficult to apply copious amounts of water to the high voltage battery, it is recommended to allow the high voltage battery to burn itself out.

RE-IGNITION POSSIBLE !

7. In case of submersion

Do not touch the service disconnect plug, high voltage parts and wiring to prevent electric shock when the vehicle is submerged. Please shut off the hybrid system after completely pulling the vehicle out of the water.

8. Towing / Transportation / Storage

Less than 30 km/h (19 mph)

RE-IGNITION POSSIBLE !

Store the vehicle at a safe distance from other vehicles.

Location Rear Hook

Location Tools

9. Important additional information

■ Seat Cushion Airbag
