MERCEDES-BENZ GLB

JUNE 2020 - DECEMBER 2025 GLB 200 & GLB 250 VARIANTS

MERCEDES-BENZ GLB

OVERVIEW

The Mercedes Benz GLB was introduced in Australia and New Zealand in June 2020. This ANCAP safety rating applies to GLB 200 and GLB 250 variants only.

Dual frontal airbags, side chest-protecting airbags for both the first and second row outboard seating positions, side head-protecting airbags (curtains) for all seating rows, and a driver knee airbag are standard.

Autonomous emergency braking (City, Interurban and Vulnerable Road User) as well as lane keep assist (LKA) with lane departure warning (LDW) and blind spot monitor (BSM) are standard equipment.

NOTE: Mercedes-Benz have advised that some safety features included in the originally-rated model are not fitted to models built from December 2020. Removal of these features does not affect the ANCAP safety rating. See the Safety Features & Technologies table on page 8.

ANCAP SAFETY RATING RATING YEAR (DATESTAMP) **VEHICLE TYPE AIRBAGS**

2019

MEDIUM SUV

Dual frontal, driver knee, side chest (1st & 2nd row), side head (1st, 2nd & 3rd row)

RATING APPLICABILITY

VARIANT	BODY TYPE	ENGINE	DRIVETRAIN	AUS	NZ
Mercedes-Benz GLB 200 ◆	5 door SUV	1.3 litre petrol	2WD	\checkmark	\checkmark
Mercedes-Benz GLB 250 4MATIC	5 door SUV	2.0 litre petrol	AWD	\checkmark	\checkmark
Mercedes-AMG GLB 35 4MATIC	5 door SUV	2.0 litre petrol	AWD	×	×

ADULT OCCUPANT PROTECTION

The passenger compartment of the Mercedes-Benz GLB remained stable in the frontal offset test. Protection was ADEQUATE for the chest of the driver and the lower legs of the passengers, with GOOD protection offered to all other critical body regions.

In the full width frontal test, protection was MARGINAL for the neck of the driver, and ADEQUATE for the neck and chest of the rear passenger. GOOD protection was provided for all other critical body regions.

In the side impact test, protection offered to all critical body regions of the driver was GOOD.

In the oblique pole test, chest protection offered to the driver was rated MARGINAL.

The autonomous emergency braking (AEB) system scored maximum points with GOOD performance in low-speed test scenarios typical of city driving.

FRONTAL OFFSET#	7.38	(out of 8)
FULL WIDTH FRONTAL#	7.23	(out of 8)
SIDE IMPACT#	8.00	(out of 8)
OBLIQUE POLE#	6.92	(out of 8)
WHIPLASH PROTECTION	1.64	(out of 2)
AEB - City	4.00	(out of 4)

^{*}Scaled scores. Total test scored out of 16.00 points.

FRONTAL OFFSET TEST (64 KM/H)

Driver

Head / neck: 4.00 pts 3.15 pts Chest: Upper leas: 4.00 pts Lower legs: 4.00 pts Deductions: Nil

Front Passenger

Head / neck: 4.00 pts Chest: 4.00 pts Upper leas: 4.00 pts Lower legs: 3.60 pts Deductions: Nil

ADEQUATE MARGINAL

WHIPLASH (REAR IMPACT) PROTECTION TEST

Driver / Front Passenger

Rear: 0.44 points Front: 1.20 points

CHILD OCCUPANT PROTECTION

In the frontal offset test, protection of the neck of the 10 year dummy was WEAK, while the protection offered to all other critical body regions of both the 6 and 10 year dummies was GOOD.

In the side impact test, protection of the head of the 10 year dummy was ADEQUATE while that of other body areas of both the 6 year and 10 year dummies was GOOD.

The Mercedes-Benz GLB is fitted with lower ISOFix anchorages on the outboard seats in both the second and third rows and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, though in the third row, one of the convertible seats in rearward-facing mode could not be correctly installed and care is needed to tension the ISOFix anchorages in the third row seats.

^{*} Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible.

INSTALL WITHOUT PROBLEM

INSTALL WITH CARE

CANNOT BE FITTED SAFELY

▼ INSTALLATION NOT ALLOWED - NOT APPLICABLE / NOT ASSESSED

[^] The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

VULNERABLE ROAD USER PROTECTION

The Mercedes-Benz GLB has an 'active' bonnet. Sensors detect when a pedestrian has been struck and the bonnet lifts to provide greater clearance to the hard structures in the engine compartment. The vehicle was tested with the bonnet in the raised position with results showing GOOD or ADEQUATE protection over most of the bonnet surface, with POOR results recorded on the windscreen pillars.

The bumper provided GOOD protection to pedestrians' legs, however protection of the pelvis was POOR.

The autonomous emergency braking (AEB) system is capable of detecting and reacting to vulnerable road users such as pedestrians and cyclists. The AEB system offered GOOD performance in tests of its effectiveness in pedestrian test scenarios under both daylight and night-time conditions. GOOD performance was also seen in cyclist test scenarios with collisions avoided or mitigated at most test speeds. The system's overall performance was classified as GOOD.

HEAD IMPACTS UPPER LEG IMPACTS LOWER LEG IMPACTS	19.77 0.33 6.00	(out of 24) (out of 6) (out of 6)
AEB - Pedestrian	5.55	(out of 6)
AEB - Cyclist	5.88	(out of 6)

PEDESTRIAN IMPACT TEST (40 KM/H)

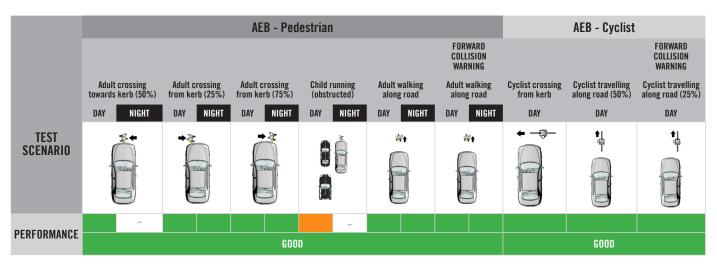

AUTONOMOUS EMERGENCY BRAKING (PEDESTRIAN & CYCLIST)

SYSTEM NAME: Active Brake Assist

TYPE: Autonomous emergency braking with forward collision warning

OPERATIONAL FROM: 7-200 km/h

DESCRIPTION: System functions in the daytime and night

SAFETY ASSIST

The Mercedes-Benz GLB is fitted as standard with a range of safety assist features including autonomous emergency braking (AEB), a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality, and blind spot monitoring (BSM).

Tests of the AEB system showed GOOD performance with collisions avoided or mitigated in most scenarios. Overall, effectiveness of the AEB system performance in highway speed scenarios was rated as GOOD

Tests of LSS functionality showed MARGINAL performance in LKA scenarios, and ADEQUATE performance in the more critical ELK scenarios. Overall performance of the LSS system was classified as ADEQUATE.

A speed assistance system (SAS) is standard, informing the driver of the local speed limit and allowing the driver to set the speed accordingly.

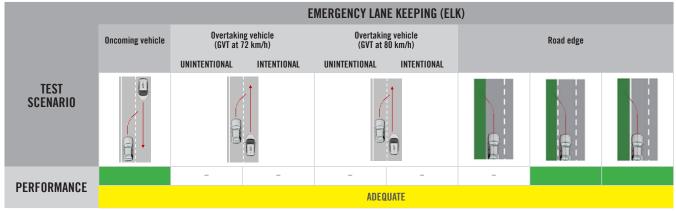

A seatbelt reminder system is fitted to all seating positions, however occupancy detection is not available on rear seats.

[~] Specifications & availability subject to change. Please check with the vehicle manufacturer for confirmation of vehicle specification.

● STANDARD ● NOT AVAILABLE ON BASE VARIANT BUT STANDARD OR OPTIONAL ON HIGHER VARIANTS ○ OPTIONAL × NOT AVAILABLE

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.
